OKLAHOMA HAY MARKET REPORT

7-11-25

Receipts: 1,508 **Last Reported:** 3,270 **Year Ago:** 1,755

Compared to the last report. Demand is at a standstill. There are some movements, but not enough for a trend for all types of hay. Parts of Oklahoma have been able to start baling hay, but other parts haven't been able to get into their fields. We continue to see rain covering Oklahoma, along with high humidity. This continues to prevent hay producers from harvesting hay and moving hay. Mature hay is becoming a problem for hay producers as well.

Trends: No Trends currently.

The Oklahoma Mesonet Drought Monitor shows that 0 percent of the state is in exceptional drought, 0 percent is in extreme drought, 0 percent is in severe drought, 0 percent is moderate, 1.24 percent is abnormally dry conditions, and 98.76 percent has no drought conditions.

Oklahoma Production Cost Report (Bi-Weekly)

7-11-25

Compared to last report: Anhydrous and blended fertilizers saw mixed pricing this report. DAP and MAP prices continue their upward trend due to resource constraints and import policies. Potash was slightly higher, though ongoing tariffs continue to pressure the cost of imported product. Urea, while still down from its peak a month ago, jumped \$25/ton this week in Just-In-Time inventory, as high water levels at the port have delayed barge offloading. In Eastern Oklahoma, retailers are once again stocked with liquid nitrogen; however, new contracts are priced significantly higher than those secured earlier in the spring. Farm diesel and propane were unchanged.
