OKLAHOMA HAY MARKET REPORT

12-23-22

Receipts: 1,330 **Last Reported:** 1,958 **Year Ago:** 0

Compared to the last report: The little hay that hay growers still have left is either contracted or going toward their long-lasting customers. While the producers are taking care of those long-time customers causing buyers to rely on Emergency Assistance for Livestock, Honey Bees, and Farm-raised Fish, or ELAP. The ELAP services have allowed people to receive affordable delivery costs as they buy hay all across the country. Also, these services have allowed hay brokers to get affordable hay delivered for some customers that do not have hay contacts. Prices do continue to rise along with the demand. As we look at the Oklahoma Mesonet Drought Monitor we are at 11.64 percent in exceptional drought, 57.35 percent in an extreme drought, 83.45 percent in severe drought, 90.18 percent in moderate, 98.45 percent in abnormally dry conditions, and 1.55 percent that has no drought conditions are located in Adair County.

OKLAHOMA HAY MARKET REPORT

1-20-23

Receipts: 1,890 **Last Reported:** 1,130 **Year Ago:** 3,274

Compared to the last report: The hay trade continues to be imported into Oklahoma from other states. As the hay producers look toward the future, their top priority right now is rain. The rain will bring ease to everyone as it helps their crops, water for their ponds, and fields to graze for the future. As we look at the Oklahoma Mesonet Drought Monitor we are at 11.77 percent in exceptional drought, 57.90 percent in an extreme drought, 81.01 percent in severe drought, 89.12 percent in moderate, 97.96 percent in abnormally dry conditions, and 2.04 percent that has no drought conditions are located in Adair and Sequoyah County.

*** The next report release will be on February 3rd***

OKLAHOMA HAY MARKET REPORT

1-20-23

Receipts: 1,890 **Last Reported:** 1,130 **Year Ago:** 3,274

Compared to the last report: The hay trade continues to be imported into Oklahoma from other states. As the hay producers look toward the future, their top priority right now is rain. The rain will bring ease to everyone as it helps their crops, water for their ponds, and fields to graze for the future. As we look at the Oklahoma Mesonet Drought Monitor we are at 11.77 percent in exceptional drought, 57.90 percent in an extreme drought, 81.01 percent in severe drought, 89.12 percent in moderate, 97.96 percent in abnormally dry conditions, and 2.04 percent that has no drought conditions are located in Adair and Sequoyah County.

OKLAHOMA HAY MARKET REPORT

2-17-23

Receipts: 2,410 **Last Reported:** 2,955 **Year Ago:** 2,237

Compared to the last report: Hay is steady. Oklahoma starts to see more hay barns empty due to it being harder to find hay, along with hay being harder to afford. The continued moisture that falls across the state is helping the outlook for hay and grain crops. Hay for the future is still undetermined, as Oklahoma still needs more rain on the west side of the state, along with the prices of fertilizer and fuel. Oklahoma Mesonet Drought Monitor we are at 8.07 percent in exceptional drought, 36.58 percent in an extreme drought, 66.94 percent in severe drought, 80.07 percent in moderate, 85.03 percent in abnormally dry conditions, and 14.97 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

2-17-23

Receipts: 2,410 **Last Reported:** 2,955 **Year Ago:** 2,237

Compared to the last report: Hay is steady. Oklahoma starts to see more hay barns empty due to it being harder to find hay, along with hay being harder to afford. The continued moisture that falls across the state is helping the outlook for hay and grain crops. Hay for the future is still undetermined, as Oklahoma still needs more rain on the west side of the state, along with the prices of fertilizer and fuel. Oklahoma Mesonet Drought Monitor we are at 8.07 percent in exceptional drought, 36.58 percent in an extreme drought, 66.94 percent in severe drought, 80.07 percent in moderate, 85.03 percent in abnormally dry conditions, and 14.97 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

3-3-23

Receipts: 3,075 **Last Reported:** 2,410 **Year Ago:** 3,692

Compared to the last report: Hay remains steady. Oklahoma is beginning to see last year's crop being traded as producers try to make it to spring. Hay prices rise once more as the supply goes down, yet hay demand continues. We did see some rainfall across the state but most fell in the eastern part of Oklahoma. As we look at the Oklahoma Mesonet Drought Monitor we are currently at 8.86 percent in exceptional drought, 36.64 percent in an extreme drought, 53.52 percent in severe drought, 66.88 percent in moderate, 77.15 percent in abnormally dry conditions, 22.85 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

