# OKLAHOMA HAY MARKET REPORT

5-6-22

Receipts: 1,765 Last Reported: 3,175 Year Ago: 0

Compared to last report: Moisture finally entered all across the State of Oklahoma. Which has provided much needed encouragement as we look more into the future. Looking into our present and future of our hay is that we are currently right in the middle of new hay beginning to get cut and old crop going out. We still are in of much needed moisture across the state to allow the hay to grow, which will cause more hay to be cut, and baled for the winter season. Oklahoma Mesonet Drought Monitor shows the northwest and southwest are in extreme to exceptional drought. Northcentral are in severe to extreme drought, central to southcentral are in abnormal to severe drought, and in eastern part of Oklahoma are in none to abnormal drought.
