OKLAHOMA HAY MARKET REPORT

1-16-26

Receipts: 1,290 Last Reported: 1,172 Year Ago: 3,840

Compared to the last report. After the new year, movement has picked up; it's slow to steady. I would not say it is a turning point for hay growers just yet. Cold weather is beginning to move in. Still do not see any moisture in the near future. Drought worsens; 82 percent of the state has some form of drought.

Trends: No Trends currently.

The Oklahoma Mesonet Drought Monitor indicates that 0 percent of the state is experiencing exceptional drought, 7.44 percent is in extreme drought, 19.94 percent is in severe drought, 71.31 percent is in moderate drought, 82.14 percent is in abnormally dry conditions, and 17.86 percent has no drought conditions.

*** The next report release will be on January 30th ***

Oklahoma Production Cost Report (Bi-Weekly)**1-9-26**

Compared to last report: Most of the major fertilizers have decreased in price from late last year. DAP, MAP and Urea prices have fallen sharply as early estimates suggest corn acreage will be significantly lower this year. Eased tariffs across many countries have allowed fertilizer imports to climb over the past few months, adding to the overall supply. Of the seven major fertilizers, all have increased in price compared to this time last year: Anhydrous 11%, DAP 15%, MAP 12%, UAN 32 23%, UAN 28 22%, Urea 18%, and Potash 3% higher than last year. Current dry conditions have softened fertilizer demand. While some areas picked up rain yesterday, soils are drying quickly as temperatures have been well above normal for this time of year. Farm diesel prices have fallen sharply. Despite warmer weather, propane demand remains strong.

Oklahoma Retail Feed Cost Report (Monthly)**1-9-26**

Compared to last report: Feed prices have adjusted slightly on commodity types feeds. This winter has been unusually mild but very dry. Some areas of Oklahoma received light rain yesterday, which will provide short-term relief for wheat, though soils are drying out quickly with temperatures remaining well above normal. CME cattle futures have risen since the last report. Demand remains very strong for all classes of cattle with prices reaching near-record levels during the first week of sales this year. While cow-calf producers are benefiting from these cattle prices, tightening supplies and strong demand have many in the industry questioning how much further prices can climb before stocker producers begin to lose money.

Feed**Distributor (Dollars Per Ton)**

Class	Sale Type	Package	Price Range	AVG.	Change	DEL Period
