FY2024 Oklahoma Boll Weevil Eradication Organization - \$6,000.00

Food Services

Oklahoma State University Produce Safety Training Contract Approval --\$74,000

Outreach and education activities including teaching Produce Safety Alliance classes across the state, developing educational materials and videos, assisting farms with the On-Farm Readiness Review, measuring the effectiveness of these trainings to determine what topics need further training, and assisting ODAFF in identifying and outreach to farms that may need to comply with the law.

The Produce Safety Alliance class is the only class currently recognized by the FDA to satisfy the produce farm manager training portion of the produce safety rule. To teach this class, a team of certified trainers and a certified lead trainer is required, and OSU has several personnel certified to teach this class including the only lead trainer in the state. OSU currently assists us with teaching farms through the On-Farm Readiness Review. This program will provide an educational tool that can be taken to the individual farms and help them identify what areas they need to improve on to comply with the new law.

Win Wam computer software up keep for produce safety inspections \$5,400.00.

This computer program is used for completing FDA produce safety compliance inspections. This would be for updates and for software update fees. This would be paid for by the FDA Produce Grant.

Forestry Services

FY24 - \$10,000 Federal Funds

This request when approved will renew the Oklahoma Gardening Grant. This is a longstanding education and outreach grant sponsoring the popular Oklahoma Gardening program produced by OSU. This grant supports tree related educational programming. Without this purchase, we would lose an avenue of support and education. This purchase will be reimbursed through Federal funding.

FY24 - \$15,000 Federal Funds

Renew nonbinding contract with the Oklahoma Urban and Community Forestry Council to perform services to assist in implementation of the continuing education component of Oklahoma's Urban & Community Forestry program in accordance with federal grant program intent. Without this program outreach and education related to urban forest management and individual tree care would be limited. This purchase will be reimbursed through Federal funding.

FY24 - \$60,000 Federal Funds

Award Federal pass-through funding to communities for the Urban and Community Forestry Grants – Up to \$60,000. These grants support projects related to advancing local community forestry programs. Without these projects, we would lose an avenue of community support and education. This purchase will be reimbursed through Federal funding.

FY24 - \$230,000 Federal Funds

Award Federal pass-through funding up to \$230,000 to assist financially-challenged cities, neighborhoods, and communities for recovery of winter ice storm and cold damage. These grants support projects related to helping lower income neighborhoods and non-profit entities recover from the damage, mitigate existing risks and replace lost tree cover from recent winter storms. Without these projects, we would lose an avenue of community support and education. This purchase will be reimbursed through Federal funding.

FY24 - \$100,000 Federal Funds

Award Federal pass-through funding up to \$100,000 to assist financially-challenged cities, neighborhoods, and communities with heat mitigation, promotion of food forests, increase equitable access to urban/community tree canopy and to promote other value and benefits of trees in communities. These grants support projects related to helping lower income neighborhoods and, non-profits. Without these projects, we would lose an avenue of community support and education. This purchase will be reimbursed through Federal funding.

FY24 - \$101,760 Federal Funds

Award Federal pass-through funding up to \$101,760 for tree canopy assessment and inventory project in Oklahoma City metropolitan area to determine canopy loss from 2020 ice storm, develop a plan to assist with storm water management, flooding and other safety issues. This project will assist in identifying forest health and other safety concerns. Without this project, an opportunity to improve the overall condition of forest cover in central Oklahoma and to improve safety of Oklahoma citizens will be lost. This purchase will be reimbursed through Federal funding.

FY24- \$8,000 Wildland Firefighting Helmets

OFS is in need of purchasing new wildland firefighting helmets for our firefighters. One hundred fifteen (115) helmets will be purchased through FedMall. New helmets are essential PPE for our firefighters to ensure they are safe as they protect life and property while fighting wildfires across Oklahoma. The funds will be reimbursed through a federal grant.

FY24 - \$15,000

Aerial pesticide spray application to the seed production pine tree orchards at the Forest Tree Improvement Center at Idabel. Aerial pesticide spray will be applied to the cone crop in our genetically improved pine tree orchards. This will maximize the embryotic-material filled seed in the cones collected at the orchards by controlling cone worms and other seed insects. Aerial application of pesticide spray to the orchards will control these pests. Justification: Without this purchase, there will be a continued decline in the production of genetically-improved seed.

FY 24 Temporary Bridge Grant \$175,000 (purchase, cost-share, and pass-through)

Justification: Encourage the use of temporary bridges for stream crossings on timber harvesting and related forestry operations. This will help mitigate water quality impact by reducing erosion, sediment delivery, and stream bed disturbance. The use of temporary bridges will be encouraged by reducing the financial burden of purchasing temporary bridges by timber producing and harvesting entities through establishment of a bridge loaner program as well as a cost-share/pass-through program. Funding: All costs associated with the purchase and maintenance of the loaner bridges as well as the establishment of the cost-share/pass-through program will be reimbursed by the federal grant.

FY 24 - \$55,000

Purchase ESRI ArcGIS Online Licenses (Federal Grant) – Justification: This allows the OFS Incident Management Team and fire personnel to utilize Collector, giving our firefighters real-time wildland fire data exchange. Data collected from the Collector application gives firefighters an advantage on fighting fires, increases overall firefighter and public safety. This purchase also improves the State's wildland fire data which is necessary to receive federal National Fire Plan funding.

FY23 – Firefighting bulldozer, \$574,121 (Federal Funding–SFA Response)

Purchase two (2) Type 3, John Deere 650P bulldozers that will be used for state-wide wildfire response, suppression and mitigation activities. The horsepower and hydrostatic transmission of this type is well suited to the diverse wildland fuels and terrain present across all of Oklahoma. The size allows for easy transport on a truck with a dovetail bed enabling access to remote locations where fires occur. These dozers will be replacing a 2001 JD 650H (1649 hrs.) needing \$15,000 in repairs and a 2001 JD 450H (1400 hrs.) needing \$10,000 in repairs. Funding for this entire purchase will come the US Forest Service – FY21 SFA Response Grant (\$266,000) and FY22 SFA Response Grant (\$308,121) as part of an approved budget revision. (NOTE: This was submitted for approval at the April Board of Agriculture Meeting. There was an error on the Fiscal Year funding information which required the resubmission for approval)

Laboratory Services

FY23 - \$15,000.00 – PCR

Purchase of a molecular detection platform for the capabilities to test for Campylobacter and other pathogenic organisms in dairy.

FY23 - \$5700.00 – DI Water and Maintenance

Office of General Counsel

A request of \$8,000

To continue contract to perform services as a Hearing Officer/Administrative Law Judge (ALJ) in cases assigned, in accordance with signed agreement on file with the Oklahoma Department of Agriculture Food, and Forestry. The vendor will perform services at an hourly rate of \$125.00/hour.

FY24 - \$36,942.13 for GovQA 2024 contract.

Brief description of the proposed expense, cost, its necessity, and any deadlines for approval. GovQA is a new product that will allow OGC and the rest of the agency to more easily and efficiently fill open records requests. It will allow all records requests to be filled electronically and will allow large files to easily be transferred electronically. It is an online product. In addition, it will allow ODAFF to invoice the requester for very large requests and allow the agency to recoup some funds for filling the requests.

Contract renewal for OGC Westlaw and Clear online legal research system FY 2024 effective 7/1/2023-6/30/2024. Contract not to exceed \$30,000.

1. Brief description of the proposed expense, cost, its necessity, and any deadlines for approval.

Westlaw is a necessary legal research tool for the agency attorneys. It allows them to easily and quickly review federal, Oklahoma, and other states' case law and statutes to better serve the agency. CLEAR allows the Office of General Counsel and Investigative Services to search for addresses and other information regarding individuals for which we do not have good contact information.

2. Consequence(s) and cost (if any) if the proposed expense is not approved.

Without Westlaw, agency attorneys would be unable to efficiently research federal and state law, resulting in more time looking for information and less time actually completing projects and assisting the agency. Without CLEAR, Investigative Services would have a more difficult time investigating cases because of the time that would be spent searching for individuals. The Office of General Counsel would have a more difficult time finding individuals on enforcement matters.

Wildlife Services

\$ 20,000.00 - ODAFF Wildlife Services is requesting approval for the City of Norman Cooperative Agreement regarding the control of wildlife for the City.

\$106,500.00 - ODAFF Wildlife Services is requesting approval for fuel, maintenance and hangar rent for the two (2) Federal helicopters for FY24 that is used in the state's aerial control of wildlife. The breakdown is as follows:

- \$55,000 for fuel;
- \$4,800 hangar rent
- \$11,700 hangar rent
- \$35,000 maintenance

\$769,000.00 - ODAFF Wildlife Services is requesting approval for the cooperative agreement with USDA APHIS Wildlife Services which will provide damage management activities to farmers and ranchers in Oklahoma. Activities are related to damages incurred from feral swine, beavers, coyotes and avian predators. Not approving this agreement would mean significant financial loss to Oklahoma Agriculture due to wildlife damage.

\$68,000 - ODAFF Wildlife Services is requesting approval to purchase ten camera/panel trap systems to be utilized at feral swine trap locations, placed strategically across the state. These systems will allow for remote viewing of swine traps from any distance away. This will allow the wildlife specialist to also maintain bait levels at the traps without having to physically go and "check" the traps. The savings here in gas and mileage is significant. These systems will also allow the specialist to "drop" the door on swine traps when the trap has a significant number of pigs inside. A simple command to release the gate is functioned through an app or website. The specialist is alerted by text message that there are pigs in the trap, the live feed is turned on and if deemed necessary the door is remotely dropped.

Not approving of this purchase will mean we continue operating in a less efficient way. Currently, traps must be visited on a daily basis to see if pigs are caught or if more bait is required. This way of conducting trapping operations is a lot less efficient and costs the agency more dollars due to increased visits and mileage.

JULY 2023 BOARD REPORT
AGRICULTURE LABORATORY SERVICES
(May 2023 Activities)

QUALITY MANAGEMENT SECTION: (Daniel Tripp, QA Manager)

The QA Manager started the yearly internal audit for Oklahoma Bureau of Standards (OBS).

Progress has been made in the Food and Dairy Section with the autoclave validations. The Section has been working with adjusted cycle settings on the autoclave that has led to better sterilization results. This has allowed the Section and the QA Manager to plan out future autoclave validations that should yield better results going forward.

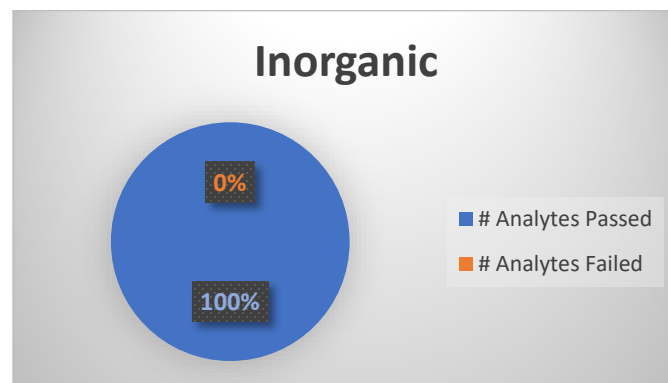

PT Results

The routine distribution of quality control samples to respective sections of the Laboratory continued. Collection and submission of data to the respective study groups for statistical analysis was conducted.

INORGANIC SECTION: (Elena Lyon, Environmental/Chemical Laboratory Scientist IV)

In May the Section completed 249 samples consisting of 1831 determinations, with the following breakdown:

DAIRY/FOOD SAFETY SECTION: (Sharon Swyear, Environmental/Chemical Laboratory Scientist IV)

The month of May was a typical testing month for the Section. There are a total of 67 dairies that the Section tests and six have closed this year.

There was a total of 48 meat samples this month. The Section has presumptive positive results for two E. coli, two Salmonella, and four Listeria from these samples and are currently in the confirmation process.

The new molecular detection system has been received and the Section is waiting on reagents to begin validating the unit. This new system will allow the Section to screen for Campylobacter instead of sending samples to an outside lab.

SEED SECTION: (Tori Gillispie, Agriculture Services Administrator I and Wade Krivanek, State Seed Program Administrator)

Testing remained normal for the month of May. Records indicate a total of 140 samples were received for testing. Crops being tested consisted primarily of summer crops including corn,

cotton, soybeans, summer grasses and sesame. There were no Seed Law violations discovered during the month.

