OKLAHOMA HAY MARKET REPORT

5-20-22

Receipts: 3,361 Last Reported: 1,765 Year Ago: 0

Compared to the last report: Hay continues to sell off the old crop as they try to prepare for the new crop. The much-needed moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately has hindered parts of the east by receiving too much rain in a short amount of time. Due to the having so much rain it has slowed down production in the east. Positive note the rain has allowed the parts of central and eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in much-needed rain to help crops to grow from hay, wheat, and water to fill ponds for cattle. Western Oklahoma continues to be the extreme to exceptional drought conditions.

*** The next report release will be June 3rd. ***

A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.
