Oklahoma Production Cost Report (Bi-Weekly)**5-16-25**

Compared to last report: Urea took another big jump in price. UAN prices have stabilized, largely because available supply has already been contracted and additional supply won't be available until July. Demand very good for all fertilizers. This week's hot temperatures, reaching into the mid 90s, have accelerated wheat maturing across the region. As fields begin to turn, harvest preparations are underway. Farmers are servicing combines in anticipation of harvest, all while monitoring storm forecasts that could threaten yields. Farm Diesel and Propane remain steady.

Oklahoma Retail Feed Cost Report (Monthly)

5-5-25

Compared to last report: Feed prices were variable as feed stores lock in summer months pricing. USDA forecasts 94.0 million acres of corn will be planted in the US, that is up 3.4 million acres from a year ago. Feed prices will adjust based on yields harvested this fall. Many farmers in Oklahoma have already planted corn only to see fields flooded this week. April 2025 is the wettest April in Oklahoma City history with 12.5 inches of rain. Eastern Oklahoma has received as much as 19 inches of rain for April. Feed demand has decreased as the grass is growing with the vast amounts of rain received. Sale barns are at historically high prices. Cattle futures continue to remain strong.
