Feeder cattle and calf prices came back strong after the long holiday break. Feedlots were ready to get back in the markets and calf buyers, looking at short prospects for feeder cattle supplies later this year, competed for supplies. The only negative numbers were boxed beef cutout values which pressured fed cattle prices. Higher futures markets supported forward contracts of feeder cattle.

Feeder cattle and calf prices came back strong after the long holiday break. Feedlots were ready to get back in the markets and calf buyers, looking at short prospects for feeder cattle supplies later this year, competed for supplies. The only negative numbers were boxed beef cutout values which pressured fed cattle prices. Higher futures markets supported forward contracts of feeder cattle.

**OKLAHOMA HAY REPORT
(01-20-12)**

Hay trade continued mostly slow this week. Movement mostly moderate. Demand remains good to very good for dairy quality hay, moderate to good for other offerings. Hay offerings from northern states have increased over the past week as relatively mild weather has resulted in lighter than expected feeding and prompted more hay to be offered. The lack of appreciable moisture over the past couple of weeks is a concern for wheat pastures but grazing remains mostly good at this time.

Alfalfa Central Oklahoma:

Prices steady to firm. Premium quality large square bales delivered 280.00-330.00, mostly 300.00. Good quality square and round bales delivered 260.00-280.00. Fair quality round bales 225.00-250.00. Most hay sold based on RFV at 1.00 to 1.10 per point plus delivery. Horse hay in small square bales 320.00-360.00.

Scattered rains were seen across Oklahoma during January. Rains have supplied much needed moisture for small grain grazing, which helped slow the feeding of hay. While the scattered rains have helped small grains, farm ponds and lakes have seen little relief from the drought. Some ranchers continued to haul water to livestock. Topsoil moisture conditions improved slightly with 53 percent rated adequate or surplus and 47 percent rated short to very short. Subsoil moisture conditions were rated mostly short to very short, though 27 percent of the state was rated as adequate—**Oklahoma Ag Statistics Service.**

Compared to last week: Feeder steers and heifers steady to 2.00 higher. Demand good but numbers somewhat lighter. Rains moved across the state early in the week with up to 3 inches falling in Southeastern Oklahoma. Central and Western Oklahoma saw up to an inch with some remote areas receiving slightly more. The winter has remained unusually warm but we are just mid-season as most of our really cold stuff usually doesn't hit until February.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.

**OKLAHOMA HAY REPORT
(02-09-12)**

Hay trade and movement slow. Demand light to moderate with little interest noted for anything other than Supreme and Premium quality alfalfa. Mild weather and scattered rainfall over the past few weeks have improved wheat pastures and resulted in growth from winter grasses. The result has been lighter than expected supplemental feeding and better than expected winter forage availability. Over the past two weeks more sellers are offering grass hay in central and eastern counties.

Alfalfa Central Oklahoma:

Eastern Oklahoma: Prices mostly steady. Premium quality large square bales not tested. Small square bales 10.00 to 14.00 per bale.

**OKLAHOMA HAY REPORT
(02-23-12)**

Hay trade and movement slow. Alfalfa demand spotty and mostly light, instances moderate to good for dairy hay. Demand for grass hay generally light with few inquiries noted over the past several weeks. Mild weather and warm temperatures have helped wheat pasture and winter forage development. OSU Extension reports wheat development is in high gear and about half the wheat varieties on test were at or past the first hollow stem stage as of Monday. They report that if this holds true for the rest of the state, March 15 could be two weeks late to pull cattle off wheat pasture. The test plots examined this week were in Payne County. Southern counties could be further ahead in development.

Alfalfa Central Oklahoma:

Prices weak to 10.00 lower. Premium quality large square bales delivered 270.00-300.00. Good quality square and round bales delivered 250.00-270.00. Fair quality round bales 225.00-250.00. Most hay sold based on RFV at 1.00 to 1.10 per point plus delivery.

Eastern Oklahoma: Prices mostly steady. Premium quality large square bales not tested. Small square bales 10.00 to 14.00 per bale.

Western Oklahoma: Premium quality large square bales at edge of field 280.00-295.00. Square and round bales, Good quality at edge of field 225.00-235.00 mostly 235.00. Grinding hay at edge of field 200.00-210.00.

Grass Hay Central Oklahoma:

Prices steady. Large round bales of good quality Bermuda 100.00-130.00 per bale on 5 X 6 bales. Large round bales good quality native grass 80.00-90.00, few to 100.00 per bale. Fair quality 60.00-80.00 per bale. Small square bales good quality Prairie hay 7.00-8.00 per bale out of the barn.

Western Oklahoma: No sales confirmed.

Eastern Oklahoma: Prices steady to 10.00 lower. Good quality Bermuda \$100.00-130.00 by the bale (5X6), Prairie hay in large round bales 80.00-90.00 per bale. Fair quality 70.00-80.00 per bale.

Prices are dollars per ton and FOB unless otherwise noted.

Compared to last week: Feeder steers sold 2.00-5.00 higher. Feeder heifers for current delivery not tested. Demand very good for both current as well as forward contracts. February's moisture has been decent thus wheat pasture in pretty good shape. High feeder prices continue to encourage farmers and ranchers to sell.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.

Wheat was rated mostly in good condition this past week, with 91 percent rated fair to excellent. However, the conditions varied across the state. Wheat in the panhandle, already stressed from the ongoing drought, was further damaged by the high winds. Most of the state's wheat crop is in good condition, but with the caveat that more rain is needed to continue normal development. Temperatures were warm mid-week with highs above 80 degrees in multiple locations. Overall temperatures averaged in the 50s, with average highs mostly in the high 60s. Topsoil moisture conditions worsened over the past week and were rated mostly short to adequate. Subsoil moisture conditions were also rated lower this week. Sixty eight percent was rated short to very short, up from 61 percent the week prior. --Oklahoma Agricultural Statistics Service.

