Oklahoma Retail Feed Cost Report (Monthly)**4-3-26**

Compared to last report: This month marks the start of summer feed pricing. Only about half of the contacts are reporting current feed prices, and next month's report is expected to reflect greater variability. This report has added sack cottonseed mill, corn, and alfalfa cubes. The USDA released its estimated corn acres planted for 2026 this week projecting a 3% decline in acres to be planted at 95.3 million acres. Despite speculation that high fertilizer costs could shift acres to soy beans, a limited Midwest sample suggests most farmers still intend to plant corn. Some drought relief was seen this week, though rainfall remains inconsistent. Additional storms are predicted for tonight in Eastern Oklahoma. CME cattle futures helped support the feeder market this week at sale barns, and if rainfall becomes more consistent across Western Oklahoma, the calf market is expected to move higher as well.
