**OKLAHOMA HAY MARKET REPORT  
6-24-21**

**6-25-21**

No recent test for a comparison of trends, however a higher undertone is noted. Hay movement has been slow but is beginning to pick up. Weather has quickly turned hot and dry in parts of the state causing spring grasses to peter out. This dry weather has also stopped production of alfalfa, while other areas are waiting for dry weather to get hay out of the field. Demand for grinding hay is very good as grain prices remain high and users looking for a cheaper source of protein. Wheat hay has been limited this year as wheat prices trending higher making it somewhat more profitable to harvest the grain than in years past.

Receipts: 2,546 Last Reported 6,046 Last Year 5,725  
Compared to last week: Feeder steers 1.00-3.00 higher where tested. Feeder heifers mostly steady. Demand good for feeder cattle. Grains continue to trend lower, slowly pushing feeder futures higher. Slaughter cattle trade slow to develop this week, especially in the south and most trades were steady. Sales in the north, though light were higher