OKLAHOMA HAY REPORT
(03-01-12)

Trade activity very light for both alfalfa and grass hay. Movement slow to moderate. Grass hay offerings have increased dramatically over the past few weeks. Wheat and winter grasses continue to show very good growth and cattle are being moved from wheat over much of the state. The unseasonably warm weather has meant early green-up over much of southern and central Oklahoma severely cutting back on supplemental feeding requirements. Most dairies seem to have immediate needs well covered and showed little interest this week. Ponds and lakes are still extremely low and a great deal of run-off rain is needed to fill these for to meet livestock needs as well as the needs of many state municipalities.

Alfalfa Central Oklahoma:

Prices steady in light test. Premium quality large square bales delivered 270.00-300.00. Good quality square and round bales delivered 250.00-270.00. Fair quality round bales 225.00-250.00, some grassier offerings 200.00. Most hay sold based on RFV at 1.00 to 1.10 per point plus delivery.

Eastern Oklahoma: Prices mostly steady. Premium quality large square bales not tested. Small square bales 10.00 to 14.00 per bale.

Western Oklahoma: Premium quality large square bales at edge of field 280.00-295.00. Square and round bales, Good quality at edge of field 225.00-235.00. Grinding hay at edge of field 200.00-210.00.

Grass Hay Central Oklahoma:

Prices 10.00-20.00 lower in light test. Large round bales of good quality Bermuda 90.00-110.00 per bale on 5 X 6 bales. Large round bales good quality native grass 70.00-80.00. Fair quality 60.00-80.00 per bale. Small square bales good quality Prairie hay 7.00-8.00 per bale out of the barn.

Western Oklahoma: Several loads corn stalks delivered 125.00.

Eastern Oklahoma: 10.00-20.00 lower. Good quality Bermuda \$80.00-110.00 by the bale (5X6), Prairie hay in large round bales 70.00-90.00 per bale. Fair quality 60.00-70.00 per bale.

Prices are dollars per ton and FOB unless otherwise noted.

The week began with warm and windy weather, but rainfall the second half of the week cooled down temperatures. Every Mesonet station had measurable rainfall for the past week, and precipitation averaged 1.34 inches for the state. High temperatures averaged in the 60s for the week. Oklahoma City tied the record warm minimum temperature for March 8th, at 61 degrees on Wednesday morning, then temperatures dropped for the remainder of the week. The percentage of wheat and rye rated good to excellent improved marginally, and more improvement is expected from the rainfall. The moisture not only benefited small grains already in the ground, but also improved the seedbeds being prepared for spring planting. Topsoil moisture conditions improved significantly-Oklahoma Agricultural Statistics Service.

Demand moderate to good for feeder cattle, very good for stockers and calves. Rains of 1-4 inches last week pretty common from Central Oklahoma and West. Parts of Eastern Oklahoma saw up to 9 inches. Last week's rain was enough to take central Oklahoma and east out of drought status. Sunny, warm weather that followed has drastically improved grass pastures and this leading to the increased demand in light weight or thin fleshed cattle. New crop calves beginning to show up at livestock markets and these are frequently selling 10.00-20.00 lower than weaned calves. Boxed beef cutout values continued to slide this week and may have contributed to lower and slower fed cattle markets.

**OKLAHOMA HAY REPORT
(03-22-12)**

Hay and movement light on light to moderate demand. Demand somewhat improved over last week but actual sales hard to find. Low milk prices have served to greatly reduce dairy hay demand. Heavy rains fell across much of the state this week with the exception of the panhandle counties which remain dry. Some flood damage was noted in central and eastern counties with some alfalfa fields quite flooded and erosion problems reported. Alfalfa weevil problems have been reported statewide for the past two weeks.

OKLAHOMA DIRECT FEEDER CATTLE SALES

(03/16/12-03/23/12)

Confirmed: 820 Last Week: 6557 Last Year: 7474

Compared to last week: Not enough current delivery feeder cattle to establish an accurate trend, but a lower undertone noted. Temperatures during March were the warmest on record for Oklahoma. While this provided exceptional forage and wheat growth, it also invited lots of insect activity for hay and wheat growers to deal with. March was also marked by exceptionally good demand for grazing cattle but this appeared to come to a halt at the first sale of April in Oklahoma City where most grass accounts were reported full and demand let off dramatically. Fed cattle trade also struggled this week with prices at least 1.00 lower in moderate trade. More rain fell across parts of the state at the close and this will continue to aid forage production.

OKLAHOMA HAY REPORT
(03-29-12)

Hay trade very slow. Demand light to moderate for limited offerings, most originating out of state. Last week's rainfall and current warm weather accelerating growth of pastures, alfalfa and wheat. Alfalfa growers continue fighting weevils and aphids. Some fields showing insect damage in cases where chemicals weren't applied in time. First cutting alfalfa should begin within the next week or two and both buyers and sellers very anxious about the new crop in terms of quantity and especially quality. Wheat and rye hay also expected to begin baling soon.

Alfalfa Central Oklahoma:

Prices steady. Premium quality large square bales delivered 270.00-300.00, instance last week 315.00-325.00. Good quality square and round bales delivered 220.00-250.00. Fair quality round bales 225.00-250.00, some grassier offerings 200.00. Most hay sold based on RFV at 1.00 to 1.15 per point plus delivery.

Eastern Oklahoma: Good quality round bales 200.00-225.00 ton in light test. Premium quality large square bales not tested. Small square bales 12.00 to 14.00 per bale.

Western Oklahoma: Prices steady. Premium quality large square bales at edge of field 280.00-295.00. Square and round bales, Good quality at edge of field 225.00-235.00. Grinding hay at edge of field 200.00-210.00.

