Compared to last report: Most major fertilizers have increased in price slightly. Widespread rainfall across Oklahoma over the past 30 days has significantly improved wheat pasture, resulting in increased demand for fertilizer. Rising costs of key production inputs used in manufacturing DAP and MAP continue to drive fertilizer production costs higher. These escalating expenses have placed additional financial pressure on manufacturers, reportedly leading at least one U.S. production facility to idle operations. Fuel prices have continued to trend higher over the past 60 days, with farm diesel increasing $0.82 per gallon and propane rising $0.29 per gallon during this period. These higher fuel costs continue to add to operating expenses for agricultural producers.

Oklahoma Retail Feed Cost Report (Monthly)
10-16-26

Compared to last report: October marks the beginning of winter feed pricing, with all feeds moving higher for the winter feeding season. Commodity prices have continued to climb for the second consecutive month, with substantial increases reported across the board. Over the past two months corn gluten has increased 29.00 per ton, wheat midds 47.50, alfalfa pellets 39.50, soy hulls 70.50, and corn 35.00 per ton. Contacts reported being unable to source cottonseed meal, while soy hulls and alfalfa pellets remain increasingly difficult to obtain as supplies continue to tighten. Higher diesel prices, coupled with limited truck availability, continue to present challenges in transporting feed commodities.
