Compared to last week: Receipts limited due to heavy rains and colder weather over the weekend. Cattle futures also took a sharp dive late last week and this also limited seller interest. Not enough of any one class to test trends. Demand good for light weight calves but moderate at best for others.

Oklahoma Production Cost Report (Bi-Weekly)

4-4-25

Compared to last report: Fertilizer prices are starting to vary. Planting season is just around the corner. Nitrogen based fertilizers are under increasing pressure from all sides. USDA forecasts 94.0 million acres of corn will be planted, that is up 3.4 million from a year ago. US demand for nitrogen will increase at least an estimated 255,000 tons. Imports of fertilizer have all but stopped leaving a much tighter supply. Allocation of UAN from manufacturers has already started in Western Oklahoma. One contact said Urea and UAN will increase between \$50- \$60 per ton starting next week. Farm Diesel moved higher slightly but prices at the pump suggest more increases are to come. Propane remains steady

Oklahoma Retail Feed Cost Report (Monthly)

4-4-25

Compared to last report: Summer months feed pricing started this month. About half of my contacts had changed their prices so far. Comparing those contacts feed prices increased slightly except for DDG and Soy Hulls. The stock market plunged yesterday pushing Live and Feeder Cattle sharply lower. Wide spread rain fell across much of Oklahoma yesterday and today, helping to ease drought conditions