The Oklahoma Agricultural Statistics Service estimated this week that over 40 percent of the wheat crop and almost 75 percent of the rye crop were heading out. Virtually all of the canola crop is blooming and corn planting is running ahead of normal. Rains and mild temperatures have pushed crop progress ahead of normal statewide.

Rains and the Easter holiday helped reduce receipts at state auction markets this week. Prices under pressure from lower beef and fed cattle prices as well as a bearish futures market. Beef demand was softer but grilling season may see this pick up soon.

Previously purchased or contracted hay about the only movement reported. A small amount of alfalfa and wheat hay was cut this week but no sales were confirmed. Weevil damage moderate to fairly heavy in many areas.

OKLAHOMA DIRECT FEEDER CATTLE SALES

(03/30/12-04/06/12)

Confirmed: 3566 Last Week: 3406 Last Year: 6977

Compared to last week: Feeder steers 3.00-5.00 lower. No trend available for current heifers due to lack of comparable sales but a lower undertone noted. Continued deteriorating margins in beef prices finally has a ripple effect throughout the industry and triggers prices to shift lower.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.

Yearling cattle and stockers suitable for grazing found fairly good demand this week. Fed cattle prices did not change noticeably from the previous week but demand did increase slightly on higher boxed beef prices late.

Wheat markets under pressure this again this week as harvest approaches. Several reports were received this week of wheat being cut for hay in central Oklahoma.

(04-12-12)

Trade at a near standstill. Movement very light consisting of previously contracted dairy and grinding hay. Buyers and growers still negotiating new crop contracts. Hay stocks are extremely low-especially low for Premium and Supreme dairy quality hay. Demand is moderate to good for better quality alfalfa, wheat and grass hay. Cooler temperatures slowed growth and development this past week. A small amount of was put up last week but either got rained on or went to the barn. While cooler, damp conditions largely curtailed haying activities this week, a few areas are reporting very dry conditions and signs of drought stress in grass and wheat.

Alfalfa Central Oklahoma:

Fair quality round bales 225.00-250.00, some grassier offerings 200.00. Most hay sold based on RFV at 1.00 to 1.15 per point plus delivery.

Most of the week was clear with average highs in the low 70s. Small grains and canola continued to thrive amid spring temperatures and replenished soil moisture from the previous week's rain. Heading of wheat and rye was nearing completion, and over a third of the canola crop was reported as mature. Some wheat has been cut for hay, as have other forages and over a third of alfalfa acres. Planting of sorghum, soybeans and peanuts began, and corn emerged was ahead of normal. Most of northwestern Oklahoma was without significant rainfall last week and the average rainfall for the state was only 0.2 of an inch. The highest rainfall totals fell in central and eastern Oklahoma.--Oklahoma Agricultural Statistics Service.

Lower futures markets, higher proteins and a relatively flat boxed beef trade pressure feeder, calf and stocker markets this week. Demand was moderate at best for yearling cattle as well as the fleshier calves and stockers offered at most sale barns this week. In many cases the lower prices are directly related to quality and condition of most calf and stocker offerings.

Demand for cows remains good from both packers and replacement cow buyers.

**OKLAHOMA HAY REPORT
(04-26-12)**

Trade very slow and movement mostly light to moderate. Demand light to moderate for all offerings as the new crop market remains largely non-established. Buyers and sellers definitely at odds over pricing. A large portion of first cutting alfalfa going into producer's barns. Yields have been good with many growers reporting over one ton per acre on first cutting. Quality extremely variable largely due to maturity issues and rain damage. Increased offerings of oat and rye hay also reported this week. Old crop grass hay offerings continue to be quite heavy but demand for this hay is extremely light.

(5-07-12)

There were a few reports of wheat and canola being harvested over the weekend in southwestern Oklahoma. The extent of the damage to wheat from hail and high winds the past few weeks will be seen as the crop is harvested over the next month. Storms Monday continued from the past Sunday dumping an additional 3.67 inches at Blackwell in Kay County, giving them over 10 inches in two days. A few other storms throughout the week resulted in a statewide average precipitation of 0.74 inches. Although the rainfall the last two months has been close to or above normal, areas of western Oklahoma and the Panhandle have still not recovered adequate soil moisture to overcome the drought. **Oklahoma Ag Statistics Service**

**OKLAHOMA HAY REPORT
(05-03-12)**

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(04/28/12-05/04/12)**

Confirmed: 3776 Last Week: 4818 Last Year: 4653

Trade slow to moderate on light to moderate demand. Movement mostly light. Supreme and Premium quality alfalfa still not established as no sales of these offerings have been confirmed. Buyers and sellers are in disagreement over pricing ideas and most better quality offerings are going into producer's barns. Yields continue to be very good and producers are reporting exceptional regrowth for the second cutting. Grass hay baling activities turned extremely active this week and yields are generally very good. Overall quality of early offerings reported as very good. However, much like the alfalfa market, trading is very light at this time.

Compared to last week: Feeder steers and heifers 2.00-3.00 lower. Demand moderate. Cattle futures sharply higher late in the trading period. These prices may not reflect the sharp increase. Weather remains warm and humid with some showers popping up across the state.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.

A good deal of rain damaged and over-mature alfalfa was offered last week and early this week. Old crop grass hay offerings also fairly heavy but buyers are showing little interest in these.