3-3-23

Receipts: 3,075 **Last Reported:** 2,410 **Year Ago:** 3,692

Compared to the last report: Hay remains steady. Oklahoma is beginning to see last year's crop being traded as producers try to make it to spring. Hay prices rise once more as the supply goes down, yet hay demand continues. We did see some rainfall across the state but most fell in the eastern part of Oklahoma. As we look at the Oklahoma Mesonet Drought Monitor we are currently at 8.86 percent in exceptional drought, 36.64 percent in an extreme drought, 53.52 percent in severe drought, 66.88 percent in moderate, 77.15 percent in abnormally dry conditions, 22.85 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

3-17-23

Receipts: 1.705 **Last Reported:** 3,075 **Year Ago:** 0

Compared to the Last Report: Hay is getting tighter. The supply of hay continues to get lower. Over the past two weeks, the hay trade remains steady. Oklahoma continues to see last year's crop being sold as they try and finish out this winter. Oklahoma did receive some moisture, but not enough to change the drought monitor. As we look at the Oklahoma Mesonet Drought Monitor we are at 8.86 percent in exceptional drought, 36.64 percent in an extreme drought, 50.58 percent in severe drought, 59.07 percent in moderate, 65.61 percent in abnormally dry conditions, 34.39 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

4-14-23

Receipts: 815 **Last Reported:** 860 **Year Ago:** 0

Compared to the last report: The hay trade is "hurry up and wait." Hurry to get the fields ready yet we wait for rain, especially in the western part of the state. The demand for hay is high across Oklahoma. As producers prep for the new hay crop season they continue to try and determined what the price of hay will be. Oklahoma has had very little rain, and what rain we have received is not enough to help the grass grow for ranchers to graze on or not enough to start bailing. As we look at the Oklahoma Mesonet Drought Monitor we are at 16.53 percent in exceptional drought, 39.00 percent in an extreme drought, 48.59 percent in severe drought, 53.68 percent in moderate, 59.71 percent in abnormally dry conditions, 40.29 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

4-14-23

Receipts: 815 **Last Reported:** 860 **Year Ago:** 0

Compared to the last report: The hay trade is "hurry up and wait." Hurry to get the fields ready yet we wait for rain, especially in the western part of the state. The demand for hay is high across Oklahoma. As producers prep for the new hay crop season they continue to try and determined what the price of hay will be. Oklahoma has had very little rain, and what rain we have received is not enough to help the grass grow for ranchers to graze on or not enough to start bailing. As we look at the Oklahoma Mesonet Drought Monitor we are at 16.53 percent in exceptional drought, 39.00 percent in an extreme drought, 48.59 percent in severe drought, 53.68 percent in moderate, 59.71 percent in abnormally dry conditions, 40.29 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

4-28-23

Receipts: 136 **Last Reported:** 815 **Year Ago:** 0

Compared to the last report: Hay trade is slow with moderate demand. The western part of Oklahoma did receive much-needed moisture. New crop hay has been put on hold due to the rain across Oklahoma. The pricing of hay is still undetermined because of the unknown number of bales that need to be cut to determine the cost of harvest. The Oklahoma Mesonet Drought Monitor shows we are at 20.62 percent in exceptional drought, 43.19 percent in an extreme drought, 49.87 percent in severe drought, 54.07 percent in moderate, 64.52 percent in abnormally dry conditions, 35.48 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

4-28-23

Receipts: 136 **Last Reported:** 815 **Year Ago:** 0

Compared to the last report: Hay trade is slow with moderate demand. The western part of Oklahoma did receive much-needed moisture. New crop hay has been put on hold due to the rain across Oklahoma. The pricing of hay is still undetermined because of the unknown number of bales that need to be cut to determine the cost of harvest. The Oklahoma Mesonet Drought Monitor shows we are at 20.62 percent in exceptional drought, 43.19 percent in an extreme drought, 49.87 percent in severe drought, 54.07 percent in moderate, 64.52 percent in abnormally dry conditions, 35.48 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

5-12-23

Receipts: 1640 **Last Reported:** 136 **Year Ago:** 0

Compared to the last report: Hay trade is slow with good demand. Drought is no help when it comes to crops in Oklahoma. Most of the wheat crop will become wheat hay this year. South of I-44 rain has helped their fields grow but has not allowed them to start cutting and bailing hay yet. Oklahoma as a whole is half a cutting behind schedule. Still, no price trends are available at this time. The Oklahoma Mesonet Drought Monitor shows we are at 10.09 percent in exceptional drought, 33.10 percent in an extreme drought, 48.07 percent in severe drought, 52.47 percent in moderate, 60.81 percent in abnormally dry conditions, 39.19 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

