Oklahoma Retail Feed Cost Report (Monthly)**3-6-26**

Compared to last report: Next month will start summer feed prices. Feed remains inexpensive, and the upcoming report of estimated corn acres to be planted this year will provide insight into potential feed price trends for later in the year. Cottonseed Mill is back on the report, but is being sourced from California at \$630 per ton. This week Eastern and South-eastern Oklahoma did get some rain but 45% of the state still remains in at least a D2 Severe Drought level. CME feeder cattle futures have been volatile this week with big moves up and down in the market. Fertilizer and oil markets have been erratic this week, with large price swings that continue to pressure input costs for farmers and ranchers.