The Section also successfully completed another proficiency test for seed identification through the Association of Official Seed Analysts with all species adequately identified by common name as well as scientific names

GENERAL CHEMISTRY SECTION: (Johnathan White, Environmental/Chemical Laboratory Scientist IV)

The Section hired a new grinder in May. The combustion analyzer which tests Protein in feeds and Nitrogen and Sulfur in fertilizers had a component failure which took a couple of weeks to diagnose, obtain parts and repair. Repairs were completed and the machine went back into service June 2nd. Ninety-eight percent of the samples are analyzed on this unit which brought the testing numbers down for the month, but will make up the sample backlog in June.

With the Combustion Analyzer being down the Section was able to focus on training. The Section made 403 determinations, completing 73 samples in May, these were samples which did not have protein or nitrogen testing requested.

The turnaround time was 18.87 days which exceeded the Sections 18 day target.

OKLAHOMA BUREAU OF STANDARDS: (William Krivanek, Metrologist I)

The following is a workload summary for the Oklahoma Bureau of Standards from May 1st through May 31st.

During May the Section maintained a fair amount of appointments, despite the Bureau's current situation regarding accreditation and recognition. Multiple appointments will be retained during the month of June as well. Clients who are unable to retain their appointments with the Bureau have continuously asked to be contacted when accreditation and recognition resume to an active status. The Section will be completing volume calibrations for the Oklahoma Corporation Commission for two full weeks in June, and is also experiencing a beneficial mixture of Mass III artifacts and Volume artifacts throughout various appointments. This creates a great training atmosphere. Richard Gonzales continues to train Termelia Hogg, Eli Klimek and William Krivanek at this time. Termelia Hogg and William Krivanek recently received approval to attend Fundamentals of Metrology training at NIST in August of 2023. This is great news, as the Bureau is making substantial progress in being able to return to a healthier workload in the future.

OKLAHOMA FORESTRY SERVICES BOARD REPORT

Division Activities from May 19, 2023 – July 6, 2023

Serving Oklahomans by conserving, enhancing, and protecting our forest and natural resources for present and future generations. Forestry Services' board report is formatted to reflect the priorities of the National Cohesive Wildland Fire Management Strategy, which include Resilient Landscapes, Fire Adapted communities, and Wildfire Response.

URBAN AND COMMUNITY FORESTRY PROGRAM HIGHLIGHTS

Tulsa City Parks Storm Damaged Trees

With Urban Forestry Coordinator Mark Bays as Incident Commander and Urban & Community Partnership Coordinator Riley Coy as Strike Team Leader, the Southern Group of State Foresters Urban Forestry Strike Team was deployed to Tulsa from June 27 through June 30, 2023. Eight team members from OFS were joined by three from the Arkansas Forestry Commission: two from the Virginia Department of Forestry, and one from Texas A&M Forest Service. Tulsa City & County Parks staff also joined the effort.

Fieldwork consisted of a damage assessment & inventory. This inventory will help Tulsa City and County Parks set priorities and meet reporting requirements for FEMA reimbursements needed to put the city's and county's parks back into full operation.

Proper Pruning Class

Mark Bays conducted a tree pruning class for the Garden Club at the All Souls Episcopal Church in Oklahoma City. There were 45 members in attendance and they learned the latest techniques for pruning both young and older trees.

Oklahoma City Survivor Tree

On May 30 Bays met with Memorial staff at the Survivor Tree and assisted with routine minor pruning of the tree. Certified Arborists from Professional Tree Care were also on-hand to climb into the tree and reduce the weight of larger branches throughout the tree.

Choctaw and Harrah

On June 20, Riley Coy presented to 30 people in Choctaw about common problems with Oklahoma Trees.

On June 22, Riley presented to the Harrah Rotary Club on the history of Oklahoma Forestry Services and the duties and operations of a forester within the agency.

Neighborhood Natural Woodlands Trail

On June 19th Mark Bays and Riley Coy met with developer David Yost in Stonemill Estates in Oklahoma City. They walked a community trail through a section of native Cross Timbers Forest and helped identify trees that posed an elevated risk of harming trail users. Large dead branches overhanging the trail and other risks were identified. Management objectives to maintain the health and condition of the woodland were also discussed.

COMMUNITY OUTREACH AND COMMUNICATIONS

FORESTRY EDUCATION

Forestry Education Highlights

The 65th Annual Oklahoma Forestry Youth Camp took place June 5-10 in Beavers Bend. 44 campers aged 13-15 spent the week with us and learned all about different aspects of forestry. We had learning sessions on ecology, forest management, fire, wildlife, urban forestry, invasive species, wood turning, and more! Everyone learned new skills, and several kids are looking forward to careers in forestry.

On June 21, Education Coordinator Tony Pascall went to 4-H Camp Lew Wentz in Ponca City to teach about dendrochronology and the life of a forest to over 40 campers.

COMMUNICATIONS

Southern Group of State Foresters Annual Meeting

Information Representative Keith Merckx was a Incident Management team member for the meeting. Among his key duties:

- Oversaw/completed all graphic design elements for the meeting including
 - o Meeting signage
 - o Printed materials including the full program
- Served as POC for sponsors to accommodate display needs and to ensure proper logo usage/placement
- Photographic documentation of the event

Healthy Trees, Healthy Lives

Merckx created a design for a custom bandana created using an HTHL grant. The bandana is an extra-large (27"x27"), USA-grown cotton model that is printed in the USA at a facility using solar power. Additionally, he worked to commission sustainably made wooden flash drives with engraved HTHL and OFS logos. Keith created graphics for a retractable banner to be used during visits at which printed OFS-branded HTHL brochures will be handed out that illustrate how Healthy Trees mean Healthy Lives.

SGSF Urban Forestry Strike Team Publicity

Keith organized publicity for the Urban Forestry Strike Team deployment to Tulsa resulting in widespread, favorable coverage for OFS and for Tulsa City Parks.

PROGRAM HIGHLIGHTS FROM THE EASTERN AREA OFFICES

NORTHEAST AREA

Forest Protection Highlights

From May 12st through June 30th, the Northeast Area had 3 fires for 83.4 acres in the protection area. Craig Longshore met with Camp Gruber officials to discuss the opportunity for an OFS engine academy. Cole Hix and Craig Longshore conducted interviews for the Park Hill Forest Ranger I position on June 29th. NE Area Rangers assisted with fuels reduction in the Tulsa area.

NE Area held a retirement party for Tim Reno. Tim worked for 36 years as a Forest Ranger at the Jay District.

Forest Management/Program Highlights

Evan Long assisted nine landowners regarding issues such as tree health, disease, and stewardship planning. Evan completed two Forest Stewardship plans, one in Cherokee County and one in Adair County. Evan assisted with the Southern Group of State Foresters Annual Meeting held in Oklahoma City. He is currently assisting with the Urban Forestry Strike Team to aid in the remediation of hazard trees within parks in the Tulsa Metropolitan area. Connie Robinson assisted 17 landowners with site visits or calls regarding various forestry issues. She completed one Forest Stewardship plan for a property in Creek County. She also assisted with placement of Emerald Ash Borer traps in the NE Area. Connie participated in the Southern Group of State Foresters Specialties, Utilization and Marketing Committee meeting in OKC.

EAST CENTRAL (EC) AREA

Forest Protection Highlights

Since the last board report date of May 12, 2023, EC has suppressed one fire that burned 1.0 acre. One primary structure at a value of \$280,000 and one secondary structure at a value of \$40,000 was saved.

Prescribed Fire

EC rangers completed one private landowner prescribed burn on 210 acres.

Forest Management Highlights

Five new forest stewardship plans were completed since last report on a total of 674 acres.

EC forester Tommy Frampton assisted forester Riley Coy with the Urban Forestry Strike Team tree damage assessment following the tornado that impacted parts of Tulsa.

Information / Education Highlights

EC foresters along w/ NE, SE, and HQ staff helped host the Southern Group State Forester's meeting in OKC June 11-17. The meeting went very well and all participants seemed very appreciative of the effort put forth by OFS on the planning and hosting of the meeting.

EC rangers, in cooperation with Choctaw Nation Forestry, conducted two fire prevention programs for local summer school. Approximately ten children were reached.

Personnel update

EC's recent ranger vacancy in the Quinton Unit was filled April 10. Brett Boland is OFS's newest Forest Ranger in EC Area.

EC Area will be conducting ranger interviews for the Adamson unit with hopes of finding a qualified applicant for the position. Aaron "Abe" Grey, Blanco unit Ranger, retired after 31 years of service to create our most recent ranger vacancy. OFS plans to announce the open vacancy soon.

Safety / Training Highlights

A new employee, Brett Boland, completed Basic Wildland Firefighter training in order to provide a presence on the fireline in support of wildfires and prescribed fire activities. These courses train new firefighters in basic wildland firefighting skills. Brett Boland and Traven Sumpter also attended a 3-day Heavy Equipment Operations class in Little Rock, AR to further support their learning and development in the operation of wildland fire bulldozers.

One forester and several EC rangers also attended S-212 Wildland Fire Chainsaws, S-290 Intermediate Wildland Fire Behavior, S-390 Introduction to Wildland Fire Behavior Calculations, and L-280 Followership to Leadership to continue to move forward in their roles with wildland fire and prescribed fire.

Ongoing Issues

One of the past issues regarding CDL training has been resolved by OFS becoming registered as a training provider for CDL Entry Level Driver Training (ELDT).

The ELDT requirement was implemented by the Federal Motor Carrier Safety Administration and sets the baseline for training requirements for entry-level drivers wishing to obtain their Class A or Class B CDL for the first time. Originally, the only option for new OFS employees was to attend a 5-week truck driving school at a cost of \$4,500-\$5,500. The cost, plus class availability, looked to be a big hurdle for OFS to clear but by becoming a registered training provider this should ease the burdens associated with hiring new rangers.

FIRE STAFF REPORT

Wildfire Activity & Outlook Executive Summary:

Wildfire activity remains below normal for the year so far with OFS resources responding to **274 wildfires burning 34,504 acres**. In stark contrast, OFS responded to 728 wildfire incidents that burned in excess of 168,000 acres during the same period in 2022 which was a bit more in line with normal expectations. Even with the lighter wildfire activity, there have been a handful of high-impact days such as March 31, 2023 when fires proved difficult to suppress and resulted in a number of structure losses and fire activity taxing local resources as they moved quickly across the landscape. Late spring rains quelled wildfire concern to large extent noting that summer heat and maturing grasses will support potential for wildfire activity later in July through the remainder of summer during periods where separation from rain eclipses 7-10 days.

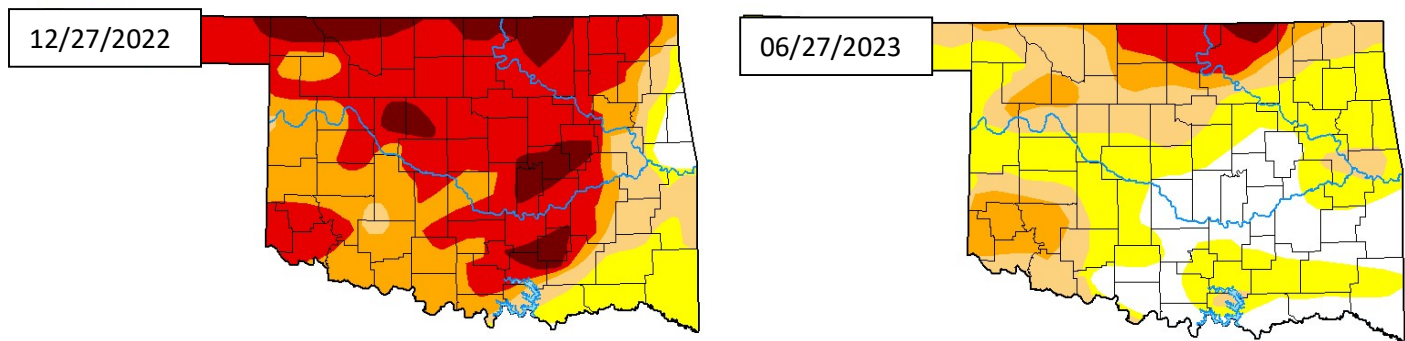

Prescribed fire activity was limited during much of the dormant season due to the short windows of opportunity in the southeast while prolonged drought in northern and western Oklahoma developed into a barrier for implementing burn plans. Nonetheless, OFS has completed **41 Rx Fires treating 7,536 acres** to date in 2023 with a number of burns either planned or in the process of plan development from implementation during the late growing season and fall.

