## Tulsa Livestock Auction
## 1-4-22

Receipts: 2,609 Last Reported: 4,502 Year Ago: 2,821
Steers and Heifers both 5.00-8.00 higher. Value Added steers 3.00-4.00 higher while Value Added Heifers traded 6.00-8.00 higher. Extremely cold weather throughout the trade area kept receipts low. Demand good.

## OKLAHOMA HAY MARKET REPORT
## 12-17-21

Receipts: 1,967 Last Reported: 2,806 Year Ago: 912
Compared to the last report: Not much has changed, hay continues to be steady for much of the state with good demand, while movement is beginning to raise more. With the mild weather conditions and much needed moisture the cattle are still hanging on to their free-standing grass as a resource. When compared to more climatically challenging conditions hay will then become the main resource. We continue to be in dry condition in most of the state according to the Mesonet. *** The next report release will be January 7th. ***

**OKLAHOMA HAY MARKET REPORT**
**1-7-22**

Receipts: 1,130 Last Reported: 1,967 Year Ago:1,400
Compared to last report: Weather continues to stay warm temperatures; hay is slow to steady. The warm weather conditions allow the cattle to still hang on to the free-standing grass. They are not taking to the hay when compared to more climatically challenging conditions. Hay remains the main feed resource due to prices of feed. We are currently in severe drought in the east and an extreme drought central west according to the Mesonet. The next report release will be January 21th.

**OKLAHOMA HAY MARKET REPORT**
**1-7-22**

Receipts: 1,130 Last Reported: 1,967 Year Ago:1,400
Compared to last report: Weather continues to stay warm temperatures; hay is slow to steady. The warm weather conditions allow the cattle to still hang on to the free-standing grass. They are not taking to the hay when compared to more climatically challenging conditions. Hay remains the main feed resource due to prices of feed. We are currently in severe drought in the east and an extreme drought central west according to the Mesonet. The next report release will be January 21th.

## OKLAHOMA HAY MARKET REPORT
**1-21-22**

Receipts: 3,274 Last Reported: 830 Year Ago:348
Compared to last report: Weather continues to stay warm temperatures; hay is steady. The warm weather conditions allows the cattle to still hang on to the free-standing grass. Hay remains the main feed resource due to prices of feed. We are currently in severe drought in the eastern and an extreme drought to the central, and western Oklahoma according to the Mesonet. *** The next report release will be February 4th. ***

### Central

**Alfalfa: Good (Trade/ Per Ton)**

| Size | Qty | Price Range | Wtd.Avg. | Freight/Used |
|---|---|---|---|---|
| Large Round | 96 | 160.00 | 160.00 | Delivered |

## OKLAHOMA HAY MARKET REPORT
**1-21-22**

Receipts: 3,274 Last Reported: 830 Year Ago:348
Compared to last report: Weather continues to stay warm temperatures; hay is steady. The warm weather conditions allows the cattle to still hang on to the free-standing grass. Hay remains the main feed resource due to prices of feed. We are currently in severe drought in the eastern and an extreme drought to the central, and western Oklahoma according to the Mesonet. *** The next report release will be February 4th. ***

### Central

**OKLAHOMA HAY MARKET REPORT**
**2-4-22**

Receipts: 2,401 Last Reported: 3,174 Year Ago:1,864
Compared to last report: Winter weather entered the state which allowed the hay market to stay steady. We still need more moisture in our state to continue to help with the drought conditions and wheat pastures. Thus far, according to the Mesonet for most of the state is experiencing abnormally dry conditions or worse. In the Oklahoma Panhandle the drought conditions are exceptional, Western Oklahoma is in extreme drought, Central Oklahoma is mainly in a severe drought, and Eastern part of Oklahoma is in a severe drought. Unfortunately, on the 6-to-10-day precipitation outlook map shows Oklahoma is likely to receive below-normal precipitation levels for this time of year. The 6-to-10- day temperature outlook map shows higher-than-normal to normal temperatures are likely for most of the state.*** The next report release will be February 18th. ***

## Woodward Livestock Auction
## 2-10-22

Receipts: 5,564 Last Reported : 782 Year Ago: 0
Compared to two weeks ago: With light receipts last week due to a winter storm in the area and few comparable sales, feeder steers 4.00 to 6.00 higher. Feeder heifers 5.00 to 8.00 higher. Steer calves under 600lbs 10.00 to 15.00 higher. Heifer calves 8.00 to 15.00 higher with instances of 20.00 higher. Demand was moderate to active especially on the lighter calves. Quality was average.