An early wheat harvest was progressing mid-week, but rain over the weekend stopped the combines in southwestern Oklahoma. An early canola harvest was also underway. Even more canola has been swathed and will be harvested soon. Overall, canola and small grains are rated in good condition. Wheat in the Panhandle is still in need of additional rain to maintain expected yields as drought conditions are still rated as severe to extreme in that area. Goodwell, in the Panhandle, received 0.86 of an inch of rain last week, although the average for the Panhandle was 0.21 of an inch. Most of the precipitation fell across the southern half of the state. **Oklahoma Ag Statistics Service**

**OKLAHOMA HAY REPORT
(05-10-12)**

Trade and movement very slow. Demand light. No sales of Supreme or Premium quality alfalfa confirmed as supplies are very light and sellers put what little they had in barns. Both buyers and sellers are still trying to establish a market but can't agree on pricing. Many growers are wrapping up first cutting of alfalfa and a few will likely begin second cutting next week if weather allows. First cutting of grass hay still underway with both quality and yields ranging from average to very good. Offerings of old crop grass hay have tapered off dramatically as demand for this hay is nil. Parts of the state are becoming very dry and pastures and meadows are beginning to stress. The Oklahoma Agricultural Statistics Service released its May 1 Hay Stocks report today. According to the report, Oklahoma's total hay stocks as of May 1, were 500,000 tons, down 58 percent from last year.

Alfalfa Central Oklahoma:

New Crop: Prices steady where tested. Premium and Supreme quality not tested. Good quality not tested. Fair quality 130.00-140.00 in the field. Rain damaged alfalfa 120.00-130.00.

Eastern Oklahoma: Prices steady where tested. New crop Good quality 140.00-160.00. Fair quality 130.00-140.00. Fair to Good quality small square bales mostly 8.00-10.00 per bale.

Western Oklahoma: Prices steady. New crop Good quality mostly 150.00-170.00. Grinding hay edge of field not established on new crop. Grinding hay delivered locally 220.00-225.00.

Grass Hay Central Oklahoma:

Prices steady to 10.00 lower. Fair to Good quality round bales mixed grass 4 X 5 and 4 X 6 40.00-50.00 per bale. Good quality round bales 80.00-100.00 per ton.

Eastern Oklahoma: Prices mostly steady, instances 10.00 lower. Fair to Good mixed grass hay 4 X 5 bales, 40.00-50.00 per bale and 80.00-100.00 per ton.

**OKLAHOMA HAY REPORT
(05-17-12)**

Trade and movement very slow. Demand light to moderate from all sources. Still no confirmed sales of Premium or Supreme quality alfalfa confirmed and sellers reporting little inquiry. Limited supplies and offerings of these top quality offerings playing a part in the limited trade. Second cutting is well underway and so far yields have been reported as average to slightly above average. Quality appears to be very good in most areas. In some portions of south central Oklahoma growers are facing simultaneous wheat harvest and second cutting of alfalfa. Southern counties received light to moderate rains early and this stopped harvest for a few days. Northern counties continue to show signs of moderate drought stress and hay meadows need rain. Grass hay baling activities remain very active but little trade reported. Some growers are opting to keep their hay and are looking to buy back cattle sold last year.

Alfalfa Central Oklahoma:

New Crop: Prices steady to weak in light test. Premium and Supreme quality not tested. Good quality 165.00-180.00. Fair quality 130.00-140.00 in the field. Small square bales horse and sheep hay 250.00. Fair to good quality square bales 8.00-10.00 per bale.

Alfalfa Eastern Oklahoma: Prices steady to weak. New crop Good quality 150.00-160.00. Fair quality 120.00-130.00. Fair to Good quality small square bales mostly 8.00-10.00 per bale, some horse hay to 12.00 per bale.

Western Oklahoma: Prices steady to 5.00 lower. New crop Good quality mostly 150.00-165.00. Grinding hay edge of field not established on new crop. Grinding hay delivered locally 210.00-220.00.

Grass Hay Central Oklahoma:

Prices steady. Fair to Good quality round bales mixed grass 4 X 5 and 4 X 6 40.00-50.00 per bale. Good quality 5 X 6 bales 60.00-65.00 per bale in light test.

Eastern Oklahoma: Prices steady to weak. Fair to Good mixed grass hay 4 X 5 bales, 40.00-50.00 per bale and 80.00-100.00 per ton. 5 X 6 bales 55.00-65.00, mostly 60.00.

**OKLAHOMA HAY REPORT
(05-24-12)**

Trade and movement very slow except slow to moderate in south central areas. Demand light from feedlots and dairies, light to moderate from horsemen and some beef producers. Second cutting wrapping up in central and southern Oklahoma, well under way in northern counties. Yields have been very good in southern counties that have received rains earlier this month. Some northern producers reporting lighter than expected yields. Overall quality of second cutting alfalfa very good although some fields received light rains after being cut. Drought stress continues a concern for the northern half of the state and this may be adding to producers resistance to lower bids in these areas. Feedlots demand for grinding hay and other offerings exceptionally light as the latest USDA Cattle on Feed report showed Oklahoma feedlots with 17 percent fewer cattle than a year ago and 8 percent fewer than last month. Grass hay baling activities slowed slightly this week but Bermuda grass will be ready for first cutting in the near future. Grass hay demand moderate to good locally.

Alfalfa Central Oklahoma:

New Crop: Prices steady to weak in light test. Premium quality large square bales 200.00-220.00. Good quality square and round bales 165.00-180.00. Fair quality 140.00-150.00, Utility quality 125.00-130.00. All prices in the field. Horse hay in square bales 8.00-10.00 per bale.

Alfalfa Eastern Oklahoma: Prices steady. New crop Good quality 150.00-160.00. Utility to Fair quality 120.00-130.00. Fair to Good quality small square bales mostly 8.00-10.00 per bale.

Western Oklahoma: Prices steady in extremely light test. New crop Good quality mostly 150.00-165.00. No sales of grinding hay reported.

Grass Hay Central Oklahoma: Prices steady. Fair to Good quality round bales mixed grass 4 X 5 and 4 X 6 40.00-50.00 per bale. Good quality 5 X 6 bales 60.00-65.00 per bale in light test.

Western Oklahoma: Prices steady in light test. Wheat and rye hay 4X5 bales 60.00-65.00 per ball in light test.