The transition from La Nina to El Nino phase of the southern oscillation has developed rather rapidly. The tail end of June introduced well-above normal temperatures providing a spooky start to summer regarding heat although in the weeks preceding summer solstice, rainfall returned to the drought-impacted north and western counties. The expectation with El Nino summer in Oklahoma is hard to pin down as a warm/dry expectation in the northern United States and trending cooler/wetter conditions to our south occurs. So far, rain returning to the drought-stricken areas has prompted a flush of herbaceous growth. Currently, El Nino conditions are expected to persist through the summer and fall strengthening into winter. A recent strong El Nino cycle was experienced in during the '15/'16 dormant season when significant wildfire occurrence was realized (ex. Anderson Creek Fire/Woods County-367,000+ acres, Buffalo Fire/Harper County-18,000+ acres, 350 Complex/Woodward County-57,000+ acres and Pharoah Fire/Okfuskee County-24,000+ acres). A close monitor

of equatorial Pacific Ocean water temperature increasing above 2°C will serve as a bit of a benchmark, and one of the inputs utilized for gauging wildfire potential later this year and into 2024.

The initial stages of drought recovery are ongoing with much of the state returning to near normal rainfall while the Panhandle and some western counties have registered 150%+ normal rainfall in the past 60-days. Drought recovery is a challenging hurdle to overcome evidenced by some lake/reservoir levels struggling to overcome the deficit incurred over the last year or so. Hulah Lake and Copan Lake in Osage and Washington Counties respectively remain well below normal pool. One could look to Optima Lake in Texas County as well although that impoundment has never reached pool level since construction in the late-70's. Nonetheless, drought conditions continue to improve gradually.

EPA Region VI/States Fall Meeting

Ryan Williams, Megan Parker, Damardray Williams, and Kenny Naylor hosted the EPA Spring Meeting at ODAFF on May 16th & 17th. This meeting is an open discussion between EPA and the states in Region VI to discuss issues of concern. EPA discussed their program priorities and funding projections for this upcoming year.

State FIFRA Issues Research Evaluation Group (SFIREG)

Ryan Williams, CPS Assistant Director, represented Region 6 at the June 5th – 7th, 2023 SFIREG meeting in Jackson, TN.

The State Issues Research and Evaluation Group is a network of state officials interested in Federal/State “co-regulation” of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). It was established by the Association of American Pesticide Control Officials (AAPCO) with financial support from the U.S. Environmental Protection Agency (EPA). As part of its cooperative agreement with AAPCO, EPA is substantially involved in SFIREG.

SFIREG plays a valuable role in maintaining information exchange and cooperation between the states and EPA to enable states to play a meaningful role in the development of pesticide policies and regulations. SFIREG identifies issues, analyzes them, and provides oral and written comments to the Office of Pesticide Programs (OPP) in EPA’s Office of Prevention, Pesticide & Toxic Substances (OPPTS) on pesticide matters impacting the states in such areas as: registration, training and certification, water quality, endangered species, disposal, and other areas of environmental concern related to pesticide manufacture, registration, use and disposal. SFIREG performs the same function for the Office of Compliance in EPA’s Office of Enforcement and Compliance Assurance (OECA) about compliance with and enforcement of FIFRA and regulations pursuant thereto. In addition, SFIREG provides a mechanism for states to obtain regular updates on EPA’s pesticide regulatory program.

Pesticide Licensing & Certification

Licensing & Certification:

PSI Services who conducts the applicator testing for ODAFF has been part of discussions with Oklahoma Panhandle State University on adding them as a new testing center location for applicators.

ODAFF has had regular meetings with Kelly Solutions (KRS) on the status of private applicator CEU database. All private applicator CEUs from internal spreadsheet currently used have been imported to KRS. ODAFF is still waiting on the ability to edit courses in house and the user interface for private applicators to lookup their own CEU accounts.

ODAFF mailed out 4,858 letters to private applicators that must retest to renew their license for the upcoming period. Private applicators may start their retesting on July 1st and the letter contains all pertinent information for testing procedures. ODAFF will also be sending out letters to all private applicators who have CEU’s explaining what they need to do going forward for the next licensing period.

Tomato Brown Rugose Fruit Virus (ToBRFV)

Tomato Brown Rugose Fruit Virus is a tomato virus that first appeared in 2014 in Israel. Since that time, it has been observed in several countries, as well as many states, and continues to be a problem. It is federally regulated by the USDA and has become a larger issue in the last couple of months, when it was detected in North Carolina and New York. Some seed that was positive for ToBRFV was shipped to Oklahoma residents from those facilities.

ODAFF has contacted the homeowners and let them know about the disease. Many of these consumers have already destroyed their seeds. We are currently awaiting any further regulatory decisions from USDA to determine if additional actions are necessary.

Hemp

ODAFF has stopped taking outdoor grow applications as of July 1st. We currently have 21 licensed growers (10,389sqft and 718 acres) and 22 licensed processors.

Apiary

The 2023 Honeybee Survey is underway. This has been an exceptionally hard year on bees and beekeepers across the state which has impacted the average number of hives people have been able to keep alive and well.

AGRICULTURE RESOURCE SECTION

Weights & Measures Program

During this period the large capacity scale technicians tested 107 Vehicle scales and 8 livestock scales, 12 of the Vehicle scales and 5 livestock scales were rejected for repairs.

CPS inspectors checked a total of 901 small scales and 43 platform scales, 16 of the scales were rejected. There were 17 random pack inspections and 48 standard pack inspections conducted that resulted in 4 companies receiving letters of warning and 1 company receiving a stop sale. Additionally, 92 price verification inspections were conducted at various retailers that resulted in 1 company receiving a letter of warning.

A total of 4 scale companies received a letter of warning for not properly servicing scales.

Feed Program

Program Performance

During the reporting period below there were a total of 54 official feed samples analyzed, with 315 feed determinations made from these samples. The determinations resulted in the issuance of 17 violations for feeds or feed ingredients that did not meet established tolerances based on their guaranteed analysis. Most of these violations were issued for products deficient in Zinc and Methionine. Other violation includes Crude Protein, Vitamin A, Phosphorus, Salt, Copper, Manganese, Potassium and Calcium. Eight stop sale orders were issued for feed products with severe deviations from their guaranteed analysis. Five stop sales were issued for products deficient in Salt. Two stop sales were issued for products deficient in Vitamin A. One stop sale was issued for a product deficient in Monensin.

The following tables show a two-month comparison of label violations and stop sale orders issued by the Department for feed products that did not meet their guaranteed analysis.

Facility Pre-Site	1

Other Fertilizer News

On April 12th, 2023, a covered hopper railcar left a manufacturing plant in Cheyenne, Wyoming with more than 60,000 pounds of ammonium nitrate loaded as cargo. Two weeks later it was found empty at a routine rail stop in the California Mojave Desert. From the early stages of the investigation, it was alleged that the seals of the railcar were still intact and that there was no sign of any leaks. However, the current belief is that a small leak may have developed from the bottom gate in transit, causing it to lose its contents over the two-week trip. This incident is still under investigation. However, it does bring to mind that even though a federal law was passed to regulate ammonium nitrate over a decade ago no rules have been promulgated in over a decade since they were passed into law. Currently only some of the states regulate the sale and storage of ammonium nitrate of which Oklahoma is one. Here is a brief overview of the storage and sale requirements of ammonium nitrate fertilizer in the state of Oklahoma.

According to the Oklahoma Administrative Code ammonium nitrate storage must be secured to provide reasonable protection against vandalism, theft, or unauthorized access. Additionally, fertilizer retailers are required to obtain the following information regarding any sale of ammonium nitrate: Date of sale; quantity purchased; license number of the purchaser's valid state or federal driver's license, or other picture identification card number approved for purchaser identification of the Board; and the purchaser's name, current physical address, and telephone number. Finally, the records created pursuant to this rule must be maintained for a minimum of two years on a form or using a format set forth by ODAFF. The rules also allow the retailer to refuse to sell to any person attempting to purchase ammonium nitrate out of season, in unusual quantities, or under suspect purchase patterns.

ODAFF's policy is to perform quarterly audits at the licensed fertilizer companies that are authorized for the storage and/or distribution of ammonium nitrate fertilizer. Currently, there are 53 companies with an active Oklahoma fertilizer license that are authorized for the storage and/or distribution of ammonium nitrate fertilizer, 35 of which are companies with an in-state location. CPS inspectors also perform inspections on the security requirements for these facilities during their audits to ensure the firms are compliant with the storage requirements as well as the record-keeping and documentation pursuant to the Oklahoma Fertilizer Act & Rules.

I will be glad to answer any questions from the Board members.

Oklahoma Department of Agriculture, Food and Forestry
Animal Industry Services Board Report
July 21, 2023
Activities May 13, 2023 – June 30, 2023

Animal Disease Traceability:

We continue to distribute the free RFID tags to interested veterinarians and producers. During this time, we shipped 3,600 tags to veterinarians and producers.

We completed distribution of the wand RFID tag readers to veterinarians who have demonstrated the willingness to utilize the RFID tags and submit their records electronically.

During this period, we submitted a supplemental funding request for the OK ADT cooperative agreement to purchase an additional 18 RFID wands. The supplemental funding request was approved, and we are in the process of purchasing the wands.

During this time frame, the Texas Animal Health Commission began operating their livestock entry checkpoints along the OK-TX state line daily. TAHC has been sporadically checking livestock as they enter the state for several years. They received legislative funding to fully staff these checkpoints and allow for them to operate daily instead of sporadically. We have sent out messaging to veterinarians and producers reminding them to ensure they are meeting entry requirements for the livestock they are transporting.

AIS staff participated in a VET-CVI webinar provided by the Kansas Department of Agriculture going over tips and tricks to utilize the platform more efficiently. We are hopeful to offer a similar webinar to OK veterinarians in the near future.

Aquaculture:

20 facilities renewed their licenses, and inspections have been assigned.

Marissa had two inquiries about license applications.

Biologics:

Eight new products were registered during this time. Some of these were due to a change that was made in our rules.

On June 7, expired biological products were found at a feed store in Lindsay. The feed store has never had a violation in the past. When gathering information from the manager, it was discovered that the distributor for the vaccines had changed recently, and staff were not verifying expiration dates on products being placed for purchase. The expired products were removed, and recommendations were provided to rotate inventory and verify expiration dates when inventorying new stock.

Cattle Programs:

Brucellosis:

Marissa completed the brucellosis free herd certification for two herds. Two other herds indicated they no longer wish to participate in the program.

The only remaining reservoir of *B abortus* in the U.S. is in elk and bison in the Greater Yellowstone Park area. Those states have Designated Surveillance Areas, where the disease in wildlife occasionally spills over into domestic cattle and bison.

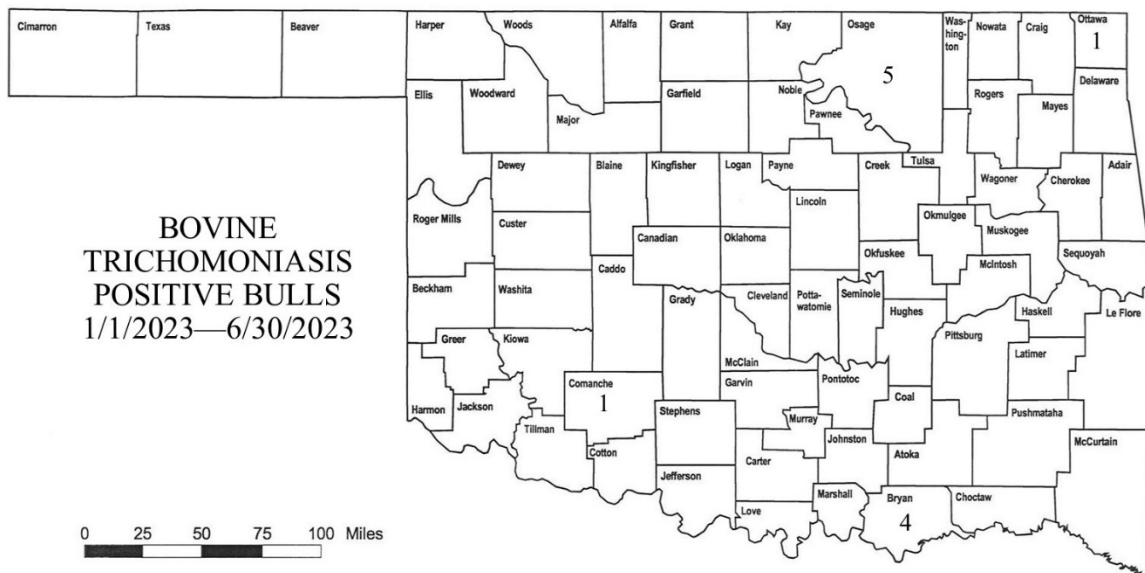

While there is very little need to test for *B abortus* any longer, this means we have very little or no surveillance for *Brucella suis* (Swine Brucellosis) in cattle, which currently infects approximately 20% of the feral swine that our Wildlife Services personnel test. *B suis* can, and does, infect cattle occasionally.