**OKLAHOMA HAY MARKET REPORT**
**2-4-22**

Receipts: 2,401 Last Reported: 3,174 Year Ago:1,864
Compared to last report: Winter weather entered the state which allowed the hay market to stay steady. We still need more moisture in our state to continue to help with the drought conditions and wheat pastures. Thus far, according to the Mesonet for most of the state is experiencing abnormally dry conditions or worse. In the Oklahoma Panhandle the drought conditions are exceptional, Western Oklahoma is in extreme drought, Central Oklahoma is mainly in a severe drought, and Eastern part of Oklahoma is in a severe drought. Unfortunately, on the 6-to-10-day precipitation outlook map shows Oklahoma is likely to receive below-normal precipitation levels for this time of year. The 6-to-10- day temperature outlook map shows higher-than-normal to normal temperatures are likely for most of the state.*** The next report release will be February 18th. ***

**OKLAHOMA HAY MARKET REPORT**
**2-18-22**
**Receipts:** 2,237 **Last Reported:** 2,401 **Year Ago:** 315

Compared to last report: We continued to receive winter weather which allowed the hay market to stay steady. We still need more moisture in our state to continue to help with the drought conditions and wheat pastures. Thus far, according to the Mesonet for most of the state is experiencing abnormally dry conditions or worse. In the Oklahoma Panhandle the drought conditions are exceptional, Western Oklahoma is in extreme drought, Central Oklahoma has moved into more a in an extreme drought, and Eastern part of Oklahoma is in a severe drought. Looking into the future, on the 6-to-10-day we may receive some more moisture in the near future.

*** The next report release will be March 4th. ***

**OKLAHOMA HAY MARKET REPORT**
**2-18-22**
**Receipts:** 2,237 **Last Reported:** 2,401 **Year Ago:** 315

Compared to last report: We continued to receive winter weather which allowed the hay market to stay steady. We still need more moisture in our state to continue to help with the drought conditions and wheat pastures. Thus far, according to the Mesonet for most of the state is experiencing abnormally dry conditions or worse. In the Oklahoma Panhandle the drought conditions are exceptional, Western Oklahoma is in extreme drought, Central Oklahoma has moved into more a in an extreme drought, and Eastern part of Oklahoma is in a severe drought. Looking into the future, on the 6-to-10-day we may receive some more moisture in the near future.

*** The next report release will be March 4th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-4-22**

**Receipts:** 3,692 **Last Reported:** 2,237 **Year Ago:** 1,574

Compared to last report: Due to the lack of moisture even with the winter weather storm it has allowed the hay market to increase in the amount of trades. Oklahoma is still in an abnormally dry or worse condition. We did receive some moisture but not enough to allow change in the drought conditions. The Oklahoma Mesonet shows just over half of the state in an extreme drought condition or worse and much of this being primarily in the western part of Oklahoma.

*** The next report release will be March 25th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-4-22**

**Receipts:** 3,692 **Last Reported:** 2,237 **Year Ago:** 1,574

Compared to last report: Due to the lack of moisture even with the winter weather storm it has allowed the hay market to increase in the amount of trades. Oklahoma is still in an abnormally dry or worse condition. We did receive some moisture but not enough to allow change in the drought conditions. The Oklahoma Mesonet shows just over half of the state in an extreme drought condition or worse and much of this being primarily in the western part of Oklahoma.

*** The next report release will be March 25th. ***

**OKLAHOMA HAY MARKET REPORT**
**2-18-22**
**Receipts:** 2,237 **Last Reported:** 2,401 **Year Ago:** 315

Compared to last report: We continued to receive winter weather which allowed the hay market to stay steady. We still need more moisture in our state to continue to help with the drought conditions and wheat pastures. Thus far, according to the Mesonet for most of the state is experiencing abnormally dry conditions or worse. In the Oklahoma Panhandle the drought conditions are exceptional, Western Oklahoma is in extreme drought, Central Oklahoma has moved into more a in an extreme drought, and Eastern part of Oklahoma is in a severe drought. Looking into the future, on the 6-to-10-day we may receive some more moisture in the near future.

*** The next report release will be March 4th. ***

**OKLAHOMA HAY MARKET REPORT**
**2-18-22**
**Receipts:** 2,237 **Last Reported:** 2,401 **Year Ago:** 315

Compared to last report: We continued to receive winter weather which allowed the hay market to stay steady. We still need more moisture in our state to continue to help with the drought conditions and wheat pastures. Thus far, according to the Mesonet for most of the state is experiencing abnormally dry conditions or worse. In the Oklahoma Panhandle the drought conditions are exceptional, Western Oklahoma is in extreme drought, Central Oklahoma has moved into more a in an extreme drought, and Eastern part of Oklahoma is in a severe drought. Looking into the future, on the 6-to-10-day we may receive some more moisture in the near future.

*** The next report release will be March 4th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-4-22**

**Receipts:** 3,692 **Last Reported:** 2,237 **Year Ago:** 1,574

Compared to last report: Due to the lack of moisture even with the winter weather storm it has allowed the hay market to increase in the amount of trades. Oklahoma is still in an abnormally dry or worse condition. We did receive some moisture but not enough to allow change in the drought conditions. The Oklahoma Mesonet shows just over half of the state in an extreme drought condition or worse and much of this being primarily in the western part of Oklahoma.

