# OKLAHOMA HAY MARKET REPORT

7-1-22

Receipts: 12,650 Last Reported: 3,146 Year Ago: 0

Compared to the last report: Hay being traded is slow to steady in most of the state. The bales that are being traded are either large amounts at once or being contracted. Compared to trading loads at a time throughout the year as needed. As we look at prices still no true market trend for all types of hay. The number of hay bales being produced is less compared to last year's hay market. Parts of the state are needing moisture again to help with production to try and make up for the shortage along with the drought conditions. According to Oklahoma Mesonet Drought Monitor, our current condition in the western part of Oklahoma is in a moderate to extreme drought yet, Cimarron County is in exceptional drought. From central to eastern Oklahoma is in none to abnormally drought conditions.

\*\*\* The next report release will be July 15th\*\*\*

## Central

### Alfalfa: Supreme (Trade/Per Ton)

Large Round	200	75.00	75.00	F.O.B/New Crop

## A Message from New Mexico's Department of Agriculture

New Mexico, like many states in the West and Midwest, is in a very intense drought situation. On top of that, we have had a very early and extremely damaging wildfire season, and it is only May. The fires have left many producers without summer pasture and many lost their supply of hay inventories. The challenge is to find sources of forage for these impacted producers. I know your state may be in the same situation.

New Mexico Department of Agriculture has created a hay and pasture contact page so landowners with available pasture and those with hay for sale may list what might be available. The goal is to establish a one-stop shop for the convenience of both New Mexico producers and those who have supplies.

I ask that you share this with your forage producers and associations who may have members with pastures available.

Information can be sent to:
