OKLAHOMA HAY MARKET REPORT**6-9-23****Receipts: 1,445 Last Reported: 550 Year Ago: 0**

Compared to the last report: Hay trade is slow with good demand. Oklahoma is still behind schedule. We keep receiving rainfall in the western part of the state, with the number of rains they have received has helped move them closer out of the drought. Due to rain chances and the amount of rain they have been unable to bale hay due to the moisture. While the west keeps getting rain the eastern part of the state needs widespread showers as they begin to see the drought easing back into their fields. Still, no price trends are available, as farmers and ranchers want to see what the weather continues to do, and want to restock inventory from last year's drought. The Oklahoma Mesonet Drought Monitor shows we are at 1.45 percent in exceptional drought, 9.00 percent in an extreme drought, 35.72 percent in severe drought, 50.56 percent in moderate, 64.59 percent in abnormally dry conditions, 35.41 percent that has no drought conditions.

*** The next report release will be on June 23***
