Map Guidance

Per Oklahoma Administrative Code (OAC) 35:17-4-4(a)(10) a map must be submitted that includes:

- All property owners within one (1) mile of the facility (with corresponding mailing list)
- Location of waste retention structures

These instructions are just a resource to assist in the basic map. Other maps are required but will be outlined in the checklist and included in the Pollution Prevention Plan.

Our recommendation to create a basic map to submit with your application is:

1. Click and use the Google Earth link below (click on “Launch Earth” if first time using this resource)
2. Click “Google Earth on web” then Click “Launch Earth”
3. Click on the magnifying glass (Search) on the left side bar
4. In the Search box, type in your GPS Coordinates (Latitude, Longitude) or if the farm has a street address you can type that in. Another option, if you are currently on location of the farm while working with the map, you can click on the “Fly to your location” button (looks like a crosshair target in the lower right-hand corner of the screen) and it will take you to where you are.
5. When the picture pulls up, ensure you are in “2D” mode (bottom right-hand corner “2D” button)
6. Zoom in or zoom out to ensure the entire farm is in the picture (including land apply areas if applicable)
7. Take a screen shot (print screen) or snippet (Windows+Shift+S)
8. Save the copy and draw proposed buildings on the map – ensure drawing is close to scale and direction of buildings is correct (can be done by hand or using a basic draw program such as Paint or even MS Word)

(Please note – you can use any resource to create your map or diagram; you are not required to use the instructions listed above. They are provided as a convenience.)