*** The next report release will be March 25th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-4-22**

**Receipts:** 3,692 **Last Reported:** 2,237 **Year Ago:** 1,574

Compared to last report: Due to the lack of moisture even with the winter weather storm it has allowed the hay market to increase in the amount of trades. Oklahoma is still in an abnormally dry or worse condition. We did receive some moisture but not enough to allow change in the drought conditions. The Oklahoma Mesonet shows just over half of the state in an extreme drought condition or worse and much of this being primarily in the western part of Oklahoma.

*** The next report release will be March 25th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-4-22**

**Receipts:** 3,692 **Last Reported:** 2,237 **Year Ago:** 1,574

Compared to last report: Due to the lack of moisture even with the winter weather storm it has allowed the hay market to increase in the amount of trades. Oklahoma is still in an abnormally dry or worse condition. We did receive some moisture but not enough to allow change in the drought conditions. The Oklahoma Mesonet shows just over half of the state in an extreme drought condition or worse and much of this being primarily in the western part of Oklahoma.

*** The next report release will be March 25th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-25-22**

**Receipts:** 4,429 **Last Reported:** 3,692 **Year Ago:** 0

Compared to last report: As we wrapped up the winter season hay has increased and has become more of a demand in parts of the state as hay is the only forage resource due to lack of moisture of any free -standing grass. In better news we have started in the spring season and we have been able to receive much needed moisture this past week. However, we still need much more moisture to go to pull us out of the drought. Central to central west is still in an extreme to exceptional drought. For the east part of the state is beginning to be in the moderate drought to none in the drought conditions. *** The next report release will be April 8th. ***

**OKLAHOMA HAY MARKET REPORT**
**3-25-22**

**Receipts:** 4,429 **Last Reported:** 3,692 **Year Ago:** 0

Compared to last report: As we wrapped up the winter season hay has increased and has become more of a demand in parts of the state as hay is the only forage resource due to lack of moisture of any free -standing grass. In better news we have started in the spring season and we have been able to receive much needed moisture this past week. However, we still need much more moisture to go to pull us out of the drought. Central to central west is still in an extreme to exceptional drought. For the east part of the state is beginning to be in the moderate drought to none in the drought conditions. *** The next report release will be April 8th. ***

# OKLAHOMA HAY MARKET REPORT

**4-8-22**

**Receipts:** 3,545 **Last Reported:** 4,429 **Year Ago:** 0

Compared to last report: We are lower in trades due to the transition period from winter hay into getting ready for spring cuttings. We still in need of much-needed rain to help our wheat and hay fields. Especially in Western Oklahoma for they are still in extreme into exceptional drought conditions. Drought conditions from Central Oklahoma toward Eastern Oklahoma ranging from severe to no drought at all.

*** The next report release will be April 22nd. ***

# OKLAHOMA HAY MARKET REPORT

**4-8-22**

**Receipts:** 3,545 **Last Reported:** 4,429 **Year Ago:** 0

Compared to last report: We are lower in trades due to the transition period from winter hay into getting ready for spring cuttings. We still in need of much-needed rain to help our wheat and hay fields. Especially in Western Oklahoma for they are still in extreme into exceptional drought conditions. Drought conditions from Central Oklahoma toward Eastern Oklahoma ranging from severe to no drought at all.

*** The next report release will be April 22nd. ***

# OKLAHOMA HAY MARKET REPORT

**4-22-22**

**Receipts:** 3,175 **Last Reported:** 3,545 **Year Ago:** 0

Compared to last report: We continue to see lower number of trades due to the transition period from winter hay to spring cuttings. Most produces are currently out of hay and are waiting for that much-needed rain to help our fill our ponds, crops to grow, and hay to produce. Especially in Western Oklahoma the extreme into exceptional drought conditions have increased. The drought conditions from Central Oklahoma toward Eastern Oklahoma ranging from severe to no drought at all.

*** The next report release will be May 6th. ***

# OKLAHOMA HAY MARKET REPORT

**4-22-22**

**Receipts**: 3,175 Last **Reported**: 3,545 **Year Ago**: 0

Compared to last report: We continue to see lower number of trades due to the transition period from winter hay to spring cuttings. Most produces are currently out of hay and are waiting for that much needed rain to help our fill our ponds, crops to grow, and hay to produce. Especially in Western Oklahoma the extreme into exceptional drought conditions have increased. The drought conditions from Central Oklahoma toward Eastern Oklahoma ranging from severe to no drought at all.

*** The next report release will be May 6th. ***

# OKLAHOMA HAY MARKET REPORT

**5-6-22**

**Receipts:** 1,765 **Last Reported:** 3,175 **Year Ago:** 0

Compared to last report: Moisture finally entered all across the State of Oklahoma. Which has provided much needed encouragement as we look more into the future. Looking into our present and future of our hay is that we are currently right in the middle of new hay beginning to get cut and old crop going out. We still are in of much needed moisture across the state to allow the hay to grow, which will cause more hay to be cut, and baled for the winter season. Oklahoma Mesonet Drought Monitor shows the northwest and southwest are in extreme to exceptional drought. Northcentral are in severe to extreme drought, central to southcentral are in abnormal to severe drought, and in eastern part of Oklahoma are in none to abnormal drought.