**OKLAHOMA HAY REPORT
(05-31-12)**

Trade slow under mostly light demand. Movement also slow with most previously contracted hay delivered. Second cutting alfalfa yields have varied but reports generally better than expected. Quality much improved in central Oklahoma, about the same as first cutting in northwestern areas. Rains halted haying and wheat harvest in certain areas this week. Many areas across the state have turned very dry and this is an increasing concern for both growers and buyers. A number of grass fires have been reported in southern and eastern counties. Quality and condition of hay offerings range from poor to very good and buyers are very selective toward both.

Alfalfa Central Oklahoma:

New Crop: Prices steady, instances 10.00 higher than last reported sales. Premium quality large square bales 200.00-220.00. Good quality square and round bales 175.00-190.00 in the field, 200.00 first cutting out of the barn. Fair quality 140.00-150.00, Utility quality 125.00-130.00. Horse hay in square bales 8.00-10.00, mostly 9.00 per bale.

Alfalfa Eastern Oklahoma: Prices mostly steady, instances 10.00 higher. New crop Good quality 160.00-175.00. Utility to Fair quality 120.00-140.00. Good quality small square bales 8.00-10.00 per bale.

Western Oklahoma: Very few recent trades for comparison. New crop Good quality 165.00-175.00, few sales 190.00. Grinding hay at edge of field 170.00-180.00. Fair and Utility 130.00-150.00.

Grass Hay Central Oklahoma:

Prices steady. Fair to Good quality round bales mixed grass 4 X 5 and 4 X 6 40.00-50.00 per bale. Good quality 5 X 6 bales 60.00-65.00 per bale in light test.

Western Oklahoma: Too little trade to establish. Few loads rye hay 80.00 per ton, delivered locally 95.00 per ton.

Eastern Oklahoma: Prices steady. Fair to Good mixed grass hay 4 X 5 bales, 40.00-50.00 per bale and 80.00-100.00 per ton. 5 X 6 bales 55.00-65.00, mostly 60.00.

Prices are dollars per ton and FOB unless otherwise noted.

**OKLAHOMA HAY REPORT
(06-07-12)**

Trade slow and movement light. More rains moved across the state this week slowing haying activities. Demand light to moderate and buyers continue to resist most current asking prices. As a result, much of the second cutting has gone to growers' barns. Wheat harvest still underway and should be wrapping up soon. Warm temperatures and high winds have taken a toll on pastures, hay meadows and crops in parts of the state. Western areas deemed the hardest hit. January through May temperatures were the warmest on record for the state with an average of 56.3 degrees. March through May averages also the warmest on record at 65.1 degrees, 6 degrees above normal.

Alfalfa Central Oklahoma:

New Crop: Prices steady to weak. Premium quality large square bales 200.00. Several loads horse hay 230.00. Planting was nearly complete for peanuts, while soybeans, sorghum and cotton finished for the week at or above 85 percent. The early wheat harvest allowed for double-cropping to progress ahead of normal. Over 60 percent of all row crops have emerged and conditions are rated favorably. All but three Mesonet stations recorded rainfall during the last week. The southern third of the state received the most rainfall, with a high of 3.71 inches at Wilburton. Parts of west central and northeastern Oklahoma received only a sprinkling. All but the Northeast district was still behind normal rainfall for the period since March 1st and more rainfall is needed to keep row crops on track. Topsoil and subsoil moisture conditions improved in part of the state but worsened in other areas. Fifty-four percent of topsoil and 34 percent of subsoil moisture was rated adequate. USDA .

**OKLAHOMA HAY REPORT
(06-14-12)**

Trade slow to moderate. Scattered rainfall this week didn't prevent second cutting from continuing in many areas and will likely wrap up within the next few days. Third cutting beginning for some producers. Demand light to moderate but interest and inquiry much improved over recent weeks. Demand from dairies remained very light with only few sales confirmed. Warm, windy weather has dried out pastures and meadows over much of the state even with the light, scattered rains received. Growers are skeptical about second cutting of grass hay in most areas. Reports of dry conditions worsening in surrounding states a concern to both buyers and sellers this week.

CATTLE ON FEED UP 2 PERCENT, PLACEMENTS UP 15 PERCENT

USDA released the June 1 cattle on feed report this week. Nationally, feedlots reported two percent more cattle on feed than last year and placements of cattle on feed in May increased 15% from last year. In Oklahoma the number of cattle on feed was down 10 % from last year but 8 percent above the previous month.

The news helped drive up grain futures sharply higher on Monday and cattle futures responded by falling sharply.

**OKLAHOMA HAY REPORT
(06-21-12)**

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(06/15/12-06/22/12)**

Alfalfa trade slow to moderate, grass hay trade moderate to fairly active in southern and central Oklahoma, slow to moderate in northwestern counties. Dry conditions remain a concern in many areas with some areas reporting drought conditions. Third cutting wrapped up this week and most dry-land producers aren't expecting a fourth cutting. Demand remains light from dairies and feedlots. The bulk of Premium and Supreme grading alfalfa is being held in firm hands by growers. Most alfalfa movement consisted of untested hay with quality speculated from Utility to Good. Grass hay yields from first cutting have been about average and overall quality average to above average. Most Bermuda growers do not believe they will be able to make a second cutting this year.

Confirmed: 4325 Last Week: 9384 Last Year: 8498

The drought continued to develop across the state under hot and dry conditions the past week. Over 61 percent of the state was in a moderate to extreme drought per the July 3rd Drought Monitor. Little to no rain fell in western and central Oklahoma, with a few isolated areas of heavier rainfall in eastern Oklahoma and the Panhandle: All crops suffered from the developing drought, though dryland crops fared worse with the lack of precipitation the past few weeks. Livestock conditions declined somewhat, as the heat took its toll on the animals, as well as the available pasture and stock ponds. Grasses were burning up and hay production was limited. Topsoil moisture conditions were rated mostly short to very short, with only six percent rated adequate. Subsoil moisture conditions were rated short to very short, with 14 percent rated adequate.--USDA.

