Oklahoma National Stockyards
8-3-26

Receipts: 2,662 Last Reported: 1,450 Year Ago: 5,926
Compared to last week: Feeder steers lightly tested and few cattle sold 5.00-10.00 higher. Feeder heifers 5.00-15.00 higher. Steer calves unevenly steady. Heifer calves 10.00-15.00 higher. High heat continues after a little reprieve over the weekend. More 100+ degrees are expected this week. Many pastures drying out fast, bringing some cattle to town. Demand good.

OKLAHOMA HAY MARKET REPORT

7-30-26

Receipts: 8,029 Last Reported: 160 Year Ago:0

Compared to the last report, hay movement has picked up. Due to the heat, hay producers across the state are having to run their equipment late at night and early in the morning. As a positive part of the heat, central and eastern parts of Oklahoma have been able to put up all types of hay. The west is still waiting for that rain shower to help them start or continue hay season. Unfortunately, the heat looks like it will be sticking around for the next few days.

The Oklahoma Mesonet Drought Monitor indicates that 2.10 percent of the state is experiencing exceptional drought, 15.68 percent is in extreme drought, 35.01 percent is in severe drought, 43.84 percent is in moderate drought, 64.40 percent is in abnormally dry conditions, and 35.60 percent has no drought conditions.

*** The next report release will be on August 21st ***

Oklahoma Production Cost Report (Bi-Weekly)
7-24-26

Compared to last report: All nitrogen based fertilizers were lower. Most fertilizer prices have stabilized, although one contact had lower their price for urea by 300.00 per ton. Anhydrous also saw price improvement, with one contact quoting prices below 900.00 per ton. That same supplier reported UAN 28 at less than 400.00 per ton. As triple-digit temperatures have settled across the area, demand for fertilizer has slowed considerably. Meanwhile, average farm diesel prices have climbed back above the 4.00 per gallon mark.

Oklahoma Retail Feed Cost Report (Monthly)
7-24-26

Compared to last report: This month's feed market has taken a turn from mostly steady to higher prices in commodity feeds. Some plants have simply stopped pricing commodities until they get a better handle on new crop yields this fall. With fewer suppliers actively pricing products and less competition in the market, feed prices have started to trend upward. Temperatures have climbed from the mid 90s into the triple digits. Negotiated cash fed cattle prices have fallen from 257.00-260.00 a month ago to 230.00-232.00 this week. CME cattle futures traded sharply lower over the past two weeks before beginning to stabilize this week. Input cost have also started to rise again, with average farm diesel prices now exceeding 4.00 per gallon. The feeder cattle market has softened over the past two weeks, with feeders declining 20.00-35.00 per hundredweight