Tuberculosis:

We currently have no TB affected herds in Oklahoma.

Trichomoniasis:

During this period there were 1,088 Oklahoma bulls tested for Trichomoniasis with no positive individuals found.

10,325 bulls tested / 11 positive = 0.11% positive

Our current statistics compare to 2.1% positive bulls in 2011, 1.4% in 2012, 1.3% in 2013, 1.4% in 2014, 1.1% in 2015, 1.1% in 2016, 0.5% in 2017, 0.32% in 2018, 0.42% in 2019, 0.35% in 2020, 0.28% in 2021, and 0.3% in 2022.

Johne's Disease:

For the present reporting period we have received 11 positive reports of Johne's infected animals on nine new premises. The average of the last eight years for the same time

period we received 12 positive reports from seven new premises. The region of the state that receives the majority of the positive reports is east of I-35. The East averages 10 positives compared to the West which has averaged two for this reporting period. Year to date totals are 36 total positive with 29 new premises and seven repeat premises. 29 are east of I-35 and seven are west. The range has been for a high of 73 to this year's low of 36 positive reports. New premises infections have ranged from a high of 42 to this year's low of 29. The average for the last 8 years is 49 YTD positive reports, 35 new premises and 12 as repeat premises. YTD average location is 45 in the east and six in the west.

Education continues to be the important element in the control of Johne's disease. The dairy industry is probably doing a better job of controlling the disease than the beef industry. Our reports are predominately beef cattle. Rodeo animals have a higher reporting percentage than what their population represents. Embryo recipient cows are a serious risk factor for high genetic embryo exposure. Other risk factors are the purchase of "Northern Genetics". Although we do not have the necessary statistics to make such claims, it appears that the survival and transfer of the agent is more successful in those regions. Education and risk mitigation will continue to be the key for avoiding the purchase of the disease.

Emergency Management:

During this period, the MRC-STRONG grant proposal submitted for the OKMRC was awarded. The portion of this the grant proposal submitted by Dr. Gorczyca will provide necessary funding to host training opportunities for the State Animal Response Team volunteers.

During this period, we continue to plan the National Pork Board depopulation and disposal exercise. Planning calls were held on May 25 and June 29. The finance and procurement planning team held calls on June 19 and June 28 to discuss exercise equipment and logistics.

On June 15, Dr. Gorczyca and Dr. Stone met with Keith Reiner and Tom Layne from Hanor to discuss the NPB exercise to work through concerns from both ODAFF and Hanor. The meeting was very productive and details and logistics for the exercise were determined at the meeting.

On May 22, Dr. Gorczyca participated in the Payne CART membership meeting

On May 23 and June 30, we have participated in RABapp overview webinars to learn more about the role SAHOs will have accessing RABapp for Secure Pork Supply plans developed for commercial swine.

On June 8, Dr. Gorczyca hosted the Multistate Partnership (MSP) for Security in Agriculture monthly call.

On June 26, Dr. Gorczyca met with Matti Carlile and Kalley Whitlock, OK Pork Council, to discuss implementation of Secure Pork Supply plans for show pig producers. Kalley

has been tasked to assist 10 show pig producers to develop a SPS plan before the OK Pork Congress in August. Dr. Gorczyca will assist with the review of the plan and provide technical support.

During this period, a Secure Food Supply planning work group has been established. This will allow states to collaborate with each other to ensure consistency in requirements for producers to participate in this voluntary program. OK, TX, MO, KS, NM, NE, MN, ND, and WI are currently involved with this work group with plans to involve other states.

Equine Programs:

There are no reported cases or quarantines for CEM in Oklahoma.

There are no Piroplasmosis or Equine Infectious Anemia cases in Oklahoma.

The horse mentioned in the last board report that was dual infected with both Equine Infectious Anemia and Piroplasmosis was humanely euthanized. The owner was unable to find a suitable area of isolation that would not put additional equine at risk for exposure. All equine determined to be exposed through epidemiological investigation will go through a second round of testing for EIA mid-July but all exposed are very low risk and we do not anticipate finding any additional positive equine.

Dr. Ruby has been participating in a working group to update the guidance document for Equine Herpes Virus Response. The group is currently halfway through the document and hopes to have it near completion in time for review by the USAHA committee on equine at the National meeting in October.

On May 22nd, Dr. Ruby met with staff at the Oklahoma State Fair Park to review their biosecurity plans for equine disease outbreak response. It was a great opportunity to network, educate, and collaborate. They have a good plan and were able to practice it during the BBR to be sure they can enact it when needed. It was also a good time to discuss biosecurity for other species of livestock.

Farmed Cervidae Programs:

May 30 – June 2 Dr. Gorczyca-Southerland and I attended a national CWD Symposium in Denver, CO. This was the fourth symposium to introduce new research and findings about CWD in the past 30 years. It was interesting to hear other States' perspectives on managing their native cervids in relation to CWD. We believe the knowledge we gained at the symposium will help us develop a better response plan to deal with CWD in Oklahoma.

On June 6 Dr. Gorczyca-Southerland, JanLee Rowlett, Lee Benson, and Emma Victory met with Oklahoma Department of Wildlife Conservation personnel to begin the process of revising the State CWD Response Plan.

During this period, Dr. Gorczyca submitted a CWD project proposal for funding to the USDA Cervid Health Team. The project, if funded, will utilize predictive genetics in farmed cervid herds as a tool to mitigate susceptibility to CWD. The project will be open

to all farmed cervid herds including those not currently participating in the voluntary CWD HCP.

On May 26 Oklahoma Department of Wildlife Conservation reported that they had received preliminary positive results of CWD in a wild whitetail deer in Texas County. On June 19 ODWC notified us of another preliminary positive whitetail deer from Woodward County. Both cases were confirmed by National Veterinary Services Laboratory. Both deer were showing symptoms of CWD and the game ranger was called by the property owners. Discussions are occurring to determine what parts of the CWD Response Plan to put into action. There are no farmed cervidae facilities within the 10 mile radius of either case.

As a result of ODWC's confirmation of two cases of CWD in the Panhandle, Dana sent messages to all our Farmed Cervidae facilities with information about the location, and information about biosecurity and steps they can take to protect their herds.

Feral Swine:

Dana continues to process feral swine sporting facility and handling facility license renewals. Letters of Warning were mailed out on June 14, 2023, to facilities who have not submitted their annual renewal applications. There continues to be a high volume of feral swine hunter license requests.

On June 12 we received a complaint from a landowner that a feral swine sporting facility in Garvin County was releasing feral swine and they were damaging his wheat crop. One of our Livestock Inspectors was assigned to investigate the complaint. He found no problems with the fence. He noted swine tracks outside the fence but no evidence of swine inside the fence escaping. We believe the swine inside the fence are attracting wild feral swine. We also believe the ripe wheat is an attractant to wild feral swine as well.

We received another complaint from a landowner in Creek County. The complaint was that a feral swine sporting facility was allowing feral swine to escape the facility causing damage to his property. When Dr. Stone contacted the owner of the feral swine sporting facility, he discovered that the premises has sold to a different owner since he inspected the facility in late 2021. The new owner does not want feral swine and has been actively trying to kill as many as he can. We concluded that this is similar to the Garvin County case in that the number of feral swine in the area are increasing independently of the swine in the former sporting facility.

AIS received a call from a feral swine hunter that stated someone at a Feral Swine Sporting Facility in McClain County told him that a license was not required to hunt in a Feral Swine Sporting Facility. One of our Livestock Inspectors was assigned to visit the facility and inform them of the regulations and to assure all staff is aware that a current feral swine hunter license is required by all hunters no matter their age. Dana Call also provided the LSI with an instruction document that the facility can follow to check the license status of feral swine hunters at their facility, as required.

Foreign Animal Disease:

There were four FAD investigations during this time.

One was for a backyard flock of chickens in Oklahoma County that had a high death loss. HPAI was the FAD of concern.

Two were pet rabbits in Cleveland and Osage Counties that died suddenly. The referring veterinarians were concerned they could have died from Rabbit Hemorrhagic Disease.

One was a cow from Bryan County with vesicular lesions that were suspicious for FMD or Vesicular Stomatitis.

Thankfully, neither of these were diagnosed as a FAD.

There have been no confirmed cases of Highly Pathogenic Avian Influenza for two months. We'd like to think the outbreak that started a year and a half ago is over.

Unfortunately, the cycle of the disease in Europe makes us fear that the young migratory waterfowl that hatch this summer may become infected and spread more virus as they migrate south this fall.

We continue to be part of three separate working groups that are planning to respond to African Swine Fever in case the disease makes it to the USA. This has gained greater significance due to the finding of ASF in the Dominican Republic and Haiti.

Livestock Market Audits:

During this period, staff received no correspondence concerning new market licensing.

Although no new markets were added, a couple markets added some new staff that requested some assistance regarding what is expected of them from ODAFF and USDA pertaining to custodial account laws. In addition to assisting this staff, this period also allowed for a market orientation as well as a number of custodial account reviews.

Outreach:

On May 15 I submitted the State Veterinarian Report for the OVMA Communique newsletter.

On May 17 I gave a presentation to the Oklahoma Cooperative Extension Service "Coffee Shop" virtual meeting. We discussed the PED outbreaks at OYE and potential plans to minimize the outbreaks.

On May 18 I gave a presentation about farmed cervidae and CWD to the Central Oklahoma Veterinary Medical Association.

On June 19 our field staff was in for a quarterly meeting. We discussed program updates, they got their laptops updated, and I discussed the FY 2024 budget. We presented longevity awards and had a lunch catered by Ted's.

On June 21 I had the opportunity to visit with three interns that are working with Kelli Payne this summer. I explained a lot of what Animal Industry Services does and how we help protect the livestock industry of Oklahoma.

Poultry Programs:

There have been 19 sick or dead birds submitted for our sick bird/dead bird program since the last board report, for a total of 70 cases this year.

Dr. Ruby and Sherrie Davis attended the annual National Poultry Improvement Plan Official State Agent Meeting in Columbus, Ohio from June 26th to the 29th. This is a meeting that reviews changes to NPIP, allows States to give a report on how they implement NPIP, and allows collaboration between states to make changes and improvements.

On May 24th, Dr. Ruby and several livestock inspectors assisted the Oklahoma City Animal Shelter in Pullorum/Typhoid testing 100 gaming hens and roosters that were confiscated from a cruelty case. The birds were being transported to a rescue in Colorado and the PT test was required for import.

Public Health

There is nothing to report during this time.

Rabies in Livestock:

There have been no new cases of rabies in livestock since the last report.

Sheep and Goat Programs:

There were no significant activities in this program.

Swine Programs:

On June 13 I was notified that two gilts from a commercial farm in Hughes County tested positive for Brucellosis at Iowa State University's lab. We placed the premises under quarantine and are working with the management to do more testing to determine if this is really Brucellosis or if something else could be causing the positive titers.

On June 21 we were notified of a show pig that tested positive for Brucellosis. Dr. Proctor traveled to the premises in Adair County and tested the positive barrow along with seven other show pigs. We're waiting for those results.

We're beginning to receive test charts for fall show season participants in accordance with the new testing date of May 15 for swine exhibitors. Dr. Gorczyca and Dana Call have been working on validating commercial swine premises who have enrolled in the US SHIP program. At this time Seaboard, Prestage Farms, Hanor, JBS, Smithfield, and Tyson are participating.

Miscellaneous:

On May 18 Dr. Saliki, Director of Oklahoma Animal Disease Diagnostic Laboratory, and two of their staff members visited ODAFF. They spent time in the serology lab discussing the transition of the ODAFF lab work to OADDDL. After the time in the lab, they spent some time visiting with Secretary Arthur about the transition, equipment needs, and finances.