Higher Grains Impacting Feeder and Calf Markets

Sharply higher grains--especially corn and soybeans--pressed cattle futures this week and cash markets followed by moving lower. Calf and feeder demand turned light to moderate where tested this week.

Demand was especially light for unweaned, new crop calves. Deteriorating grazing conditions and high temperatures negatively affecting demand for this class of calves.

Still some third cutting alfalfa being put up in spots. Grass hay baling continues active and both yields and quality have been good.

Prices are dollars per ton and FOB unless otherwise noted.

Compared to last week: Feeder steers and heifers not well tested but a sharply lower undertone noted. Hot, dry weather across much of the country has led to higher corn and lower feeder cattle. This has finally trickled down into the cash feeder market. Buyer and seller interest alike is light to moderate and taking the wait and see attitude with the markets this holiday shortened week.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.

Another week of hot and dry weather with a few localized showers did little to slow expanding drought conditions. Altus, Oklahoma recorded its 26 day over the century mark. The July 10th Drought Monitor showed 28 percent of the land in the state now categorized in severe drought compared with 11 percent the previous week, and the percentage of land moving into extreme drought increased by three points to 11 percent of the state. Despite the increasingly dry conditions, most crops were rated in fair to good condition, but continue to decline. In some parts of the state producers began to feed hay or were selling cattle early as pastures were grazed off. The North Central part of the state reported high grasshopper and tick levels.--USDA.

.Scattered storms brought some limited relief to areas in the North Central and Eastern parts of the state, but the rest of the state remained mostly dry. Crop condition ratings dropped faster this week with the intense heat than the previous week. Reports of pastures going dormant, stock water supplies drying up, and early cattle sales were common last week. A report of irrigation not being able to keep up in the Southwest, and another of weakening wells was also reported. Positive reports on early planted corn and milo prospects were received, however there was an increasing concern about the condition of double crops and anything planted late. Topsoil and subsoil moisture supplies dropped rapidly, with 62 percent of topsoil and 53 percent of subsoil being rated very short by week's end.--USDA.

Temperatures continued to soar across Oklahoma: this week. The heat continued to damage pasture land and combined with the lack of rain has further depleted livestock water sources. Row crop conditions continued to decline with only peanuts rated mostly good. Substantial rains fell in northwest and southeast Oklahoma this week. The Idabel Mesonet site measured 4.17 inches of rain. Close to half of the Mesonet stations received no rainfall this week and according to OCS there are three Oklahoma stations that have received no measurable rainfall for the month of July to date. The US Drought Monitor for July 24th showed half of the state in an extreme to exceptional drought. Most of Ellis County is rated with exceptional (D4) drought, the worst rating available...-USDA.

A few showers fell across the northern third of Oklahoma Saturday but most of the state was without precipitation. Records were set across the state as brutally hot temperatures were recorded last week. Oklahoma City recorded a high of 113 on Friday, tying the all-time maximum temperature for Oklahoma City. The high for the week was 115 degrees in Kingfisher, and highs averaged 100 degrees or more in all districts. The most recent Drought Monitor shows 71.6 percent of the state is in an extreme to exceptional drought, the worst since last November. Livestock producers were selling cattle, as the unabated heat dried up grasses and water sources. Crop conditions continued to decline. Ninety-eight percent of topsoil and subsoil moisture conditions were rated as short to very short. --USDA.

. A few showers fell throughout the week but only averaged three tenths of precipitation for the state. The southeastern quarter of the state received the most generous showers and Webbers Falls recorded 2.55 inches, according to Mesonet data. The deficit of rainfall continued to affect crop and livestock producers alike. Irrigation water is limited as are livestock water sources. Crop conditions continued to decline as did the condition of pastures and range. The August 7th Drought Monitor shows almost 97 percent in an extreme to exceptional drought. Soil moisture conditions improved slightly from the last week's rain, but 98 percent of topsoil and 97 percent of subsoil were rated as short to very short.. --USDA.

About half the state received at least one inch of rain this past week. Overall the rain was beneficial, but provided no significant improvements to conditions. In most areas there was no run-off to improve water availability for livestock, and hay supplies from the spring were already being used to supplement the lack of pasture. Producers continued culling herds and making difficult decisions in the face of the ongoing drought. Temperatures were significantly cooler than the previous week, with highs averaging from the upper 80s to the low 90s. Ninety-seven percent of topsoil was rated short to very short and subsoil moisture conditions worsened over the past week to 98 percent rated short to very short... --USDA.

Every Mesonet station recorded rainfall during the past week with a state average of 0.89 of an inch. Most of the precipitation fell over the weekend with the Northeast and Central districts receiving the most generous totals. The precipitation received was only a fraction of what is needed for drought relief, and has had little effect on the row crops in the ground. Recent rainfall did improve the outlook for small grain planting in some areas of the state. Seedbed preparation is far behind normal for all small grains and canola so far this year. Temperatures remained cooler than normal for August for the second week. Topsoil ratings showed some improvement moving from very short to short. Eight percent of topsoil and five percent of subsoil were rated adequate, up slightly from the previous week.--USDA Agricultural Statistics Service.

**OKLAHOMA HAY REPORT
(08-23-12)**

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(08/17/12-08/24/12)**

Alfalfa trade slow to moderate. Grass hay trade mostly moderate but turned fairly active late. Demand was moderate for alfalfa, good for grass hay. 100 percent of the state now classified as being in severe to exceptional drought with 48 percent in the latter category. Scattered rains over the weekend brought limited relief and more rain is forecast for the coming days. Producers are beginning to work wheat ground where possible in anticipation of moisture. Hay supplies have tightened in recent weeks and offerings of top quality grass hay have declined.

