OKLAHOMA HAY MARKET REPORT

6-19-26

Receipts: 3,412 Last Reported: 1,440 Year Ago:3,270

Compared to the last report. Movement is slow. We have received some rain, and according to the forecast, Oklahoma is receiving more over the next few days. Parts of Oklahoma have received just enough moisture to have their first cutting. Other parts are still too wet to drive in their fields. Others are still waiting to see what hay crop they might have for this hay season. Still trying to navigate what this hay season holds for Oklahoma. Drought in Oklahoma has decreased to 81.66 percent, with the state having some form of drought.

The Oklahoma Mesonet Drought Monitor indicates that 7.13 percent of the state is experiencing exceptional drought, 30.18 percent is in extreme drought, 43.37 percent is in severe drought, 62.28 percent is in moderate drought, 81.66 percent is in abnormally dry conditions, and 18.34 percent has no drought conditions.

*** The next report release will be on July 3rd ***

Oklahoma Production Cost Report (Bi-Weekly)
6-12-26

Compared to last report: This report sees input costs finally moving lower in the fertilizer and fuel sectors. Some contacts reported urea under 700 per ton and farm diesel under 4.00 per gallon for the first time in two months. The USDA released its monthly WASDE report this week. The report was largely neutral for corn and soybeans, but lowered winter wheat production estimates as drought conditions in parts of the Plains continue to impact yields. Estimates show the smallest winter wheat crop since the mid 1960s. Welcome rains fell across much of the state in the past two weeks, easing some drought conditions in many areas and helping push the cattle market higher this week.

Oklahoma Retail Feed Cost Report (Monthly)
5-29-26

Compared to last report: Feed prices had most slight adjustments. More contacts for cottonseed meal were added to this report, accounting for the bigger price jump. Most of Oklahoma has received some rainfall in the past week but still 37% of the state is in extreme drought conditions. Summertime temperatures are returning across the state this weekend. Negotiated cash trade are in line with the last report a month ago, but remain below the all-time highs of 265 reached a couple of weeks ago. Today's trade ranged from 255 to 258. CME cattle futures traded in the red today, as the market continues to experience significant volatility, with large swings both higher and lower from one day to the next.