On June 14 I attended the business meeting of the Western States Livestock Health Association virtually.

Also, on June 14, I attended a virtual NASDA meeting where California Proposition 12 and Massachusetts Question 3 were discussed.

We have two interns this summer. One is a pre vet student and the other is going into her third year at OSU CVM. The veterinary student spent a day with Dr. Stone doing some TB testing. They have both been helping our administrative staff get documents scanned and filed and helping us catch up on data entry.

Wildlife Services Division
Board Report for June 2023 Activities

Introduction

Wildlife Services (WS) responds to damage complaints caused by wildlife to resources or property throughout Oklahoma. WS Specialists conduct operational damage management programs for many of the complaints they receive to resolve these wildlife damage problems. During this period, these projects were conducted on 366 properties with an estimated 831,350 acres of land under agreement. Additionally, WS helped 112 persons and entities with technical assistance which involved providing information to cooperators so they can resolve problems themselves. Cooperators reported and WS Specialists verified wildlife damage of \$993,990,212.00 during this period. Beaver damages accounted for losses totaling \$55,214. Coyotes were responsible for a number of damage requests, primarily to livestock, with losses totaling \$10,824. Feral swine damages accounted for losses totaling \$993,917,449, mostly in a National Wildlife Refuge wetland, while other species of wildlife were responsible for \$6,725 in damages to property, agriculture, and livestock.

Coyote Damage Management

Custer County livestock producer requested assistance with coyotes depredating on his calves. The producer reported coyotes had killed two calves valued at \$1,600. The Wildlife Specialist assigned to Custer County conducted a site visit and determined coyotes were responsible for the losses. Damage management efforts were successful in removing two coyotes from the property. No further losses have occurred, and work is ongoing to prevent additional losses.

Stephens County livestock producer requested assistance with coyotes depredating on his lambs. The producer reported coyotes killed one lamb valued at \$170. The Wildlife Specialist assigned to Stephens County responded to the request and examined the carcass and confirmed coyotes were responsible for the loss. The Specialist recommended non-lethal methods of carcass removal, night penning, shed lambing, and guarding animals to help reduce future lamb losses to coyotes. Control efforts have removed four coyotes and are continuing at this time to further reduce predation losses from coyotes for the producer.

Beaver County landowner requested assistance with coyotes depredating on his calves. The producer reported coyotes had killed one calf valued \$1,500. The Wildlife Specialist assigned to Beaver County examined the carcass and verified coyotes were responsible for the loss. Damage management efforts were successful in removing four coyotes from the property. Control efforts continue to help further reduce the threat to the cooperator's calves.

Feral Swine Damage Management

Ellis County farmer requested assistance with feral swine that were responsible for damaging ten acres of pasture valued at \$1,500. The Wildlife Specialist assigned to Ellis County responded to the request and his field inspection verified the damage to the pastures. The Specialist used a live trap to remove thirty-six feral swine along with aerial operations to remove an additional twenty-one feral swine from the property. The area continues to be monitored for activity to determine if additional management efforts are needed to further reduce damage.

Dewey County landowner contacted WS needing assistance with feral swine rooting in his wheat fields. The landowner estimated that feral swine rooted up five acres valued at \$680 in damages. The Wildlife Specialist assigned to Dewey County responded to the request and verified the damage. A live trap was used to remove twenty-eight feral swine from the property. No additional damage has occurred and the feral swine population in the area is being monitored to determine if additional management is needed.

Custer County landowner contacted WS needing assistance with feral swine damaging his hayfield. The landowner estimated that feral swine damage to the fields to be \$600. The Wildlife Specialist assigned to Custer County responded to the request and verified the damage. A live trap was used to remove thirty-eight feral swine from the property. No additional damage has occurred and the feral swine population in the area is being monitored to determine if additional management would be needed.

Grady County landowner requested assistance with feral swine for destroying ten acres of a newly planted soybean field valued at \$2,051 in damages. The Wildlife Specialist assigned to Grady County responded to the request and verified feral swine were responsible for the damage. The Specialist used a live trap to remove thirteen feral swine from the area. Activity in this area is closely being monitored to determine if further management is needed.

Nowata County rancher called WS for assistance with feral swine when he found rooting damage to his cattle pastures. The damage was verified and estimated at \$3,500. After pre-baiting, a remote camera trap was placed, and eighteen feral swine have been removed to date. This project is still being monitored and the rancher was advised about fencing options that may deter future feral swine from damaging his pastures.

Craig County rancher called WS for assistance with feral swine when he discovered rooting damages to his cattle pasture. The damage was verified and estimated at \$2,900. Pre-baiting with corn has begun on this project. Once the feral swine consume the corn, a remote camera trap will be placed to remove them and lessen the damages. The owner was advised on fencing options that can exclude the feral swine from his property in the future.

Hughes County producer called WS for assistance with feral swine when he found rooting damage to his wheat field. The damage was verified and estimated at \$4,000. After pre-baiting with corn, a remote camera trap was placed and eight feral swine were removed. This project is still being monitored.

Osage County rancher called WS for assistance with a feral swine when he found extensive rooting damage in his hayfields. The damage was verified and estimated at \$4,050. With significant sign found in the area, pre-baiting with corn was started at the selected trapping site. A remote

camera trap was placed and forty-two feral swine have been removed to date. This project is still being monitored.

Kay County farmer called WS for assistance with feral swine when he found fresh rooting damage to his corn field. The damage was verified and estimated at \$440. A remote camera trap was placed and five feral swine were removed. This project is still being monitored and the owner was advised about environmental changes that could deter future feral swine issues.

Pushmataha County cooperater called WS when he found feral swine rooting damage to his fields. The damage was verified and estimated at \$8,500. After pre-baiting, a remote camera trap was placed and seven feral swine have been removed to date. This project is still being monitored.

Aerial Operations

Aerial operations were conducted in **Custer County** in response to landowners' request for feral swine damage to corn, milo, and soybeans. The helicopter was utilized for six flying hours to remove one hundred and forty-six feral swine from the areas. Additional aerial operations are planned in these areas to further reduce damage associated with feral swine.

Beaver Damage Management

Dewey County Road Commissioner contacted WS for assistance with beaver that were responsible for damming up the creek on one of his bridges causing the water to go over the road. The Commissioner estimated the damage to the road and bridge structure to be \$500. The Specialist for Dewey County responded and verified beaver were responsible for damage. Control measures used by the Specialist were effective in removing the beavers from the creek to reduce any additional damage to road and bridge.

Custer County landowner contacted WS for assistance with beaver that were responsible for damming up the creek on his property and flooding his pasture. The landowner estimated the damage to the pasture to be valued at \$2,000. The Specialist for Custer County responded and verified beaver were responsible for damage. Control measures used by the Specialist were effective in removing the beavers from the creek to help reduce any additional damage to pasture.

Ellis County landowner contacted WS for assistance with beaver that were responsible for burrowing into his pond dam on his property. The landowner estimated the damage to the pasture to be valued at \$1,000. The Specialist for Ellis County responded and verified beaver were responsible for damage. Control measures used by the Specialist were effective in removing the beavers from the pond to reduce any additional damage to the pond dam structure.

Okmulgee County producer called WS to report beavers were causing flooding on his property and adjoining county road. The damage was verified and estimated at \$1,500 in flooding damages. Conibear traps were placed and eight beavers were removed to reduce the damages and conclude this project.

Muskogee County property owner called WS for assistance with beavers when he was unable to discourage the beaver activity by removing the beaver dam. Beaver damage was verified and estimated to be \$1,250 in flooding and tree damage. Conibear traps were placed and one adult beaver was removed. This project is still being monitored and the owner was advised on environmental changes that could help discourage future beaver damage.

McCurtain County Commissioner called WS for assistance with beavers causing flooding along a county road. The flooding damage was verified and estimated at \$2,500. The beaver dams were removed by hand to improve the flooding damage. Night shooting was used to remove two beavers and conclude this project.

Pittsburg County cooperator called WS for assistance with beavers activity in his cattle stock pond. The pond dam had previously been destroyed by beaver burrowing activity and the owner didn't want to have to repair it again. Recent damage was verified and estimated at \$500 to the trees around the pond. Conibear traps were set and three beavers were removed. This project is still being monitored.

Black Vulture Management

Grady County game farm operator requested assistance with black vultures that were depredating on his fallow deer fawns. Over last two years, the producer reported that black vultures were responsible for the loss of one hundred fawns valued at \$25,000. The Wildlife Specialist assigned to Caddo County conducted a site inspection and verified the loss of three fawns valued at \$7,500. The Specialist constructed a corral trap designed to catch black vultures and effectively removed one hundred and thirty-six black vultures from the property. Work continues to provide the producers relief from black vultures depredating his fawns.

Prairie Dog Management

Bertrand Cemetery in **Cimarron County** contacted WS with prairie dogs damaging grave sites on the property. The damages to grave sites and property were valued at \$5,000. Fumitoxin was applied to reduce the prairie dog population on cemetery property. The area is closely being monitored to determine if addition applications are needed.

OKLAHOMA HAY MARKET REPORT
6-23-23

Receipts: 2,025 Last Reported: 1,445 Year Ago: 0

Compared to the last report: Hay trade is slow with limited demand. We still have not been able to find our footing when it comes to pricing. Oklahoma is still trying to catch up with getting hay cut or out of the field. Due to the rainfall, they keep having to put off time in the field along with wheat harvest. We still have producers trying to restock their inventory from last year's drought. We continue to receive rainfall across the state, but it has mainly been in western Oklahoma. While we do need rain in western Oklahoma, the north-central and eastern part of Oklahoma is beginning to need widespread showers as drought begins to move in over those areas. The Oklahoma Mesonet Drought Monitor shows we are at 0.52 percent in exceptional drought, 4.79 percent in an extreme drought, 16.59 percent in severe drought, 41.91 percent in moderate, 73.21 percent in abnormally dry conditions, 26.79 percent that has no drought conditions.

DAIRY SECTION

Dairy staff conducted routine inspections at dairy farms, dairy plants, performed equipment checks and collected farm and plant dairy samples throughout the state.

Dairy Services conducted two dairy farm surveys: DFA Central Council 90 (BTU 40-090) and Riverland Dairy (Pending BTU Name & Number). Riverland Dairy has grown into a large dairy farm in Bryan County and is too big for their existing BTU. A new BTU will be created for Riverland Dairy. Each survey received passing scores. Information regarding these surveys can be found on FDA's Interstate Milk Shippers List website.

Dairy services was approved for a training grant sponsored by the Association of Food and Drug Officials (AFDO). This AFDO grant will fund essential dairy training through 2023. The grant is worth up to \$6,900.00.

Dairy services will assist in hosting an OTED led FD375 Dairy Farm Sanitation Course in Tulsa during August 22-25, 2023.

Consumer Safety Officers of FDA conducted a follow up inspection at Swan Bros. Dairy Inc. in Claremore June 16 – 18, 2023. This follow up inspection is related to the facility's past 483 citations.

The Oklahoma Dairy program will be participating in a National Drug Residue Monitoring Project with the FDA. All samples will be collected at random from bulk milk tankers and shipped to a 3rd party laboratory for anonymous sample preparation. This national study will help FDA determine if the current drug residue screening methods are effective or need to be expanded.

Dairy Services Director, Pete Echelle, is currently out on medical leave for hip replacement surgery.

CONSUMER PROTECTION SERVICES

FY2023 OSU Plant Disease and Insect Diagnostic Lab (PDIDL) --\$11,250.00

1. Brief description of the proposed expense, cost, its necessity, and any deadlines for approval.

A plant pest investigation occurred in June requiring the sampling of cucurbits for Cucumber Green Mottle Mosaic Virus in Oklahoma crops. ODAFF and USDA APPQ spent 2 weeks in June testing several vegetable farms that had tentatively tested positive through unverified University sampling and testing. Together USDA PPQ along with ODAFF personnel sampled those farms to verify if the original diagnosis is accurate. This request is to pay for the testing of those samples.

2. Consequence(s) and cost (if any) if the proposed expense is not approved.

This pest is of concern to USDA PPQ and could potentially have further ramifications for the state if found here.

FORESTRY SERVICES

FY23 Southern Pine Beetle Prevention Program - \$30,000

This is funded from a USFS Federal Grant to prevent Southern Pine Beetle from spreading from timber stand to timber stand. This grant provides to Oklahoma southern pine timber owners funds for pre-commercial thinning and other cultural practices to prevent the spread of Southern Pine Beetle. This is a very invasive and destructive insect affecting southern pine timber plantations. This prevention program reduces the risk of infestation and helps protect the timber owner's investment and future revenue.

FY 23 - \$12,000

Purchase two (2) UTV trailers to haul firefighting UTV's. Trailers will be 14-16 ft. tandem axle with heavy-duty axles to accommodate hauling of UTV loaded with skid unit and water as well as additional equipment and supplies related to wildland fire activities. Funding for this entire purchase will come the US Forest Service as part of an approved budget revision.

FY 23 – UTVs w/ slip-on firefighting units, \$5,000 (Federal Funding–SICF SFA Response)

Purchase two (2) Polaris Ranger UTVs. These UTVs will be replacing units that were acquired through the Firefighter Property Program (FFP) but are no longer in service due to age and mechanical issues. Each UTV will be equipped with a slip-on skid unit that can handle spot fires and support mop-up throughout the duration of a wildfire. In addition, these UTVS configured with windshields, canopies and seatbelts can safely and efficiently transport fire line personnel to areas where pickups/engines are unable to access. Funding for this entire purchase will come the US Forest Service – FY22 SICF SFA Response Grant as part of an approved budget revision.

Original \$64,929 was approved April of 2023. Due to inflation and long lead times price went up before PO was created.

FY24 - \$23,000 Federal Funds

Award Federal pass-through funding for Urban and Community Forestry Grants to neighborhoods/communities that traditionally face financial hardship – up to \$23,000. These grants support projects related to helping lower income neighborhoods plant and replace tree canopy. Without these projects, we would lose an avenue of community support and education. This money will be refunded to us through Federal funding.

FY24 – \$10,000 Southern Pine Beetle Federal Grant

Aerial detection for Southern Pine Beetle (SPB). Ensures early detection and treatment to limit the insect's spread and possible timber stand infestation. Justification: SPB is a very invasive insect and this prevention program protects forest health, forest industry investments, landowner investments, and future revenue. (Federal Grant)

FY24 – \$78,000 Aerial Detection Contract Forestry Services' Protection Area

Detection of wildfires in the Forestry Services Protection Area is primarily accomplished utilizing fixed-wing aircraft provided through a contract with a private vendor. This contract will require detection on high fire danger days in the East Central and Southeast Areas with an option for call-when-needed detection services in the Northeast Area. Justification: Without this contract new wildfires will go undetected for a longer period resulting in larger fire sizes, increased numbers of response personnel needed to control the wildfire, and possible increased

loss of life, residences, and natural resources.

FY 24 - \$30,000

Purchase metal siding, purlin, posts and overhead equipment doors for existing three-sided pole barn at the Forest Regeneration Center. This will secure the building and the container filling equipment that will be housed inside. This purchase will be reimbursed by the Revegetation/National Seed Strategy Funding Grant. **Justification:** Numerous landowners are requesting seedlings grown in containers for their harsher sites and we are unable to meet the demand now due to the lack of infrastructure for the equipment. Once the container filling equipment is assembled, it must be housed in a secure building, away from weather that would affect its operation of filling containers for landowners.

FY 24 - \$26,000

Purchase and have installed plumbing and electrical extensions and fixtures to an existing pole barn at the Forest Regeneration Center. This will provide utilities to the building that will house the container filling equipment. This purchase will be reimbursed by the Revegetation/National Seed Strategy Funding Grant. **Justification:** Numerous landowners are requesting seedlings grown in containers for their harsher sites and we are unable to meet the demand now due to the lack of infrastructure for the equipment. Once the container filling equipment is assembled, it will require electricity and plumbing utilities to run and maintain it.

FY 24 - \$12,000

Purchase contract planting services to qualified, trained workers in order to plant for Fall plantings including Black Walnut and Bur Oak seeds at the Forest Regeneration Center. Each year, the Forest Regeneration Center delivers 2 to 7 million seedlings to Oklahomans for conservation planting. Recently, we cancelled our contract for up to 24 inmate laborers which was a big source of our labor crew. A labor crew is required to plant the seedlings within the short time that they must be planted to meet the harvest schedule for landowners. In order to make sure our customers have quality, healthy seedlings, delivered on schedule, we require contract planting for these seedling orders. Without this approval, we will not be able to plant these hardwoods in a timely manner and we will fail to meet the delivery requirements for Oklahoma customers.

FY24 – Wildfire detection cameras, \$118,580 (Federal Funding–SICF SFA Response)

Purchase eleven (11) PTZ IP Detection Cameras. The cameras will re-establish wildfire detection in eastern Oklahoma providing coverage of the 6.2-million-acre protection areas. An early warning detection system is necessary for keeping fire sizes manageable and ensuring a prompt response. With this system in place, OFS will have the ability to detect fires 24 hours a day, 365 days a year. Funding for this entire purchase will come the US Forest Service – FY22 SICF SFA Response Grant.

FY24 - \$ 2,000,000

Rural Fire 80/20 Reimbursement Pass-through Grants awarded to certified rural fire departments serving communities under 10,000 in population. Funding limits per application are \$30,000 of state appropriated funds for construction and \$20,000 for fire equipment. **Justification:** Fire

departments awarded these grants are able to fulfill a critical public safety function by purchasing firefighting equipment and/or build, remodel, or expand fire stations.

FY24 - \$8,414,550

State Operational Assistance Grants divided equally among the certified fire departments (Rural Fire Defense). Fire Departments receiving the Operational Grant can only use the funds for items authorized in Oklahoma State Statutes, Title 19, Chapter 21, and Section 901.56.

Justification: Fire departments awarded these grants are able to fulfill a critical public safety function by purchasing firefighting equipment, purchase Worker Compensation Insurance, Vehicle Insurance, etc. as outlined in the above-mentioned statute.

FY24 - \$800,000

Contract with Oklahoma Association of Regional Councils for Rural Fire Coordinators to provide technical assistance and equipment placement services to new or established Rural Fire Departments within their districts to assure the capability of meeting local fire protection needs. Without this contract fire departments could lose much needed funding, equipment, and technical assistance.

FY24 - \$10,000

Uniforms for OFS employees. OFS employees are required for recognition by the public. Full allotments are purchased for new employees. **Justification:** Existing employees are provided an annual allotment of uniforms to replace worn and old uniforms. OFS employees provide a vital public safety function, requiring public recognition of our personnel. (Federal & State Funds) **Original \$25,000 was approved January of 2023. Due to inflation the yearly budget must be increased.**

FY24- \$11,500

National Association of State Foresters is an organization composed of the directors of forestry agencies in the states, territories and the District of Columbia. Oklahoma has been a member of this organization for decades. This grant provides Oklahoma Forestry Services with the current policies and procedures regarding fire protection and forest management. (Federal Funds) **Justification:** Without this purchase we would lose our connections to other States and plans that emphasize forestry needs.

LABORATORY SERVICES

FY24 - \$5,700.00 – DI Water and Maintenance

Correction of fiscal year. Previously submitted on the June Board Report.

Contract purchase of analytical grade water for laboratory testing and tank maintenance. Contract effective 07/01/23 through 06/30/24.

FY24 - \$7,436.00 – Eastern Laboratory Services, Ltd.

Correction of fiscal year. Previously submitted on the June Board Report.

Contract for ELS to provide Somatic Cell Standards (SCC) for milk testing. Contract effective 07/01/23 through 06/30/24.

MARKET DEVELOPMENT

FY2024 – Sage – MIO Co-Packer speaker & workshop - \$15,400.00

FY2024 – Oklahoma Youth Expo Junior Livestock Show & educational scholarship program – Legislative Directed Spending - \$85,000.00

Justification: This amount of \$85,000.00 will directly support the 2024 state-wide spring junior livestock show. For 105 years, the youth of the state of Oklahoma have exhibited some of the finest livestock in the country at OYE, which carries the title of “The World’s Largest Junior Livestock Show” with participants from all 77 Oklahoma counties. OYE also provides agricultural scholarships and leadership-training programs for Oklahoma students. The 10-day OYE generates an economic impact of \$24.5 million to the OKC economy and provides hundreds of youth with scholarships to continue their education at a collegiate level. If this purchase is not approved, there is negative impact on conducting the 2024 Oklahoma Youth Expo (OYE) as well as a reduction of show ring achievement and academic scholarships to the youth of Oklahoma.

FY2024 – Tulsa County Public Facilities Authority 2023 Junior Livestock Show – Legislative Directed Spending - \$50,000.00

Justification: The amount of \$50,000.00 goes directly for the purpose of promoting the Oklahoma agriculture industry through national agriculture events, Tulsa State Fair Junior Livestock Auction, and the Tulsa State Fair Livestock Scholarship Program. If this purchase is not approved, there will be a negative economic impact to Tulsa and surrounding communities with the loss of national ag events hosted at Expo Square. In addition, there would be a negative impact on conducting the 2023 Tulsa livestock show and a reduction of scholarships to the youth of Oklahoma.

FY2024 – Made in Oklahoma Coalition – Legislative Directed Spending - \$513,325.00

Justification: The amount of \$513,325.00 goes directly to support a unique public/private partnership that establishes a marketing program for the purpose of promoting food brand awareness, trade and consumer loyalty for Oklahoma food products through a variety of cooperative marketing activities. In addition, MIO promotes business retention, increase of sales to retail and foodservice outlets and business expansion. If this support is not provided, there is a negative impact on the seventy MIO members who employ over 26,000 Oklahomans who have reported increased sales directly related to the MIO marketing campaigns. In addition, the momentum of new, small businesses benefiting from MIO resources and connections will be impaired.

FY2024 – TasteAdvisor Explorer – Agritourism wine app – Renewal for Year 3 of 3 - Oklahoma Viticulture and Enology Center Development Revolving Fund - \$18,000.00

WILDLIFE SERVICES

\$ 24,500 - ODAFF Wildlife Services is requesting approval to purchase a Kawasaki 4x4 side by side UTV. This UTV will allow the wildlife specialist to move trapping equipment into remote locations unable to be accessed with a traditional vehicle, additionally they will be used to survey land looking for wildlife damage more efficiently.

Not approving of this purchase will mean we continue operating in a less efficient way. Currently, traps are moved manually into remote locations increasing the risk of injury to the employee and surveying for wildlife damage by foot decreases productivity. This way of operation is less efficient and costs the agency more dollars due to longer and fewer visits daily.

\$135,304 - ODAFF Wildlife Services is requesting approval to purchase twenty battery, camera, panel trap systems to be utilized at feral swine trap locations, placed strategically across the state. These systems will allow for remote viewing of swine traps from any distance away. This will allow the wildlife specialist to also maintain bait levels at the traps without having to physically go and “check” the traps. The savings here in gas and mileage is significant. These systems will also allow the specialist to “drop” the door on swine traps when the trap has a significant number of pigs inside. A simple command to release the gate is functioned through an app or website. The specialist is alerted by text message that there are pigs in the trap, the live feed is turned on and if deemed necessary the door is remotely dropped.

Not approving of this purchase will mean we continue operating in a less efficient way. Currently, traps must be visited on a daily basis to see if pigs are caught or if more bait is required. This way of conducting trapping operations is a lot less efficient and costs the agency more dollars due to increased visits and mileage.

JURISDICTION, VENUE, AND APPLICABLE LAW

13. Subject matter jurisdiction and venue are vested in the State Board of Agriculture in its quasi-judicial capacity, pursuant to Okla. Const. Art. VI, Section 31 and 2 O. S. § 2-4(7); accordingly, this is the proper forum to hear this matter.

14. Respondent has substantial business operations and assets within the State of Oklahoma.

15. Based upon current information and belief, at all relevant times hereto, Respondent has, among other things, engaged in the business of commercial pesticide application, located at Vinita, Oklahoma.

16. Pursuant to Okla. Sta. Ann. 2 § 2-4(A)(3), ODAFF has authority to regulate persons who violate the Oklahoma Agricultural Code by initiating and prosecuting administrative, civil, or criminal actions and proceedings necessary under the Oklahoma Agricultural Code.

ALLEGATIONS OF FACT

17. Based upon current information and belief, the following allegations of fact summarize the alleged violations committed by Respondent.