Areas of exceptional drought shifted slightly but the overall drought situation remains unchanged. Wheat growers are working ground and preparing for planting in much of western Oklahoma. More rainfall will be needed for wheat pasture.

Rainfall averages in most climate districts were less than half an inch. However, a few places in the West Central district received over an inch of rain, including Putnam, Butler and Fairview. Wheat planting began in very limited areas, while seedbed preparation was still significantly behind normal. A cold front moved through Oklahoma, although it did not bring rain for everyone, it significantly dropped temperatures. Oklahoma City had a record high temperature for September 7th of 105 degrees, and only two days later a record minimum temperature for September 9th at 50 degrees. Conditions of row crops and hay showed no significant improvements. Half of the corn and a quarter of the sorghum were harvested by the end of the week. Topsoil and subsoil moisture conditions fell again, rated mostly very short.--USDA Oklahoma Agricultural Statistics Service.

(08/31/12-09/07/12)**

Alfalfa and grass hay trade mostly slow. Demand for alfalfa light to moderate. Demand for grass hay lighter than recent weeks and mostly moderate. About 90 percent of the state remains in extreme or exceptional drought conditions. Some fourth cutting alfalfa reported in central Oklahoma this week. Wheat growers need additional rainfall but continue to prepared ground for planting. Some interest in pasture leases noted from out-of-state sources reported this week.

All Mesonet stations received measurable rainfall, with a statewide average of 0.81 of an inch. Moisture was well-received by producers preparing to plant small grains, but had limited effects on row crops. Wheat planting was slightly behind the five-year average by the end of the week. Harvest of corn and sorghum continued ahead of normal, while more than half of all sorghum, soybeans and cotton were rated in poor to very poor condition. A cold front brought showers and cooler temperatures that averaged from the mid 60s to low 70s. Topsoil moisture conditions improved, with 17 percent rated adequate, the most since the first week of July. Subsoil moisture conditions improved slightly, but 94 percent of the state was still rated short to very short. There were 5.5 days suitable for field work--USDA Oklahoma Agricultural Statistics Service.

**OKLAHOMA HAY REPORT
(09-13-12)**

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(09/07/12-09/14/12)**

Alfalfa trade slow but slightly more active than in past weeks. Grass hay trade and movement slow to moderate. Alfalfa demand was mostly light but several local spikes in demand and movement were noted this week. Demand from feedlots mostly light. Demand for grass hay remained moderate. Higher prices were confirmed on a small amount of Premium and Supreme quality alfalfa this week but it's unclear if this is a definite trend. Higher asking prices were met in several instances and no sales confirmed at the bottom of recent market quotes. Wheat planting is active in areas and the cold front and rain that moved into the state today should help fall grazing prospects.

Compared to last week: Feeder steers steady to 4.00 higher, most advance under 800 lbs. Feeder heifers steady to 2.00 lower. Demand improved for lighter weight feeder cattle. Rain showers have moved across the state again this week and many farmers are now ready to plant wheat. Temps have cooled and are expected to stay in the mid 80's thru the upcoming week. Back months of the live cattle contract have moved above 130.00 thus giving the feeder more opportunity to hedge.

Little to no rain fell across Oklahoma over the past week. Most of the Mesonet stations received no measurable rainfall, with a few showers in the northeast. Moisture from September 1st through the 23rd was below normal across the state, averaging 41 percent of normal precipitation during the crucial start to fall planting. Although the past week was very dry, moisture from showers the week before gave some producers the opportunity to plant wheat and canola. Some dusted in wheat while others are waiting for additional moisture before making planting decisions. The continuing drought meant no significant improvements to row crop conditions. Topsoil moisture conditions declined from the week prior, with 11 percent rated adequate. Subsoil moisture conditions declined slightly, with 96 percent of the state rated short to very short. --USDA OK Ag Statistics Service.

Multiple rain events over the past week were welcomed during the fall planting season. Rain continued to fall throughout the week, with generous totals accumulated in the central part of the state. The state averaged 1.72 inches for the week, and all but the North Central and Northeast districts averaged over an inch of rain. Even with the rain from the last week, rainfall totals for the last month are below normal for all but the Panhandle and West Central districts. Overall the drought is still ongoing and significant rain is needed to overcome the dry conditions. Some run-off was received in central and south central Oklahoma, but many livestock ponds are still in desperate need of run-off. The rainfall received was very beneficial for the ongoing small grain and canola planting, and will encourage more planting in the coming weeks. USDA OK AG Statistics.

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(09/21/12-09/28/12)**

Alfalfa trade slow to moderate. Grass hay trade moderate and slightly more active than last week. Demand for all hay offerings mostly moderate as buyers rejecting current asking prices in most cases. More rain fell in portions of the state as the week closed. Some late fourth cutting alfalfa was offered this week and more is expected next week. Drought conditions are worsening in many areas and water for livestock is becoming a problem for many producers. Wheat planting continues at a good pace and some acres have emerged.

**OKLAHOMA HAY REPORT
(10-04-12)**

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(09/28/12-10/05/12)**

All hay movement and trade mostly slow to moderate. Demand moderate from feedlots and dairies, very light from other sources. Grass hay demand light to moderate. Buyer resistance to most asking prices the deciding factor in limiting trade and movement. The last week of September brought widespread rainfall to the state improving prospects for fall wheat grazing. Surface water remains a problem and some cattlemen are forced to move or sell stock due to lack of water. A cold front is expected to move into the state over the next few days.

Storms travelled through Oklahoma Friday and Saturday bringing an inch of rain on average. Areas in central and eastern Oklahoma received very heavy rains, while much of western Oklahoma was without significant precipitation. Overall the rain was beneficial to wheat and other fall-planted crops, as well as for operators still waiting to plant small grains. An early freeze the previous week and overnight into the past Monday dropped temperatures to as low as 26 degrees. Freeze damage to struggling soybeans was reported. Harvest of row crops continued and was nearing completion for corn. Fifty-five percent of topsoil moisture was rated poor to very poor and two percent was rated surplus due to the heavy rains over the weekend. Subsoil moisture conditions were rated mostly short to very short, but 15 percent was rated adequate. Oklahoma Ag Statistics Service.