*** The next report release will be May 20th. ***

## Central

# OKLAHOMA HAY MARKET REPORT

**5-6-22**

**Receipts:** 1,765 **Last Reported:** 3,175 **Year Ago:** 0

Compared to last report: Moisture finally entered all across the State of Oklahoma. Which has provided much needed encouragement as we look more into the future. Looking into our present and future of our hay is that we are currently right in the middle of new hay beginning to get cut and old crop going out. We still are in of much needed moisture across the state to allow the hay to grow, which will cause more hay to be cut, and baled for the winter season. Oklahoma Mesonet Drought Monitor shows the northwest and southwest are in extreme to exceptional drought. Northcentral are in severe to extreme drought, central to southcentral are in abnormal to severe drought, and in eastern part of Oklahoma are in none to abnormal drought.

*** The next report release will be May 20th. ***

## OKLAHOMA HAY MARKET REPORT

**5-20-22**

**Receipts:** 3,361 **Last Reported:** 1,765 **Year Ago:** 0

Compared to the last report: Hay continues to sell off the old crop as they try to prepare for the new crop. The much-needed moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately has hindered parts of the east by receiving too much rain in a short amount of time. Due to the having so much rain it has slowed down production in the east. Positive note the rain has allowed the parts of central and eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in much-needed rain to help crops to grow from hay, wheat, and water to fill ponds for cattle. Western Oklahoma continues to be the extreme to exceptional drought conditions.

*** The next report release will be June 3rd. ***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

hayhotline@nmda.nmsu.edu.

## OKLAHOMA HAY MARKET REPORT

**5-20-22**

**Receipts:** 3,361 **Last Reported:** 1,765 **Year Ago:** 0

Compared to the last report: Hay continues to sell off the old crop as they try to prepare for the new crop. The much-needed moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately has hindered parts of the east by receiving too much rain in a short amount of time. Due to the having so much rain it has slowed down production in the east. Positive note the rain has allowed the parts of central and eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in much-needed rain to help crops to grow from hay, wheat, and water to fill ponds for cattle. Western Oklahoma continues to be the extreme to exceptional drought conditions.

*** The next report release will be June 3rd. ***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

hayhotline@nmda.nmsu.edu.

## OKLAHOMA HAY MARKET REPORT

**6-3-22**

**Receipts:** 2,810 **Last Reported:** 3,361 **Year Ago:** 0

Compared to the last report: The old crop has finally gone and the new crop is here. The same story moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately, it has also, slowed or stopped the wheat production and continues to hinder parts of the east by continuing to receive too much rain in a short amount of time. Due to the having so much rain it has also slowed or stopped production in the east. Positive note the rain has allowed most of the central and all of eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in need of rain to help release themselves out of the drought conditions which are still in extreme to exceptional drought conditions.

*** The next report release will be June 17th. ***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

## OKLAHOMA HAY MARKET REPORT

**6-3-22**

**Receipts:** 2,810 **Last Reported:** 3,361 **Year Ago:** 0

Compared to the last report: The old crop has finally gone and the new crop is here. The same story moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately, it has also, slowed or stopped the wheat production and continues to hinder parts of the east by continuing to receive too much rain in a short amount of time. Due to the having so much rain it has also slowed or stopped production in the east. Positive note the rain has allowed most of the central and all of eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in need of rain to help release themselves out of the drought conditions which are still in extreme to exceptional drought conditions.

*** The next report release will be June 17th. ***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

**OKLAHOMA HAY MARKET REPORT**

**6-17-22**

**Receipts:** 3,146 **Last Reported:** 2,810 **Year Ago:** 0

Compared to the last report: The hay trade is slow to steady. As we look at the market trend we still haven't fully begun to discover a true market trend for all types of hay. We are seeing that the rain has slowed down along with the sun to dry out the moisture. Which has allowed the farmers to start laying down and baling hay. The Oklahoma Mesonet Drought Monitor tells us that all of the central and eastern parts of Oklahoma are no longer in drought conditions. Most of the west is in moderate to abnormally dry conditions. Yet, there are still parts in the upper northwest and the Oklahoma panhandle with extreme to exceptional drought.

*** The next report release will be July 1st. ***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

hayhotline@nmda.nmsu.edu.

**OKLAHOMA HAY MARKET REPORT**

**6-17-22**

**Receipts:** 3,146 **Last Reported:** 2,810 **Year Ago:** 0

Compared to the last report: The hay trade is slow to steady. As we look at the market trend we still haven't fully begun to discover a true market trend for all types of hay. We are seeing that the rain has slowed down along with the sun to dry out the moisture. Which has allowed the farmers to start laying down and baling hay. The Oklahoma Mesonet Drought Monitor tells us that all of the central and eastern parts of Oklahoma are no longer in drought conditions. Most of the west is in moderate to abnormally dry conditions. Yet, there are still parts in the upper northwest and the Oklahoma panhandle with extreme to exceptional drought.

*** The next report release will be July 1st. ***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

hayhotline@nmda.nmsu.edu.

## OKLAHOMA HAY MARKET REPORT

**7-1-22**

**Receipts:** 12,650 **Last Reported:** 3,146 **Year Ago:** 0

Compared to the last report: Hay being traded is slow to steady in most of the state. The bales that are being traded are either large amounts at once or being contracted. Compared to trading loads at a time throughout the year as needed. As we look at prices still no true market trend for all types of hay. The number of hay bales being produced is less compared to last year's hay market. Parts of the state are needing moisture again to help with production to try and make up for the shortage along with the drought conditions. According to Oklahoma Mesonet Drought Monitor, our current condition in the western part of Oklahoma is in a moderate to extreme drought yet, Cimarron County is in exceptional drought. From central to eastern Oklahoma is in none to abnormally drought conditions.

*** The next report release will be July 15th***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

hayhotline@nmda.nmsu.edu.

## OKLAHOMA HAY MARKET REPORT

**7-1-22**

**Receipts:** 12,650 **Last Reported:** 3,146 **Year Ago:** 0

Compared to the last report: Hay being traded is slow to steady in most of the state. The bales that are being traded are either large amounts at once or being contracted. Compared to trading loads at a time throughout the year as needed. As we look at prices still no true market trend for all types of hay. The number of hay bales being produced is less compared to last year's hay market. Parts of the state are needing moisture again to help with production to try and make up for the shortage along with the drought conditions. According to Oklahoma Mesonet Drought Monitor, our current condition in the western part of Oklahoma is in a moderate to extreme drought yet, Cimarron County is in exceptional drought. From central to eastern Oklahoma is in none to abnormally drought conditions.

*** The next report release will be July 15th***

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:

hayhotline@nmda.nmsu.edu.

## Tulsa Livestock Auction
**7-19-22**

Receipts: 4,511 Last Reported: 2,651 Year Ago: 2,482
Compared to last week: Extreme heat along with no rain produced a higher-than-normal receipt total. However, a much lower undertone is noted on both steers and heifers. Demand good. Quality good thru attractive.

# OKLAHOMA HAY MARKET REPORT

## 7-15-22

**Receipts:** 6,813 **Last Reported:** 12,650 **Year Ago:** 0

Compared to the last report: Hay is being traded at a high rate across Oklahoma. The unknown of how long the hay trade will last due to the lack of rain. We need much-needed rain across the state to help with hay inventory to try and have an additional cutting. Along with trying to get in the last of the grass hay inventory. According to Oklahoma Mesonet Drought Monitor, our condition due to the flash drought most of the state is in some sort of abnormally dry condition. 62.75% are in moderate drought, 22.39% are in severe drought, and 2.87% are in extreme drought.

*** The next report release will be on July 29th ***

# OKLAHOMA HAY MARKET REPORT

**7-15-22**

**Receipts:** 6,813 **Last Reported:** 12,650 **Year Ago:** 0

Compared to the last report: Hay is being traded at a high rate across Oklahoma. The unknown of how long the hay trade will last due to the lack of rain. We need much-needed rain across the state to help with hay inventory to try and have an additional cutting. Along with trying to get in the last of the grass hay inventory. According to Oklahoma Mesonet Drought Monitor, our condition due to the flash drought most of the state is in some sort of abnormally dry condition. 62.75% are in moderate drought, 22.39% are in severe drought, and 2.87% are in extreme drought.

*** The next report release will be on July 29th ***

# OKLAHOMA HAY MARKET REPORT

**7-29-22**

**Receipts:** 4,409 **Last Reported:** 6,813 **Year Ago:** 0

Compared to the last report: Hay numbers are being traded slightly lower this week due to not having enough drivers to deliver hay, along with receiving some moisture in parts of the state. Unfortunately, the moisture we did receive was not enough to see a difference in the Oklahoma Mesonet Drought Monitor. Currently, the drought monitor shows 100% in Abnormally Dry, 99.91% in Moderate Drought, 92.11% in Severe Drought, and 37.45% in Extreme Drought.

*** The next report release will be on August 12th ***

# OKLAHOMA HAY MARKET REPORT

**7-29-22**

**Receipts:** 4,409 **Last Reported:** 6,813 **Year Ago:** 0

Compared to the last report: Hay numbers are being traded slightly lower this week due to not having enough drivers to deliver hay, along with receiving some moisture in parts of the state. Unfortunately, the moisture we did receive was not enough to see a difference in the Oklahoma Mesonet Drought Monitor. Currently, the drought monitor shows 100% in Abnormally Dry, 99.91% in Moderate Drought, 92.11% in Severe Drought, and 37.45% in Extreme Drought.

*** The next report release will be on August 12th ***

# OKLAHOMA HAY MARKET REPORT

**8-12-22**

**Receipts:** 2,842 **Last Reported:** 2,450 **Year Ago:** 0

Compared to the last report: The number of bales continues to decline. The drought is worsening and has taken effect on our hay producers. As hay fields are unable to grow due to the lack of moisture, most hay fields won't receive another cutting unless they were irrigated. Oklahoma Mesonet Drought Monitor shows 100% of Oklahoma is in some sort of drought, 99.33% are in a moderate drought, 92.45% severe droughts, 48.83% mainly all of Southern Oklahoma is in an extreme drought, 0.67% of the far southwest corner is in exceptional drought condition.

*** The next report release will be on August 26th ***

# OKLAHOMA HAY MARKET REPORT

**8-12-22**

**Receipts:** 2,842 **Last Reported:** 2,450 **Year Ago:** 0

Compared to the last report: The number of bales continues to decline. The drought is worsening and has taken effect on our hay producers. As hay fields are unable to grow due to the lack of moisture, most hay fields won't receive another cutting unless they were irrigated. Oklahoma Mesonet Drought Monitor shows 100% of Oklahoma is in some sort of drought, 99.33% are in a moderate drought, 92.45% severe droughts, 48.83% mainly all of Southern Oklahoma is in an extreme drought, 0.67% of the far southwest corner is in exceptional drought condition.

*** The next report release will be on August 26th ***

# OKLAHOMA HAY MARKET REPORT

**8-26-22**

**Receipts:** 7,556 **Last Reported:** 2,842 **Year Ago:** 0

Compared to the last report: Hay is getting tighter. Farmers and hay producers are beginning to get creative with baling up their milo, soybeans, and corn stalks. The rain did come across the parts of the state which brought cooler temperatures and which we might possibly receive a second cutting. Through the Oklahoma Mesonet, we are in the forecast of receiving some rain. The Drought Monitor shows that 99.98% are in abnormally dry conditions, 98.64% are in moderate drought conditions, 89.68% are in severe drought conditions, 48.60% are in extreme drought conditions, and 2.19% exceptional drought conditions.

*** The next report release will be on September 9th ***

# OKLAHOMA HAY MARKET REPORT

**8-26-22**

**Receipts:** 7,556 **Last Reported:** 2,842 **Year Ago:** 0

Compared to the last report: Hay is getting tighter. Farmers and hay producers are beginning to get creative with baling up their milo, soybeans, and corn stalks. The rain did come across the parts of the state which brought cooler temperatures and which we might possibly receive a second cutting. Through the Oklahoma Mesonet, we are in the forecast of receiving some rain. The Drought Monitor shows that 99.98% are in abnormally dry conditions, 98.64% are in moderate drought conditions, 89.68% are in severe drought conditions, 48.60% are in extreme drought conditions, and 2.19% exceptional drought conditions.

*** The next report release will be on September 9th ***

# OKLAHOMA HAY MARKET REPORT

**9-9-22**

**Receipts:** 1,645 **Last Reported:** 7,556 **Year Ago:** 0

Compared to the last report: Hay continues to get tighter. Supply is getting lower, demand is getting higher along with prices are beginning to change again, and we haven't even begun the fall season yet. The rain we did receive last week did help some, but it may have been too late to see another cutting of hay. For the drought according to the Oklahoma Mesonet exceptional drought is at 2.19 percent. Extreme drought is at 47.7 percent. Severe drought is at 84.8 percent. Moderate drought is at 96.5 percent. Abnormally dry is at 99.9 percent.

*** The next report release will be on September 23rd ***

## Oklahoma Direct Feeder Cattle Trade
**9-9-22**

Receipts: 1,456 Last Reported 1,357 Last Year 1,738
Compared to last week: Feeder steers not fully tested. Feeder heifers steady in a light comparable test. Demand good as feeder numbers remain limited. Rains across the state along with warm sunny days has pastures greening up nicely. Cooler temps expected over the weekend. Slaughter cattle sold steady for the week as Boxed Beef prices traded lower but on heavy movement.

# OKLAHOMA HAY MARKET REPORT

**9-9-22**

**Receipts:** 1,645 **Last Reported:** 7,556 **Year Ago:** 0

Compared to the last report: Hay continues to get tighter. Supply is getting lower, demand is getting higher along with prices are beginning to change again, and we haven't even begun the fall season yet. The rain we did receive last week did help some, but it may have been too late to see another cutting of hay. For the drought according to the Oklahoma Mesonet exceptional drought is at 2.19 percent. Extreme drought is at 47.7 percent. Severe drought is at 84.8 percent. Moderate drought is at 96.5 percent. Abnormally dry is at 99.9 percent.

*** The next report release will be on September 23rd ***

# OKLAHOMA HAY MARKET REPORT

**9-27-22**

**Receipts:** 2,804 **Last Reported:** 1,645 **Year Ago:** 0

Compared to the last report: As hay gets tighter and drought continues to worsen in our state, the farmers continue to bale up their crops to sell as hay. We are already seeing hay coming in from all parts of the country in hopes it will be enough to get through these tough times. For the drought according to the Oklahoma Mesonet exceptional drought is at 13.6 percent, Extreme drought is now at 53.9 percent, Severe drought has reached 89.2 percent, Moderate drought is at 98.9 percent, and Abnormally dry conditions are at 99.9 percent.

*** The next report release will be on October 14th ***

# OKLAHOMA HAY MARKET REPORT

**9-23-22**

**Receipts:** 2,804 **Last Reported:** 1,645 **Year Ago:** 0

Compared to the last report: As hay gets tighter and drought continues to worsen in our state, the farmers continue to bale up their crops to sell as hay. We are already seeing hay coming in from all parts of the country in hopes it will be enough to get through these tough times. For the drought according to the Oklahoma Mesonet exceptional drought is at 13.6 percent, Extreme drought is now at 53.9 percent, Severe drought has reached 89.2 percent, Moderate drought is at 98.9 percent, and Abnormally dry conditions are at 99.9 percent.

*** The next report release will be on October 14th ***

# OKLAHOMA HAY MARKET REPORT

**9-23-22**

**Receipts:** 2,804 **Last Reported:** 1,645 **Year Ago:** 0

Compared to the last report: As hay gets tighter and drought continues to worsen in our state, the farmers continue to bale up their crops to sell as hay. We are already seeing hay coming in from all parts of the country in hopes it will be enough to get through these tough times. For the drought according to the Oklahoma Mesonet exceptional drought is at 13.6 percent, Extreme drought is now at 53.9 percent, Severe drought has reached 89.2 percent, Moderate drought is at 98.9 percent, and Abnormally dry conditions are at 99.9 percent.

*** The next report release will be on October 14th ***

# OKLAHOMA HAY MARKET REPORT

**10-14-22**

**Receipts:** 4,815 **Last Reported:** 2,804 **Year Ago:** 565

Compared to the last report: Some would say this is the "perfect storm" for buyers and sellers of hay. From the supply and demand to the drought, and the cost to produce, or buy the hay. This is the perfect storm that we as agriculturalists are trying to find different ways to get through these times. Hay is continuing to move with some suppliers in the site of running out of hay already. As we look toward the future we do see some rainfall and cooler temperatures heading our way, unfortunately, it is too late for the hay producers. As we look at the Oklahoma Mesonet Drought Monitor we are at 29.1 percent in exceptional drought, 85.6 percent in an extreme drought, 99.6 percent in severe drought, we are 100 percent in moderate and abnormally dry conditions.

*** The next report release will be on October 28th ***

# OKLAHOMA HAY MARKET REPORT

**10-14-22**

**Receipts:** 4,815 **Last Reported:** 2,804 **Year Ago:** 565

Compared to the last report: Some would say this is the "perfect storm" for buyers and sellers of hay. From the supply and demand to the drought, and the cost to produce, or buy the hay. This is the perfect storm that we as agriculturalists are trying to find different ways to get through these times. Hay is continuing to move with some suppliers in the site of running out of hay already. As we look toward the future we do see some rainfall and cooler temperatures heading our way, unfortunately, it is too late for the hay producers. As we look at the Oklahoma Mesonet Drought Monitor we are at 29.1 percent in exceptional drought, 85.6 percent in an extreme drought, 99.6 percent in severe drought, we are 100 percent in moderate and abnormally dry conditions.

*** The next report release will be on October 28th ***

# OKLAHOMA HAY MARKET REPORT

**10-28-22**

**Receipts:** 2,570 **Last Reported:** 4,815 **Year Ago:** 565

Compared to the last report: Hay continues to stay steady while volume lowers. Due to the drought, we are beginning to see more hay coming into Oklahoma and being traded compared to trading our own Oklahoma crop hay. As we look at the Oklahoma Mesonet Drought Monitor we are at 21 percent in exceptional drought, 70.2 percent in an extreme drought, 99.8 percent in severe drought, we are 100 percent in moderate and abnormally dry conditions.

*** The next report release will be on November 11th ***

# OKLAHOMA HAY MARKET REPORT

**10-28-22**

**Receipts:** 2,570 **Last Reported:** 4,815 **Year Ago:** 565

Compared to the last report: Hay continues to stay steady while volume lowers. Due to the drought, we are beginning to see more hay coming into Oklahoma and being traded compared to trading our own Oklahoma crop hay. As we look at the Oklahoma Mesonet Drought Monitor we are at 21 percent in exceptional drought, 70.2 percent in an extreme drought, 99.8 percent in severe drought, we are 100 percent in moderate and abnormally dry conditions.

*** The next report release will be on November 11th ***

# OKLAHOMA HAY MARKET REPORT

## 11-11-22

**Receipts:** 1,540 **Last Reported:** 2,570 **Year Ago:** 2,762

Compared to the last report: Not much has changed hay volume continues to lower. As we look at the drought, we continue to see more hay coming into Oklahoma and being traded compared to trading our own Oklahoma hay crop. As we look at the Oklahoma Mesonet Drought Monitor we are at 22.3 percent in exceptional drought, 64.5 percent in an extreme drought, 88.7 percent in severe drought, 97.7 percent in moderate, and 100 percent in abnormally dry conditions.