18. On or about 14th day of July 2022, the Consumer Protection Services Division of the Department conducted a consumer drift complaint on a property located at 446833 E. Hwy 60 in Vinita, OK. This property is located between the parcels of pastureland that your company sprayed in sections 22 & 27 of 25N-21E.

19. Our inspector observed the willow trees on the complainant's property having necrotic leaves on their north sides, and the garden plants had leaf curl. The complainant and his neighbor have sprayed the property boundary fence line with Glyphosate.

20. According to your application records you applied GrazonNext to the pastureland, and these applications started on June 28, 2022, and ended July 3, 2022.

21. A vegetative sample was taken from the complainant's property, and 2,4-D, Aminopyralid, Triclopyr, and Glyphosate were detected. A vegetative sample was taken from you application area in section 27-25N-21E, and 2,4-D, Aminopyralid, Triclopyr, and Glyphosate were detected.

22. According to our investigation your application is the source of the herbicides found on the complainant's property.

23. Additionally, you are on file with ODAFF as being a certified applicator, and you applied for a business license on May 20, 2022. This application was incomplete, and a business license was not issued to your company.

24. Making applications without a business license, and allowing a pesticide to drift off-target are violations of the Oklahoma Combined Pesticide Law and Rules: 2 O.S. § 3-86 A(3); 2 O.S. § 3-86 A(15).

ALLEGED CONCLUSIONS OF LAW

25. Based upon the application of the above law to the aforementioned facts, by allowing off-target drift and not having a current license you are in violation of Oklahoma Statutes 2 O.S. §3-86(A)(3) and 2 O.S. §3-86(A)(15).

- 2 O.S. §3-86(A)(3) states: "(A) It shall be unlawful for any person, whether or not they hold a commercial or noncommercial license, to violate any part of this subsection or rules promulgated by the State Board of Agriculture. Any license, certificate, or identification issued may be suspended, canceled, revoked, or refused issue or reissue by the Board after a notice and an opportunity to be heard has been given to the holder of the license or certificate. The suspension, cancellation, revocation, or refusal to issue or reissue any license, certificate, or

identification may be made if the Board finds: (3) A person has operated in a negligent manner, thereby causing a pesticide to drift off-target.”

- 2 O.S. §3-86(A)(15) states: “(15) Any person to act, operate, do business, or advertise as an applicator unless the person has obtained a valid license issued by the Board for the category in which the person is engaged.”

Stat. § 2-18(A), after notice and opportunity for a hearing in accordance with the Administrative Procedures Act, if the State Board of Agriculture finds any person in violation of the Oklahoma Agricultural Code or any rule promulgated or order issued pursuant thereto, unless otherwise specifically provided by statute or rule, the Board shall have

the authority to assess an administrative penalty of not less than One Hundred Dollars (\$100.00) and not more than Ten Thousand Dollars (\$10,000.00) for each violation.

31. Each animal, each action, or each day a violation continues may constitute a separate and distinct violation.

ALLEGATIONS OF FACT

17. Based upon current information and belief, the following allegations of fact summarize the alleged violations committed by Respondent.

18. On or about the 21st day of October 2022 and again on or about the 21st day of February 2023, the Consumer Protection Services Division of the Department conducted use inspections with your employees in Chickasha, OK.

19. During the October 21st inspection our inspector made contact with Boyce Adair and James Golden who were making an application at that time. Both of these employees are non-certified applicators at the time of this inspection.

20. A tank-mix sample was taken and 2,4-D, Dicamba, Mecoprop, and Pendimethalin were detected in the mix.

21. During the February 21st inspection, our inspectors found your application utility vehicle parked outside a residence. The lawn of this residence had just been sprayed. A short time later your employees, Dennis Jennings and Wyatt Kinnamon, arrived to pick up the vehicle. These employees were also not certified.

22. A certified applicator must be on site to supervise non-certified applicators making applications. Failing to have a license to apply pesticides commercially and failing to have a certified applicator supervise non-certified applicators is a violation of 2 O.S. §3-86(A)(16) and O.A.C. 35:30-17-25(b).

Any license, certificate, or identification issued may be suspended, canceled, revoked, or refused issue or reissue by the Board after a notice and an opportunity to be heard has been given to the holder of the license or certificate. The suspension, cancellation, revocation, or refusal to issue or reissue any license, certificate, or identification may be made if the Board finds: 16. Any persons to be employed or represent themselves as certified applicators or service technicians unless they have met the certification standards prescribed by the Board and obtained valid certificates or identifications issued by the Board for the categories for which the persons are to be employed or supervised.”

- O.A.C. 35:30-17-25(b): “(b) A certified applicator shall be on site to supervise any pesticide application by a non-service technician.”

ATTORNEY CONFERENCES

24. If Respondent desires to meet with attorneys for the Department prior to the Prehearing Conference to discuss the allegations and/or seek a possible resolution, please contact the undersigned at 405-522-5997.

28. Pursuant to 2 Okla. Stat. § 2-18(A), after notice and opportunity for a hearing in accordance with the Administrative Procedures Act, if the State Board of Agriculture finds any person in violation of the Oklahoma Agricultural Code or any rule promulgated or order issued pursuant thereto, unless otherwise specifically provided by statute or rule, the Board shall have the authority to assess an administrative penalty of not less than One Hundred Dollars (\$100.00) and not more than Ten Thousand Dollars (\$10,000.00) for each violation.

29. Each animal, each action, or each day a violation continues may constitute a separate and distinct violation.

PRAYER FOR RELIEF

30. The Department is not seeking to remove any license or registration of any business; we are seeking a monetary penalty as set out in statutes, specifically 2 O.S. §2-18(A). In this case we are seeking a **Two Thousand Dollar (\$2000.00)** administrative penalty.

HEARING AND RIGHT TO COUNSEL

8. Respondent may choose to proceed to a full evidentiary hearing on the merits, at which Respondent will be given the opportunity to cross-examine the Complainant's witnesses, present Respondent's witnesses, and present relevant evidence on Respondent's behalf.

Any Respondent who fails to appear after receipt of notice may be determined to have waived the right to appear and present a defense and a default may be presented by the Department to the Board at a regularly scheduled meeting proposing the relief requested by the Notice of Violation, or other relief if justice so requires.

JURISDICTION, VENUE, AND APPLICABLE LAW

13. Subject matter jurisdiction and venue are vested in the State Board of Agriculture in its quasi-judicial capacity, pursuant to Okla. Const. Art. VI, Section 31 and 2 O. S. § 2-4(7); accordingly, this is the proper forum to hear this matter.

14. Respondent has substantial business operations and assets within the State of Oklahoma.

ALLEGATIONS OF FACT

17. Based upon current information and belief, the following allegations of fact summarize the alleged violations committed by Respondent.

18. On or about the 9th day of November, 2022, the Consumer Protective Services Division of the Department conducted a routine inspection involving a marketplace and restricted use pesticide inspection at your place of business.

Any pesticide registration, permit, certificate, or identification issued may be suspended, canceled, revoked, or refused reissue by the Board after a notice and opportunity to be heard has been given to the holder of the registration, permit, certificate, or identification. Notice shall be given to the holder of the registration, permit, certificate, or identification by registered or certified mail at least ten (10) days prior to the date of hearing. The suspension, cancellation, revocation, or refusal to reissue any registration, permit, certificate or identification may be made if the Board finds that: That any person intends to or has distributed, sold, stored, or used any pesticide or device in a manner inconsistent with its labeling.”

20. On January 20, 2023, the Agricultural Environmental Management Services (AEMS) Division of the Department was notified there was a broken line in the courtyard at Respondent's Choate Sow Farm (S65). The Department designated the discharge as D-23-012.

21. While excavating the line, personnel discovered a cool cell tank was sitting on top of a broken line. To repair the line, the tank was removed causing effluent in the line to flow into a

contained area outside of a farrowing room on the facility. On that day, an inspector conducted a site investigation and found effluent approximately one hundred ninety-six feet north and south, on the north side of the lift station and approximately fifty-eight feet east and west, on the south side of the lift station and approximately six hundred three feet north and south on the west side of the lift.

22. The estimated discharge was four hundred fifty-four (454) gallons. A portion of the effluent was recovered.

23. The pit plugs were inserted to prevent further flow into the contaminated area. The broken line was repaired and the cool cell relocated to the south of the line.

24. On February 7, 2023, a Final Discharge Report was completed memorializing the facts associated with D-23-012.

25. On February 8, 2023, the Department sent Respondent a Letter of Warning regarding the discharge of process wastewater in violation of the law.

Case File No. OGC-23-242

**SEABOARD FOODS LLC
9000 WEST 67TH STREET, SUITE 200
SHAWNEE MISSION, KS 66202**

Summary of Facts: In March 2023 ODAFF was notified through the AEMS Division that an unauthorized discharge had occurred. Respondent's personnel discovered the discharge line from the lift station to the digester was installed incorrectly resulting in rising pressure and a cap blowing off the line and effluent flowing onto the facility and into the county road right of way and ditch. Approximately 417 gallons flowed onto Respondents property and 4428 gallons flowed east and west in the north ditch of County Road AA in the SW ¼ of Section 11, Township 2 North and Range 16 ECM in Texas County, OK. Dry conditions allowed the effluent to soak into the ground. The county ditch was excavated and returned to the evaporative lagoon at the facility. The discharge lines were correctly connected to proper lagoon system. A settlement agreement was signed and executed in an effort to mitigate civil liabilities.

Proposed Administrative Penalty: \$2500, PIF

v. BULWARK EXTERMINATING

Case File No. OGC-22-737

BULWARK EXTERMINATING

9755 E. 55th Pl.

Tulsa, OK 74146

Summary of Facts: This company was using a Borate termite treatment on new construction homes around the Mustang, OK area. The company's applicator was making this application without certification. This company issued a termite protection letter that states that Bora-Care is the only termite treatment performed by the company and if termites are noticed in the future, then they'll install a termite baiting system. ODAFF does not allow Borate to be applied as a standalone treatment. This type of application was done to 13 different homes in the housing addition. After inspection of the records, it was determined that the Borate that was applied was done so in a manner inconsistent with label instructions. Additionally, ODAFF requires termite applicators to issue a contract for all structural applications; this company failed to do so.

As part of this agreement, this company went back to the homes listed in the LOW and installed baiting systems at each of the homes. Additionally, service contracts were issued to the home owner.

Statute or Rule Violation: 2 O.S. § 3-86 A (16); 2 O.S. § 3-86 A (4); 2 O.S. § 3-81(11); O.A.C 35:30-17-20; O.A.C.; O.A.C. 35:30-17-73 (h).

ALLEGATIONS OF FACT

17. Based upon current information and belief, the following allegations of fact summarize the alleged violations committed by Respondent.

18. On or about the 1st day of September 2022, the Consumer Protective Services Division of the Department conducted a use inspection of your company's applications of termiticide located 10505 SW 40th in Mustang, OK.

19. During this inspection it was found that your employee Chad Sample was using Bora-Care to perform a borate termite treatment to the studs and wall boards of a home that was being newly constructed by builder DR Horton. When asked for certification Mr. Sample stated that he did not have any certification.

20. When asked if the home was pretreated with a soil applied termiticide, Mr. Sample stated the home was not pretreated. Mr. Sample informed our inspectors that Bulwark Exterminating

has a termite protection plan with their customers where Bora-Care is the only termite treatment performed during construction, and if the home gets infested with termites in the future, then a termite baiting system will be installed.

21. Our inspectors spoke with Bulwark Exterminating's certified applicator David Keever who confirmed the company's termite protection plan.

22. records request was sent to your legal representatives, and they supplied our office with the Bora-Care application records for 13 homes located along the 11000 block of SW 40th, and 18 homes along the 10000 block of SW 40th in Mustang, OK. All these homes were DR Horton homes.

23. In reviewing the application records for these sites, your employees Brett Wallace and Brady Delgado made applications, and are also not on file with ODAFF as being applicators for your company.

24. The application records indicate that Mr. Wallace made applications to 10500, 10504, 10512, 10516, and 10520 SW 40th St. in Mustang, OK, and Brady Delgado made an application to 11609 SW 40th in Mustang, OK.

25. Mr. Wallace's and Mr. Delgado's applications took 30 minutes each. The Bora-Care label states that in areas where the application is limited to one or two sides of the wood member to apply two coats waiting 20 minutes between each coat.

26. For proper treatment the application should take longer than 30 minutes.

27. ODAFF requires applicator companies issue a contract for all structural pest applications.

28. The Bulwark Exterminating termite contracts were not supplied as requested, rather the copies of DR Horton's home builder contract were supplied.

