Meanwhile, some contacts in Eastern Oklahoma report difficulty sourcing UAN 28 and 32, with some unable to secure any supply at this time. On a positive note, farm diesel appears to have leveled off, increasing just two cents this report.

Oklahoma Retail Feed Cost Report (Monthly)
5-1-26

Compared to last report: Feed prices were mixed this report as summer grazing season begins. Cottonseed Mill is once again being sourced out of the Midwest rather than California, contributing to the sharp decline in price. Wheat midds are the other commodity that has seen a significant price decrease, as global supply has continued to outpace demand. While much of Oklahoma received significant rainfall throughout April, extreme drought increased from 25% to 30% across the state. Severe storms persisted across Oklahoma in late April, bringing periods of heavy rainfall, strong winds, and devastating tornadoes. Live cattle traded this morning at 255-257 on a live basis and 400-405 on a dressed basis; this has helped push feeder cattle higher in sale barns across the state.
