Oklahoma Production Cost Report (Bi-Weekly)

10-3-25

Compared to last report: UAN and Urea continue their movement downward. In contrast, DAP and MAP continue their movement upward. October the 5th is the last day fertilizer imports can reach U.S. ports without new tariffs, sparking a rush of shipments. The EU is accusing Russia of undercutting European producer's prices to export more urea. Long-term supply relief, for nitrogen, is planned in Canada and Nigeria with major nitrogen plants, but both plants are not expected to come online until 2029. Both farm diesel and propane remain unchanged this report.

Oklahoma Retail Feed Cost Report (Monthly)

9-19-25

Compared to last report: Feed prices unchanged for this report. The October 2025 feed report will mark the start of winter feed pricing. Prices will begin to adjust for the winter feeding months. Corn harvesting is underway in Oklahoma, and yield estimates are up 32 bushel at 130 bushels per acre. Wheat planting is underway in Oklahoma, with timely rains providing ideal conditions. An abundant wheat grazing crop is expected across the state for the winter months. Cattle prices have recently come under pressure due to declining boxed beef values, packers reducing bids on fats, and weakening calf health.