ALLEGED CONCLUSIONS OF LAW

29. Based upon the application of the above law to the aforementioned facts, Making applications without certification, applying a pesticide inconsistent with the product label, not keeping the required contracts, and not meeting termite treatment minimum standards, are violations of the Oklahoma Combined Pesticide Law & Rules: 2 O.S. § 3-86 (A)(16); 2 O.S. § 3-86 (A)(4); 2 O.S. §3-86(A)(4); 2 O.S. § 3-81(11); O.A.C 35:30-17-20; O.A.C. 35:30-17-73(h).

Any license, certificate, or identification issued may be suspended, canceled, revoked, or refused issue or reissue by the Board after a notice and an opportunity to be heard has been given to the holder of the license or certificate. The suspension, cancellation, revocation, or refusal to issue or reissue any license, certificate, or identification may be made if the Board finds: 16. Any persons to be employed or represent themselves as certified applicators or service technicians unless they have met the certification standards prescribed by the Board and obtained valid certificates or identifications issued by the Board for the categories for which the persons are to be employed or supervised."
- Applying a product inconsistent with the label is a violation of 2 O.S. §3-86(A)(4) that states: "4. A person has used a pesticide in a manner inconsistent with its labeling unless prior written approval has been obtained from the Board."

- Not issuing a contract as defined by 2 O.S. §3-81(11) and O.A.C 35:30-17-20 which state: “11. "Contract" means a binding, written agreement between two or more persons spelling out terms and conditions and includes, but is not limited to, warranties or guarantees for pesticide application. For structural pest control applications, the contract shall also include a statement, plat, or diagram showing all locations of visible termites and termite damaged materials which are observed, and how the application was performed.” As well as: “(a) Contracts shall be issued for the commercial application of pesticides in the Structural Pest Category. Information on the contracts shall include: (1) Specific information from 2 O. S. Sections 3-81(11) and 3-83, and OAC 35:30-17-21. (2) Minimum standards for termite work for existing structures and preconstruction applications. Any minimum requirements that will not be met shall be explained in the contract.”
- Failing to properly apply termiticide in a manner consistent with the Oklahoma Administrative Code, specifically O.A.C. 35:30-17-73.

v. CRESCENT CO-OP

Case File No. OGC-23-91

CRESCENT CO-OP

215 E. Madison

Crescent, OK 73028-0316

Summary of Facts: ODAFF Inspectors conducted an inspection at this facility. During this inspection a strong odor of ammonia was detected around the facility. A standing discharge of water was observed on the north side of the containment tanks on the north side. Dead vegetation was observed along the discharge and around the fence. The concrete barrier was in a state of disrepair and cracking. As part of the settlement, this company was to remedy the issues with the standing water and concrete barrier around the tanks. This provision has been satisfied. As part of that agreement the company requested to reduce the amount of the penalty and it was reduced to \$3000 from \$5000. This company also sought to plea "no-contest" and was allowed to do so.

Statute or Rule Violation: 2 O.S. §§ 8-77.15. A, 2-18.1 (A), O.A.C. 35:30-29-31 (a) & (g), O.A.C. 35:30-29-34 and O.A.C. 35:30-29-35 (e) & (f)

Proposed Administrative Penalty: \$3000 Settlement PIF; Originally \$5000

Deviations: Settlement Agreement and Consent Order; \$3000

Other Actions Required: None.

**Terminix

Summary of Facts: ODAFF inspectors conducted a complaint investigation at a residence in Choctaw, OK. Inspectors observed termite shelter tubes that had been removed in the homes garage. Absent was drill holes in the brick veneer in the area where the termite activity was observed. Application records indicated Termidor HE was applied to the perimeter. Absent was the diagram of the treatment and did not indicate how the treatment was performed. A spot treatment would require you to perform a sub slab injection treatment, brick veneer void treatment, and outside vertical trench treatment. This treatment did not meet ODAFF's minimum treatment standards. This company was given 20 days to remedy the treatment and failed to do so.

PREHEARING CONFERENCE NOTICE

2. Respondent is hereby notified that a Prehearing Conference¹ will be held before an impartial Administrative Law Judge (ALJ) at **1:30 p.m. on 11th day of May, 2023** in the Board Room on the first floor of the Oklahoma Department of Agriculture, Food, and Forestry building, located at 2800 North Lincoln Blvd, Oklahoma City, Oklahoma.

3. **Please note the Prehearing Conference is not an evidentiary hearing: witnesses and evidence will not be presented at the Prehearing Conference.**

¹ Prehearing Conferences may address any of the following: a.) Identification and simplification of issues, including the elimination of frivolous claims or defenses; b.) Amendments to the pleadings; c.) the plan, schedule, and limitations of discovery; d.) Identification of admissions of fact to avoid unnecessary proof and cumulative evidence; e.) The identification of witnesses and substance of testimony, exhibits, and documents; f.) The use of prehearing briefs and pre-filed testimony in the form of sworn affidavits; g.) Settlement of all or some of the issues prior to the hearing; h.) Adoption of special procedures for managing difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems; i.) Scheduling; and j.) Any other matters as may aid in disposition of the case.

4. The Prehearing Conference may be held by telephone; arrangements to do so should be made at least one full week in advance of the Prehearing Conference.
5. Upon request of either party, Prehearing Conferences shall be on the record.
6. A Prehearing Conference may result in a scheduling or other prehearing order and subsequent changes to any prehearing or scheduling order may be made by the ALJ by modifying the order for good cause.
7. Please note that failure to appear at the Prehearing Conference may result in a default judgment being entered against you.

HEARING AND RIGHT TO COUNSEL

8. Respondent may choose to proceed to a full evidentiary hearing on the merits, at which Respondent will be given the opportunity to cross-examine the Complainant's witnesses, present Respondent's witnesses, and present relevant evidence on Respondent's behalf.
9. **The hearing date will be determined at the Prehearing Conference.**
10. The hearing will be conducted in accordance with the Oklahoma Administrative Procedures Act and the Department's Rules of Practice and Procedure, which may be found in the OAC at Title 35.
11. Respondent has the right to be represented by counsel in this matter.

DEFAULT

12. Any Respondent who fails to appear after receipt of notice may be determined to have waived the right to appear and present a defense and a default may be presented by the Department to the Board at a regularly scheduled meeting proposing the relief requested by the Notice of Violation, or other relief if justice so requires.

JURISDICTION, VENUE, AND APPLICABLE LAW

13. Subject matter jurisdiction and venue are vested in the State Board of Agriculture in its quasi-judicial capacity, pursuant to Okla. Const. Art. VI, Section 31 and 2 O. S. § 2-4(7); accordingly, this is the proper forum to hear this matter.

14. Respondent has substantial business operations and assets within the State of Oklahoma.

15. Based upon current information and belief, at all relevant times hereto, Respondent has, among other things, engaged in the business of commercial pesticide application, located at Edmond, Oklahoma.

16. Pursuant to Okla. Sta. Ann. 2 § 2-4(A)(3), ODAFF has authority to regulate persons who violate the Oklahoma Agricultural Code by initiating and prosecuting administrative, civil, or criminal actions and proceedings necessary under the Oklahoma Agricultural Code.

ALLEGATIONS OF FACT

17. Based upon current information and belief, the following allegations of fact summarize the alleged violations committed by Respondent.

18. On July 11th, 2022, a complaint investigation was performed by ODAFF inspectors. As a result of this investigation, it was determined that you are in violation of statutes and rules.

19. It was reported that you treated a residence located at 716 N. Caddell Way in Mustang, OK, and have this home under a termite treatment contract.

20. According to the application records you supplied our office, you performed a spot treatment to the outer wall of the master bathroom of this home and that Termidor HE and Termidor foam were applied. The records state that you applied 4 gallons of Termidor HE tank mix at a rate of 2 gallons/10 linear foot.

21. Your records do not indicate the areas that were addressed. This is a concrete slab home with brick veneer. A spot treatment would require you to perform a sub slab injection treatment, brick veneer void treatment, and outside vertical trench treatment. These treatments would require more than 4 gallons of tank mix.

22. According to our investigation you failed to meet the termite treatment minimum standards, and you did not give an explanation by statement, plat, or diagram on how the treatment was performed as required by the contract minimum standards.

ALLEGED CONCLUSIONS OF LAW

23. Based upon the application of the above law to the aforementioned facts, you are in violation of statute and ODAFF Rules. Specifically, 2 O.S. §3-81(11) and O.A.C. 35:30-17-69.2(B)(3).

24. Title 2 Oklahoma Statute §3-81(11) states:

- ““Contract” means a binding, written agreement between two or more persons spelling out terms and conditions and includes, but is not limited to, warranties or guarantees for pesticide application. For structural pest control applications, the contract shall also include a statement, plat, or diagram showing all locations of visible termites and termite damaged materials which are observed, and how the application was performed.
- By failing to give an explanation by statement, plat, or diagram you have not fulfilled the contractual obligation by applying the minimum standards.

25. Oklahoma Administrative Code 35:30-17-69.2(b)(3) states that:

- “(b) Exceptions to minimum standards for a spot or partial treatment shall include the following: (3) The contract shall specifically identify the exact location where the spot treatment is performed, and the treatment shall meet all minimum

standards for the specific location identified. The identified spot treatment location shall be at least three feet (3') in two (2) or more directions but shall not be equal to the entire structure.”

- Failing to follow the rules as set forth is a violation of said rule.

ATTORNEY CONFERENCES

26. If Respondent desires to meet with attorneys for the Department prior to the Prehearing Conference to discuss the allegations and/or seek a possible resolution, please contact the undersigned at 405-522-5997.

27. Additionally, OGC attorneys will be available for consultation on a first-come, first-served basis from 9:00 a.m. to 12:00 p.m. on the date of the Prehearing Conference.

28. Arrangements to discuss the matter before the Prehearing Conference are encouraged.

ENFORCEMENT PROCEEDINGS

29. Enforcement proceedings may include but are not limited to:

- a.) Administrative fines or penalties;
- b.) Revocation, suspension, or denial for up to one (1) year of any license, permit, or charter issued by ODAFF or the Board;
- c.) Criminal actions, which could involve fines, imprisonment, or both; and
- d.) Civil actions.

30. Pursuant to 2 Okla. Stat. § 2-18(A), after notice and opportunity for a hearing in accordance with the Administrative Procedures Act, if the State Board of Agriculture finds any person in violation of the Oklahoma Agricultural Code or any rule promulgated or order issued pursuant thereto, unless otherwise specifically provided by statute or rule, the Board shall have

the authority to assess an administrative penalty of not less than One Hundred Dollars (\$100.00) and not more than Ten Thousand Dollars (\$10,000.00) for each violation.

31. Each animal, each action, or each day a violation continues may constitute a separate and distinct violation.

32. Fine matrixes containing typical fines for most violations of statutes and rules enforced by ODAFF may be found in the OAC at Title 35.

OKLAHOMA SMALL BUSINESS REGULATORY FLEXIBILITY ACT

33. The Oklahoma Small Business Regulatory Flexibility Act, 75 O.S. Supp. 2002, § 506, may apply to this action; please review the full act to determine if it applies to you.

ENFORCEMENT OF JUDGMENTS

34. Administrative penalties, civil penalties, and other fines imposed by the Board shall be enforced pursuant to the procedure outlined in 2 O.S. § 2-7(B) and the Uniform Enforcement of Foreign Judgments Act, 12 O.S. § 719 *et seq.*

INFORMAL DISPOSITION OF AN INDIVIDUAL PROCEEDING

35. Informal disposition of an Individual Proceeding may be made by Stipulation, Agreed Settlement, Consent Order, or Default.

36. Resolution by Stipulation, Agreed Settlement, Consent Order, or Default shall be approved by the State Board of Agriculture.

37. Proposed Final Administrative Orders shall be prepared and issued in accordance with the Administrative Procedures Act and presented to the Board of Agriculture for review and approval.

STIPULATION

38. If Respondent desires to resolve this matter without a hearing or further action, Complainant proposes an administrative penalty of **Two-Thousand Dollars (\$2000.00)**.

39. If you wish to waive your right to hearing and stipulate to the above alleged findings of fact and conclusions of law, you may pay the full amount of the recommended penalty by check or money order and sign and return the attached Resolution by Stipulation along with your full payment of this penalty prior to the stated hearing date.