5-12-23

Receipts: 1640 **Last Reported:** 136 **Year Ago:** 0

Compared to the last report: Hay trade is slow with good demand. Drought is no help when it comes to crops in Oklahoma. Most of the wheat crop will become wheat hay this year. South of I-44 rain has helped their fields grow but has not allowed them to start cutting and bailing hay yet. Oklahoma as a whole is half a cutting behind schedule. Still, no price trends are available at this time. The Oklahoma Mesonet Drought Monitor shows we are at 10.09 percent in exceptional drought, 33.10 percent in an extreme drought, 48.07 percent in severe drought, 52.47 percent in moderate, 60.81 percent in abnormally dry conditions, 39.19 percent that has no drought conditions.

*** The next report release will be on May 26***

OKLAHOMA HAY MARKET REPORT

5-26-23

Receipts: 550 **Last Reported:** 1640 **Year Ago:** 0

Compared to the last report: Hay trade is slow with good demand. Oklahoma as a whole is cutting behind schedule. We have received some much-needed rainfall across the State of Oklahoma. With those rains, some parts of the state are unable to bale hay due to the moisture. Still, no price trends are available at this time. The Oklahoma Mesonet Drought Monitor shows we are at 5.68 percent in exceptional drought, 25.09 percent in an extreme drought, 43.18 percent in severe drought, 50.44 percent in moderate, 60.14 percent in abnormally dry conditions, 39.86 percent that has no drought conditions.

*** The next report release will be on June 10th***

OKLAHOMA HAY MARKET REPORT

5-26-23

Receipts: 550 **Last Reported:** 1640 **Year Ago:** 0

Compared to the last report: Hay trade is slow with good demand. Oklahoma as a whole is cutting behind schedule. We have received some much-needed rainfall across the State of Oklahoma. With those rains, some parts of the state are unable to bale hay due to the moisture. Still, no price trends are available at this time. The Oklahoma Mesonet Drought Monitor shows we are at 5.68 percent in exceptional drought, 25.09 percent in an extreme drought, 43.18 percent in severe drought, 50.44 percent in moderate, 60.14 percent in abnormally dry conditions, 39.86 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

6-9-23

Receipts: 1,445 **Last Reported:** 550 **Year Ago:** 0

Compared to the last report: Hay trade is slow with good demand. Oklahoma is still behind schedule. We keep receiving rainfall in the western part of the state, with the number of rains they have received has helped move them closer out of the drought. Due to rain chances and the amount of rain they have been unable to bale hay due to the moisture. While the west keeps getting rain the eastern part of the state needs widespread showers as they begin to see the drought easing back into their fields. Still, no price trends are available, as farmers and ranchers want to see what the weather continues to do, and want to restock inventory from last year's drought. The Oklahoma Mesonet Drought Monitor shows we are at 1.45 percent in exceptional drought, 9.00 percent in an extreme drought, 35.72 percent in severe drought, 50.56 percent in moderate, 64.59 percent in abnormally dry conditions, 35.41 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

6-9-23

Receipts: 1,445 **Last Reported:** 550 **Year Ago:** 0

Compared to the last report: Hay trade is slow with good demand. Oklahoma is still behind schedule. We keep receiving rainfall in the western part of the state, with the number of rains they have received has helped move them closer out of the drought. Due to rain chances and the amount of rain they have been unable to bale hay due to the moisture. While the west keeps getting rain the eastern part of the state needs widespread showers as they begin to see the drought easing back into their fields. Still, no price trends are available, as farmers and ranchers want to see what the weather continues to do, and want to restock inventory from last year's drought. The Oklahoma Mesonet Drought Monitor shows we are at 1.45 percent in exceptional drought, 9.00 percent in an extreme drought, 35.72 percent in severe drought, 50.56 percent in moderate, 64.59 percent in abnormally dry conditions, 35.41 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

6-23-23

Receipts: 2,025 **Last Reported:** 1,445 **Year Ago:** 0

Compared to the last report: Hay trade is slow with limited demand. We still have not been able to find our footing when it comes to pricing. Oklahoma is still trying to catch up with getting hay cut or out of the field. Due to the rainfall, they keep having to put off time in the field along with wheat harvest. We still have producers trying to restock their inventory from last year's drought. We continue to receive rainfall across the state, but it has mainly been in western Oklahoma. While we do need rain in western Oklahoma, the north-central and eastern part of Oklahoma is beginning to need widespread showers as drought beings to move in over those areas. The Oklahoma Mesonet Drought Monitor shows we are at 0.52 percent in exceptional drought, 4.79 percent in an extreme drought, 16.59 percent in severe drought, 41.91 percent in moderate, 73.21 percent in abnormally dry conditions, 26.79 percent that has no drought conditions.