# OKLAHOMA HAY MARKET REPORT

## 11-11-22

**Receipts:** 1,540 **Last Reported:** 2,570 **Year Ago:** 2,762

Compared to the last report: Not much has changed hay volume continues to lower. As we look at the drought, we continue to see more hay coming into Oklahoma and being traded compared to trading our own Oklahoma hay crop. As we look at the Oklahoma Mesonet Drought Monitor we are at 22.3 percent in exceptional drought, 64.5 percent in an extreme drought, 88.7 percent in severe drought, 97.7 percent in moderate, and 100 percent in abnormally dry conditions.

# OKLAHOMA HAY MARKET REPORT

## 11-11-22

**Receipts:** 1,540 **Last Reported:** 2,570 **Year Ago:** 2,762

Compared to the last report: Not much has changed hay volume continues to lower. As we look at the drought, we continue to see more hay coming into Oklahoma and being traded compared to trading our own Oklahoma hay crop. As we look at the Oklahoma Mesonet Drought Monitor we are at 22.3 percent in exceptional drought, 64.5 percent in an extreme drought, 88.7 percent in severe drought, 97.7 percent in moderate, and 100 percent in abnormally dry conditions.

# OKLAHOMA HAY MARKET REPORT

## 11-11-22

**Receipts:** 1,540 **Last Reported:** 2,570 **Year Ago:** 2,762

Compared to the last report: Not much has changed hay volume continues to lower. As we look at the drought, we continue to see more hay coming into Oklahoma and being traded compared to trading our own Oklahoma hay crop. As we look at the Oklahoma Mesonet Drought Monitor we are at 22.3 percent in exceptional drought, 64.5 percent in an extreme drought, 88.7 percent in severe drought, 97.7 percent in moderate, and 100 percent in abnormally dry conditions.

# OKLAHOMA HAY MARKET REPORT

**12-9-22**

**Receipts:** 1,958 **Last Reported:** 1,540 **Year Ago:** 0

Compared to the last report: Hay growers have started to focus on their longtime customers. Taking care of those long-time customers is causing buyers to rely on Emergency Assistance for Livestock, Honey Bees, and Farm-raised Fish or known as ELAP. The ELAP services have been allowing people to receive affordable delivery costs as they buy hay all across the country. Also, these services have allowed hay brokers to get affordable hay delivered for some customers that do not have those hay contacts. Prices do continue to rise along with the demand. Good news rain has moved across the State of Oklahoma which is preparing us for the 2023 harvest for all types of crops but, we all are still in some sort of drought. As we look at the Oklahoma Mesonet Drought Monitor we are at 19.88 percent in exceptional drought, 64.01 percent in an extreme drought, 85.98 percent in severe drought, 91.21 percent in moderate, and 99.97 percent in abnormally dry conditions.

*** The next report release will be on December 23rd ***

# OKLAHOMA HAY MARKET REPORT

**12-23-22**

**Receipts:** 1,330 **Last Reported:** 1,958 **Year Ago:** 0

Compared to the last report: The little hay that hay growers still have left is either contracted or going toward their long-lasting customers. While the producers are taking care of those long-time customers causing buyers to rely on Emergency Assistance for Livestock, Honey Bees, and Farm-raised Fish, or ELAP. The ELAP services have allowed people to receive affordable delivery costs as they buy hay all across the country. Also, these services have allowed hay brokers to get affordable hay delivered for some customers that do not have hay contacts. Prices do continue to rise along with the demand. As we look at the Oklahoma Mesonet Drought Monitor we are at 11.64 percent in exceptional drought, 57.35 percent in an extreme drought, 83.45 percent in severe drought, 90.18 percent in moderate, 98.45 percent in abnormally dry conditions, and 1.55 percent that has no drought conditions are located in Adair County.

*** The next report release will be on January 6th***

# OKLAHOMA HAY MARKET REPORT

**12-23-22**

**Receipts:** 1,330 **Last Reported:** 1,958 **Year Ago:** 0

Compared to the last report: The little hay that hay growers still have left is either contracted or going toward their long-lasting customers. While the producers are taking care of those long-time customers causing buyers to rely on Emergency Assistance for Livestock, Honey Bees, and Farm-raised Fish, or ELAP. The ELAP services have allowed people to receive affordable delivery costs as they buy hay all across the country. Also, these services have allowed hay brokers to get affordable hay delivered for some customers that do not have hay contacts. Prices do continue to rise along with the demand. As we look at the Oklahoma Mesonet Drought Monitor we are at 11.64 percent in exceptional drought, 57.35 percent in an extreme drought, 83.45 percent in severe drought, 90.18 percent in moderate, 98.45 percent in abnormally dry conditions, and 1.55 percent that has no drought conditions are located in Adair County.

*** The next report release will be on January 6th***
