OKLAHOMA HAY MARKET REPORT

6-3-22

Receipts: 2,810 Last Reported: 3,361 Year Ago: 0

Compared to the last report: The old crop has finally gone and the new crop is here. The same story moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately, it has also, slowed or stopped the wheat production and continues to hinder parts of the east by continuing to receive too much rain in a short amount of time. Due to the having so much rain it has also slowed or stopped production in the east. Positive note the rain has allowed most of the central and all of eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in need of rain to help release themselves out of the drought conditions which are still in extreme to exceptional drought conditions.

*** The next report release will be June 17th. ***

A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.
