# OKLAHOMA HAY MARKET REPORT

6-17-22

Receipts: 3,146 Last Reported: 2,810 Year Ago: 0

Compared to the last report: The hay trade is slow to steady. As we look at the market trend we still haven't fully begun to discover a true market trend for all types of hay. We are seeing that the rain has slowed down along with the sun to dry out the moisture. Which has allowed the farmers to start laying down and baling hay. The Oklahoma Mesonet Drought Monitor tells us that all of the central and eastern parts of Oklahoma are no longer in drought conditions. Most of the west is in moderate to abnormally dry conditions. Yet, there are still parts in the upper northwest and the Oklahoma panhandle with extreme to exceptional drought.

\*\*\* The next report release will be July 1st. \*\*\*

## Central

### Alfalfa: Premium/Supreme (Trade/Per Ton)

## Southeastern

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.