Three fourths of the canola crop had emerged and was rated 50 percent good and 44 percent fair. As planting of small grains continued, little moisture was available. Warm and windy conditions dried up moisture from the previous week. Wind gusts of 50 miles per hour or higher were recorded at Mesonet locations across north central Oklahoma on Thursday afternoon. The resulting dust storm blew away topsoil and closed I-35 for several hours. Almost no rain was recorded in Oklahoma this past week and precipitation for the period since September 1st was below normal in all districts. As of the October 18th Drought Monitor, two thirds of the state was still in an extreme or exceptional drought, with virtually all of the North Central district designated as exceptional, or D-4 drought. **OKLAHOMA HAY REPORT
(10-25-12)**

**OKLAHOMA DIRECT FEEDER CATTLE SALES
(10/19/12-10/26/12)**

Alfalfa movement remains light to moderate as dairies are largely out of the market in resistance to current asking prices. The bulk of this week's alfalfa trade went to beef operators. Grass hay movement mostly light as stockmen seem to have immediate needs covered. Cold weather is moving into the state and there are forecasts for hard freeze this weekend. Wheat planting is largely complete and rain is desperately needed for development and fall pasture. Grass hay sellers from out of state are actively soliciting buyers but no sales have been confirmed this week.

A very dry October ended and November began the same way. Only three out of 116 Mesonet sites recorded measurable rainfall for the week, and none recorded a quarter of an inch. According to OCS Mesonet, it has been as many as 52 days since parts of the state have seen a quarter of an inch of rain in one day. The drought persisted across the entire state, and resulted in the decline of small grain and canola conditions. Almost half of wheat was rated in fair condition, and another 30 percent was rated poor to very poor. After a freeze the week previous, this past week warmed up and new record highs were set in Oklahoma City and McAlester for November 2nd. The combination of warm and dry weather was taking a toll on grasses as well as the small grains planted early for winter pasture.--USDA Oklahoma Agricultural Statistics Service.

OKLAHOMA DIRECT FEEDER CATTLE SALES (11/02/12-11/09/12)

Confirmed: 3637 Last Week: 2321 Last Year: 5106

Compared to last week: Feeder steers and heifer sold steady to 2.00 lower, limited comparable sales of current feeder heifers as most receipts were for out-front contracts. High winds and continued lack of moisture has much of the wheat in poor condition, making stocking rates touch on graze out cattle. Supply this week included 100 percent over 600 lbs and 47 percent heifers.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.

Small grains and canola were rated in fair to poor condition with no significant moisture to aid development. Reports of fields not yet emerged or in declining condition were common. Wheat emergence was behind normal progress and only 14 percent of the crop was rated good to excellent. The continuing drought reduced the potential for small grain grazing. Livestock operators were also faced with dried up ponds, poor grasses and continued supplementation of feed. The Drought Monitor continued to show all of Oklahoma in a moderate to exceptional drought (D1- D4) and almost 72 percent of the state was in an extreme to exceptional drought (D3-D4), as of November 20th. Both topsoil and subsoil moisture conditions continued to be rated short to very short, declining further over the past week. There were 6.8 days suitable for fieldwork.-USDA NASS

Alfalfa movement very light over much of the state but light to moderate in central counties. Demand mostly light to moderate but slightly improved over recent weeks. Grass hay movement mostly moderate with demand improving after cold weather moved into the state. Conditions remain very dry and wheat pastures are deteriorating. Hay supplies much better than a year ago but some sellers are holding back offerings until after the first of the year.

Alfalfa Central Oklahoma:

Prices mostly steady. Premium to Supreme quality large squares bales 245.00-275.00, mostly 250.00-260.00. Good quality square and round bales 190.00-225.00. Utility to Fair quality 160.00-175.00. Wheat and alfalfa mix 115.00.

Alfalfa Eastern Oklahoma: Prices steady where tested. Fair quality delivered 210.00-220.00. No horse hay reported.

Western Oklahoma: Steady. Premium to Supreme quality untested. Fair quality including grassy alfalfa 190.00-220.00, mostly 200.00-210.00. Utility 175.00-185.00.

Grass Hay Central Oklahoma:

Prices steady. Fair to Good quality round bales mixed grass 4 X 5 40.00-65.00 per bale, mostly 40.00-50.00. Good quality 5 X 6 bales 60.00-75.00 per bale. Western Oklahoma: Steady. Mixed grass 4x5 bales 40.00-60.00 per bale. 5 X 6 bales Fair to Good Bermuda 60.00-70.00 per bale. Fair to Good prairie hay 5 X 6 bales 50.00-70.00 per bale. Coastal Bermuda delivered to panhandle 80.00 per bale. Good wheat hay 4 X 5 and 5 X 5 bales 50.00-65.00 per bale. Good wheat hay 5 X 6 bales 65.00-75.00 per bale. Straw hay 60.00-70.00 per ton loaded on truck. Good quality oat hay 150.00-165.00 per ton at edge of field. Few loads milo hay 115.00 delivered.

Prices per ton unless otherwise noted.

Compared to last week: Feeder steers and heifers sold 1.00 to 4.00 higher. Sharp advances on the CME board was the driving factor for the higher market, especially late in the week. Demand good to very good for the limited numbers of feeder cattle. Rain is in the forecast for this weekend and many producers are hoping it will be enough to relieve wheat pastures which are struggling.

Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 5-10 cent slide on calves and 3-6 cent slide on yearlings from base weights. Current sales up to 14 days for delivery.