*** The next report release will be on July 7***

OKLAHOMA HAY MARKET REPORT

6-23-23

Receipts: 2,025 **Last Reported:** 1,445 **Year Ago:** 0

Compared to the last report: Hay trade is slow with limited demand. We still have not been able to find our footing when it comes to pricing. Oklahoma is still trying to catch up with getting hay cut or out of the field. Due to the rainfall, they keep having to put off time in the field along with wheat harvest. We still have producers trying to restock their inventory from last year's drought. We continue to receive rainfall across the state, but it has mainly been in western Oklahoma. While we do need rain in western Oklahoma, the north-central and eastern part of Oklahoma is beginning to need widespread showers as drought beings to move in over those areas. The Oklahoma Mesonet Drought Monitor shows we are at 0.52 percent in exceptional drought, 4.79 percent in an extreme drought, 16.59 percent in severe drought, 41.91 percent in moderate, 73.21 percent in abnormally dry conditions, 26.79 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT
7-7-23

Receipts: 9,205 **Last Reported:** 2,025 **Year Ago:** 0

Compared to the last report: Hay trade is slow with limited demand. Hay is slowly beginning to move but, we continue to receive rainfall across Oklahoma. With the rain, many are having trouble putting up their second or third cutting of hay. As most ranchers and farmers continue to try and restock their hay inventory the hay trade will continue to be slow. The Oklahoma Mesonet Drought Monitor shows we are at 0.52 percent in exceptional drought, 4.79 percent in an extreme drought, 14.26 percent in severe drought, 35.88 percent in moderate, 73.77 percent in abnormally dry conditions, 26.23 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT
7-7-23

Receipts: 9,205 **Last Reported:** 2,025 **Year Ago:** 0

Compared to the last report: Hay trade is slow with limited demand. Hay is slowly beginning to move but, we continue to receive rainfall across Oklahoma. With the rain, many are having trouble putting up their second or third cutting of hay. As most ranchers and farmers continue to try and restock their hay inventory the hay trade will continue to be slow. The Oklahoma Mesonet Drought Monitor shows we are at 0.52 percent in exceptional drought, 4.79 percent in an extreme drought, 14.26 percent in severe drought, 35.88 percent in moderate, 73.77 percent in abnormally dry conditions, 26.23 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT
7-7-23

Receipts: 9,205 **Last Reported:** 2,025 **Year Ago:** 0

Compared to the last report: Hay trade is slow with limited demand. Hay is slowly beginning to move but, we continue to receive rainfall across Oklahoma. With the rain, many are having trouble putting up their second or third cutting of hay. As most ranchers and farmers continue to try and restock their hay inventory the hay trade will continue to be slow. The Oklahoma Mesonet Drought Monitor shows we are at 0.52 percent in exceptional drought, 4.79 percent in an extreme drought, 14.26 percent in severe drought, 35.88 percent in moderate, 73.77 percent in abnormally dry conditions, 26.23 percent that has no drought conditions.

OKLAHOMA HAY MARKET REPORT

10-27-23

Receipts: 3,406 **Last Reported:** 4,437 **Year Ago:** 2,570

Compared to the last report: Hay trade is slow. With the widespread rain over Oklahoma and the cold weather to follow, we have seen our last cutting of hay for the year. We have larger inventory of hay compared to the past two years, which is the cause of slow trades. Most of the hay producer trades are from clients they have had over the years.

Trends:

Alfalfa Large squares $180-$200 a ton

Alfalfa Rounds - No Trend

Grinding hay - No Trend

Bermuda 5x6 rounds - $70-$100 a bale

Bermuda Large Squares - No Trend

Grass Hay 4x5-4x6 - $60-$70 a bale

We have larger inventory of hay compared to the past two years, which is the cause of slow trades. Most of the hay producer trades are from clients they have had over the years.

Trends:
